Overview

This contract is for the renewal of approximately 1.9 kilometres of the trunk wastewater network in Paeroa using trenchless renewal methods including the Fully Trenchless Lining (1.7Km) and Partially Trenchless Pipe Bursting (0.2Km). The work includes undertaking minor repairs to the trunk mains prior to lining, installation of trenchless spot repairs, sealing of lateral connections and various manhole repairs. An alternative option to supply and install Fully Trenchless Lining in place of the Pipe Bursting can be provided (reference Separable Portion A & B) as long as a preliminary liner design is completed by the tenderer, at the tenderers cost prior to submitting a tender, that confirms that the liner will meet with the design requirements and minimum effective pipe diameter.
