Annual Financial Statements for the year ended 30 June 2020

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast, under the current economic climate resulting from the COVID - 19 pandemic, for the year to 30 June 2021. In the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The annual financial statements set out on pages 6 to 110, which have been prepared on the going concern basis, were approved by the accounting officer on 30 October 2020. As per Government Gazette no. 43582 dated 5th August 2020, National Treasury has granted municipalities a two-month extension regarding the submission of the annual financial statements. The municipality has taken advantage of this exemption.

The accounting officer further certifies that the salaries, allowances and benefits of councillors and payments made to councillors for loss of office, if any, as disclosed in note 36 and note 59 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

Mr Heinrich Mettler
Municipal Manager
10 March 2021
Vredenburg

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise.

In the absence of an issued and effective Standard of GRAP, accounting policies for material transactions, events or conditions were developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 as read with Directive 5.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality and rounded off to the nearest rand.

1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.3 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

When the final accounts have been closed, any transaction that occurs in respect of a prior period, is considered by management individually and collectively for materiality and the annual financial statements are amended with transactions that are material in amount or by nature.

1.4 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

1.5 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

Trade receivables

The municipality assesses its trade receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the municipality makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The calculation of the impairment of trade receivables is based on a payment percentage assessment of the individual debtors of the municipality. If an individual debtor has a payment percentage of more than 90%, impairment is not considered. In instances where the payment percentage is less than 90%, the individual debtor is impaired based on the actual non-payment percentage of the outstanding debt.

Allowance for slow moving, damaged and obsolete stock

Management's judgement is required when determining the write down of stock to the lower of cost or net realisable value. Management have made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the inventory note.

Fair value estimation

The carrying value less impairment provision of trade receivables are assumed to approximate their fair values.

Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell.

Provisions

Management's judgement is required when recognising and measuring provisions, contingent liabilities and contingent assets.

Useful lives of infrastructure and other assets

The municipality's management determines the estimated useful lives and related depreciation charges for the useful lives of infrastructure and other assets. This estimate is based on industry norms or technical advice. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

Other key assumptions for post retirement obligation are based on current market conditions. Additional information is disclosed in Note 20 - Employee benefit obligations.

Effective interest rate

The municipality used the most relevant contractual risk rate applicable where relevant to each category of assets and liabilities to discount future cash flows. Where none exists the prime interest rate is used to discount future cash flows.

Allowance for impairment

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows.

Accounting Policies

1.6 Standards, amendments to standards and interpretations issued but not yet effective

In the current year the municipality has adopted all new and revised standards and interpretations issued by the ASB that are relevant to its operations and are effective. The following GRAP standards have been issued, but are not yet effective during the current reporting period and the municipality did not early adopt these GRAP standards.

Reference	Topic	Effective date
GRAP 18	Segment reporting	1 April 2015*
GRAP 110	Living and non-living resources	Unknown
IGRAP 17	Service concession arrangements where a grantor controls a significant residual interest in an asset	Unknown

*GRAP 18 Segment Reporting was effective from 1 April 2015. The implementation of GRAP 18 was delayed, in terms of Directive 5, for municipalities for the 2019/20 financial year and municipalities are not required to apply or early adopt GRAP 18. The implementation date of GRAP 18 is for financial periods commencing on or after 1 April 2020.

Management has considered all of the above-mentioned GRAP standards issued but not yet effective and anticipates that the adoption of these standards will not have a significant impact on the financial position, financial performance or cash flows of the municipality.

1.7 Budget information

The approved budget covers the fiscal period from 01 July 2019 to 30 June 2020.

The approved budget is prepared on an accrual basis and presented in accordance with the GRAP reporting framework.

The annual financial statements and the budget are on the same accounting basis, same classification basis and for the same municipality and same period therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

A difference of 10% or more, and if the amount exceeds R5 million, between budgeted and actual amounts is regarded as material.

1.8 Inventories

Inventories comprise current assets held for sale, consumption or distribution during the ordinary course of business. Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the inventories to their current location and condition. Where inventories are manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing, construction or production process.

Subsequently inventories are measured at the lower of cost and net realisable value. However, inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

Housing inventory relates to the land on which low cost houses are still in the process of construction or completed and not yet distributed to beneficiaries.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

Accounting Policies

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

1.9 Investments

Investments are short-term deposits invested with various financial institutions for a period longer than three months, but not more than twelve months in accordance with the cash management and investment policies of the municipality.

Short-term deposits are not classified as part of cash and cash equivalents as these investments are not readily convertible to known amounts of cash. The short-term investments do not have a short maturity of three months or less from the date of acquisition and do not meet the definition of cash and cash equivalents in accordance with GRAP 2.

Recognition

The municipality recognises investments as a current asset when the funds have been transferred to the financial institution.

Measurement

The investments are initially measured at fair value plus the transaction costs that are directly attributable to their acquisition. The fair value is the total amount initially invested at the banking institution.

The investments are subsequently measured at amortised cost using the effective interest rate method. The gains on the investments are recognised in surplus or deficit through the amortisation process.

Derecognition

The municipality derecognises investments on maturity of the investments when the contractual rights to the cash flows from the investments are settled by the financial institutions.

Accounting Policies

1.10 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

A concessionary loan is a loan granted to or received by an entity on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another entity; or
- a contractual right to:
 - receive cash or another financial asset from another entity; or
 - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Accounting Policies

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

A residual interest is any contract that manifests an interest in the assets of an entity after deducting all of its liabilities. A residual interest includes contributions from owners, which may be shown as:

- equity instruments or similar forms of unissued capital;
- a formal designation of a transfer of resources (or a class of such transfers) by the parties to the transaction as forming part of an entity's net assets, either before the contribution occurs or at the time of the contribution; or
- a formal agreement, in relation to the contribution, establishing or increasing an existing financial interest in the net assets of an entity.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the entity designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
 - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class

Trade and other receivables from exchange transactions
Cash and cash equivalents
Investments

Category

Financial asset measured at amortised cost
Financial asset measured at amortised cost
Financial asset measured at amortised cost

The entity has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class

Borrowings
Trade and other payables from exchange transactions
Finance lease liability
Consumer deposits
Unspent conditional grants arising from contractual agreements (not statutory grants)

Category

Financial liability measured at amortised cost
Financial liability measured at amortised cost
Financial liability measured at amortised cost
Financial liability measured at amortised cost
Financial liability measured at amortised cost

Accounting Policies

Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The entity measures a financial asset and financial liability initially at its fair value [if subsequently measured at fair value].

The entity first assesses whether the substance of a concessionary loan is in fact a loan. On initial recognition, the entity analyses a concessionary loan into its component parts and accounts for each component separately. The entity accounts for that part of a concessionary loan that is:

- a social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or
- non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the entity establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, a municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

The fair value of a financial liability with a demand feature (e.g. a demand deposit) is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Impairment and uncollectibility of financial assets

The entity assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Accounting Policies

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly or through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly OR by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Derecognition

Financial assets

The entity derecognises financial assets using trade date accounting.

The entity derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the entity transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the entity, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity :
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

If the entity transfers a financial asset in a transfer that qualifies for derecognition in its entirety and retains the right to service the financial asset for a fee, it recognise either a servicing asset or a servicing liability for that servicing contract. If the fee to be received is not expected to compensate the entity adequately for performing the servicing, a servicing liability for the servicing obligation is recognised at its fair value. If the fee to be received is expected to be more than adequate compensation for the servicing, a servicing asset is recognised for the servicing right at an amount determined on the basis of an allocation of the carrying amount of the larger financial asset.

If, as a result of a transfer, a financial asset is derecognised in its entirety but the transfer results in the entity obtaining a new financial asset or assuming a new financial liability, or a servicing liability, the entity recognise the new financial asset, financial liability or servicing liability at fair value.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

If the transferred asset is part of a larger financial asset and the part transferred qualifies for derecognition in its entirety, the previous carrying amount of the larger financial asset is allocated between the part that continues to be recognised and the part that is derecognised, based on the relative fair values of those parts, on the date of the transfer. For this purpose, a retained servicing asset is treated as a part that continues to be recognised. The difference between the carrying amount allocated to the part derecognised and the sum of the consideration received for the part derecognised is recognised in surplus or deficit.

Accounting Policies

If a transfer does not result in derecognition because the entity has retained substantially all the risks and rewards of ownership of the transferred asset, the entity continues to recognise the transferred asset in its entirety and recognise a financial liability for the consideration received. In subsequent periods, the entity recognises any revenue on the transferred asset and any expense incurred on the financial liability. Neither the asset, and the associated liability nor the revenue, and the associated expenses are offset.

Financial liabilities

The entity removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Dividends or similar distributions relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Distributions to holders of residual interests are recognised by the entity directly in net assets. Transaction costs incurred on residual interests are accounted for as a deduction from net assets. Income tax [where applicable] relating to distributions to holders of residual interests and to transaction costs incurred on residual interests are accounted for in accordance with the International Accounting Standard on Income Taxes.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the entity currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

In accounting for a transfer of a financial asset that does not qualify for derecognition, the entity does not offset the transferred asset and the associated liability.

1.11 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

Asset class	Depreciation method	Average useful life
Land		Indefinite
Machinery and equipment	Straight line	2 - 65
Furniture and office equipment	Straight line	2 - 40
Transport assets	Straight line	5 - 40
Computer equipment	Straight line	2 - 40
Infrastructure	Straight line	1 - 99
Community assets	Straight line	3 - 70
Other assets	Straight line	3 - 70

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item and that has a different useful life is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

Accounting Policies

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets under construction are carried at cost. Depreciation of an asset commences when the asset is available for use. All assets under construction which have exceeded the initial planned completion date by two years are considered to be taking a significantly longer period of time to complete than expected.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 10). The expenditure to repair and maintain property, plant and equipment comprises of goods and services and contracted services. These cost excludes labour cost.

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 10).

1.12 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which a municipality incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

1.13 Heritage assets

Assets are resources controlled by a municipality as a result of past events and from which future economic benefits or service potential are expected to flow to the municipality.

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognised in accordance with the specific requirements of other Standards of GRAP.

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

The municipality separately discloses expenditure to repair and maintain heritage assets in the notes to the financial statements (see note 13). Cost incurred to repair and maintain heritage assets comprises of goods and services and contracted services. These costs excludes labour cost.

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 13). Heritage Assets under construction are carried at cost. All assets under construction which have exceeded the initial planned completion date by two years are considered to be taking a significantly longer period of time to complete than expected.

Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Accounting Policies

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

Heritage assets are not depreciated, since their long economic life and high residual value means that any depreciation would be immaterial. Heritage assets are considered to have indefinite useful lives.

Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback). The gain or loss arising from the disposal or retirement of a heritage asset is determined as the difference between the net disposal proceeds, if any, and the carrying value and is recognised in the statement of financial performance.

1.14 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Depreciation method	Average useful life
Computer software, other	Straight line	1 - 18
Other intangible assets	Straight line	Indefinite

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 11). All intangible assets under construction which have exceeded the initial planned completion date by two years are considered to be taking a significantly longer period of time to complete than expected.

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of intangible assets is included in surplus or deficit when the asset is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

Accounting Policies

1.15 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the municipality determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the municipality determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the municipality measures that investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The municipality applies the cost model (as per the accounting policy on Property, plant and equipment) until disposal of the investment property.

Once the municipality becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

Accounting Policies

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

Revenue earned from rental of investment property is disclosed as part of rental of facilities and equipment and are thus not disclosed separately, as they are not material. Expenses in respect of investment property are disclosed as other expenditure and not disclosed separately as they are not material.

The municipality separately discloses expenditure to repair and maintain investment property in the notes to the annual financial statements (see note 12). Cost incurred to repair and maintain investment property comprises of goods and services and contracted services. These cost excludes labour cost.

The municipality discloses relevant information relating to assets under construction or development, in the notes to the annual financial statements (see note 12). All investment property under construction which have exceeded the initial planned completion date by two years are considered to be taking a significantly longer period of time to complete than expected.

1.16 Unauthorised expenditure

Unauthorised expenditure is defined as any expenditure incurred by a municipality not in accordance with section 15 or 11(3) of the MFMA, and includes an overspending of the total amount appropriated in the municipality's approved budget, an overspending of the total amount appropriated for a vote in the approved budget, an expenditure from a vote unrelated to the department or functional area covered by the vote, an expenditure of money appropriated not in accordance for that specific purpose, a spending of an allocation not in accordance with any conditions of the allocation, or a grant made by the municipality not in accordance with the MFMA.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

Refer to note 61 (Capital expenditure by vote) and Annexure B (Operating expenditure by vote) where an analysis of the budgeted and actual expenditure is presented.

1.17 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.18 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.19 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

Accounting Policies

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating surplus (deficit).

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of an activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 57.

Decommissioning, restoration and similar liability

Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

If the related asset is measured using the cost model:

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period.
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit.
- if the adjustment results in an addition to the cost of an asset, the entity consider whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If there is such an indication, the entity test the asset for impairment by estimating its recoverable amount or recoverable service amount, and account for any impairment loss, in accordance with the accounting policy on impairment of assets as described in accounting policy and 1.26.
- changes in the liability alter the revaluation surplus or deficit previously recognised on that asset, so that:
 - a decrease in the liability is credited directly to revaluation surplus in net assets, except that it is recognised in surplus or deficit to the extent that it reverses a revaluation deficit on the asset that was previously recognised in surplus or deficit; and
 - an increase in the liability is recognised in surplus or deficit, except that it is debited directly to revaluation surplus in net assets to the extent of any credit balance existing in the revaluation surplus in respect of that asset;

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur. The periodic unwinding of the discount is recognised in surplus or deficit as a finance cost as it occurs.

Accounting Policies

1.20 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessor

The municipality recognises finance lease receivables as assets on the statement of financial position. Such assets are presented as a receivable at an amount equal to the net investment in the lease.

Finance revenue is recognised based on a pattern reflecting a constant periodic rate of return on the municipality's net investment in the finance lease.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the municipality's incremental borrowing rate.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

The depreciation policy for depreciable leased assets is consistent with the normal depreciation policy for similar assets.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

1.21 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Accounting Policies

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates. Revenue arising out of situations where the municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the municipality as compensation for executing the agreed services.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by the proportion that costs incurred to date bear to the total estimated costs of the transaction.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant gazetted tariff. This includes the issuing of licences and permits.

Interest, royalties and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

Dividends or similar distributions are recognised, in surplus or deficit, when the municipality's right to receive payment has been established. Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

Accounting Policies

1.22 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arises when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Accounting Policies

Taxes

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources. Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured. The degree of probability attached to the inflow of resources is determined on the basis of evidence available at the time of initial recognition, which includes, but is not limited to, disclosure of the taxable event by the taxpayer.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Transfers

Apart from Services in kind, which are not recognised, the municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Fines

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Assets arising from fines are initially measured at its fair value at the date of acquisition, which is the best estimate of the inflow of economic benefits. The probability of non-payment is not considered at initial recognition.

The non-payment of traffic fines is estimated at subsequent measurement with reference to historical data and payment trend analysis. An impairment loss is recognised in surplus and deficit.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

Bequests

Bequests that satisfy the definition of an asset are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality, and the fair value of the assets can be measured reliably.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Accounting Policies

Services in-kind

Except for financial guarantee contracts, the municipality recognise services in-kind that are significant to its operations and/or service delivery objectives as assets and recognise the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality disclose the nature and type of services in-kind received during the reporting period.

1.23 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.24 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.25 Employee benefits

Employee benefits are all forms of consideration given by the municipality in exchange for service rendered by employees.

The municipality provides retirement benefits for its employees and councillors. Retirement benefits consist of defined contribution plans and defined-benefit plans.

Defined-contribution plans are post-employment benefit plans under which a municipality pays fixed contributions into a separate entity (a fund), and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. The contributions to fund obligations for the payment of retirement benefits are charged against the statement of financial performance in the year in which they become payable.

Defined-benefit plans are post-employment benefit plans other than defined-contribution plans. The defined-benefit funds are actuarially valued based on the projected unit credit method. Deficits identified are recovered through lump sum payments or increased future contributions on a proportional basis from all participating municipalities. The contributions and lump sum payments are charged against the statement of financial performance in the year in which they become payable.

Accounting Policies

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the municipality during a reporting period, the municipality recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the municipality recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measures the expected cost of accumulating compensated absences as the additional amount that the municipality expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The municipality provides long-service awards to eligible employees, after completion of every five years' service and the liability thereof is based on an actuarial valuation. The projected unit credit method has been used to value the obligation.

Actuarial gains and losses on the long-term incentives are fully accounted for in the statement of financial performance.

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

The municipality provides post-retirement benefits by subsidising the medical healthcare contributions of certain retired staff. According to the rules of the medical aid funds with which the municipality is associated, a member on retirement is entitled to remain a continued member of such medical aid fund, and the municipality will continue to subsidise medical contributions in accordance with the provisions of the employee's employment contract.

The liability in respect of current pensioners is regarded as fully accrued, and is therefore not split between a past, or accrued and future in-service element. The liability is recognised at the fair value of the obligation, together with any adjustments required. The projected unit credit method has been used to value the obligation. Refer to note 20.

Multi-employer plans and/or State plans and/or Composite social security programmes

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

The municipality classifies a multi-employer plan and/or state plans and/or composite social security programmes as a defined contribution plan or a defined benefit plan under the terms of the plan (including any constructive obligation that goes beyond the formal terms).

Where a plan is a defined contribution plan, the municipality accounts for in the same way as for any other defined contribution plan. Where a plan is a defined benefit plan, the municipality account for its proportionate share of the defined benefit obligation, plan assets and cost associated with the plan in the same way as for any other defined benefit plan.

When sufficient information is not available to use defined benefit accounting for a plan, that is a defined benefit plan, the municipality account for the plan as if it was a defined contribution plan.

Accounting Policies

Post-employment benefits: Defined contribution plans

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the entity during a reporting period, the entity recognise the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, an entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation.

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the entity recognise actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognise past service cost as an expense in the reporting period in which the plan is amended.

The entity account not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the entity's informal practices. Informal practices give rise to a constructive obligation where the entity has no realistic alternative but to pay employee benefits. An example of a constructive obligation is where a change in the entity's informal practices would cause unacceptable damage to its relationship with employees.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

Any adjustments arising from the limit above is recognised in surplus or deficit.

The entity recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- actuarial gains and losses;
- past service cost; and
- the effect of any curtailments or settlements.

Accounting Policies

The entity uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Other post retirement obligations

The municipality provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some retirees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations. The municipality also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

1.26 Impairment of cash and non-cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Non-cash-generating assets are assets other than cash-generating assets.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Accounting Policies

Judgements made by management in applying the criteria to designate assets as non-cash-generating assets or cash-generating assets, are as follows:

- None of the assets are managed with the objective of generating positive cash flows are expected to be significantly higher than the cost of the asset; and
- Although certain services assets generate positive cash flows, these are used for cross subsidisation of services assets that generate negative cash flows.

Designation

At initial recognition, the municipality designates an asset as non-cash-generating, or an asset or cash-generating unit as cash-generating. The designation is made on the basis of a municipality's objective of using the asset.

The municipality designates an asset or a cash-generating unit as cash-generating when:

- its objective is to use the asset or a cash-generating unit in a manner that generates a commercial return; such that
- the asset or cash-generating unit will generate positive cash flows, from continuing use and its ultimate disposal, that are expected to be significantly higher than the cost of the asset.

The municipality designates an asset as non-cash-generating when its objective is not to use the asset to generate a commercial return but to deliver services.

An asset used with the objective of generating a commercial return and service delivery, is designated either as a cash-generating asset or non-cash-generating asset based on whether the municipality expects to use that asset to generate a commercial return. When it is not clear whether the objective is to use the asset to generate a commercial return, the municipality designates the asset as a non-cash-generating asset and applies this accounting policy, rather than the accounting policy on Impairment of non-cash-generating assets.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the current reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Accounting Policies

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.27 Cash-backed reserves

Housing development fund

The Housing Development Fund was established in terms of the Housing Act, (Act No 107 of 1997). Loans from national and provincial government used to finance housing selling schemes undertaken by the Municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes both complete and in progress as a 1 April 1998, were also transferred to the Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments which include rental income and sale of houses must be paid into the Housing Development Fund. Monies standing to credit of the Housing Development Fund can be used only to finance housing developments within the municipal areas subject to the approval of the Provincial MEC responsible for housing. Since the Housing Development Fund was established in terms of legislation it may be reported separately in the Statement of Financial Position and the Statement of Changes in Net Assets.

Accounting Policies

Capital replacement reserve (CRR)

This reserve is to be used for future capital expenditure from own funds only and may not be used for maintenance or other operating expenditure. The capital replacement reserve must be cash-backed. The annual contribution to be based on the budget, funds and reserves policy. The balance of the capital replacement reserve is invested in short-term investments.

The following sources of revenue are included in the capital replacement reserve:

- A percentage of the annual depreciation amount;
- Un-appropriated cash-backed surpluses to the extent that such surpluses are not required for operational purposes;
- Further cash surpluses appropriated as contributions in each annual or adjustments budget, as and when this can be afforded by the municipality;
- Revenue amounts equal to public contributions for bulk services contributions for funding of bulk services, i.e. capital contributions; and
- Net cash proceeds received from land sales. These net proceeds may only be utilised to fund municipal land development.

1.28 Cash-backed liabilities

In terms of the municipality's budget, funds and reserves policy the following liabilities below are also fully cash-backed and invested in short-term investments:

Working capital

An estimated amount of 1/12th of the total fixed operating expenditure.

Employee benefit obligation

The aim of the obligation is to ensure sufficient cash resources are available for the future payment of employee benefits. The contributions to the reserve must be made in accordance with the directives set in the budget, funds and reserves policy. The balance of the employee benefit reserve is partially cash backed and is invested in short-term investments.

Environmental rehabilitation provision

The aim to the provision is to ensure sufficient cash resources are available for the future payment of non-current provisions. The contributions to the provision must be made in accordance with the directives set in set in the budget, funds and reserves policy. The balance of the non-current provisions reserve is fully cash backed and is invested in short-term investments.

Unspent conditional grants and receipts and Contract revenue received in advance

The balance of all conditional grants received where the conditions have not been met.

Unspent loans

The balance of external loan funding received and not yet spent for the purpose why the loans were obtained.

Loan repayments due

The provision is defined as a cash-backed amount that consists of the current portion of loans that is set aside for the redemption of external loans annually.

Consumer deposits

The balance of consumer deposits held in cash by the municipality.

1.29 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality. A person is considered to be a close member of the family of another person if they are married or live together in a relationship similar to a marriage, or are separated by no more than two degrees of natural or legal consanguinity or affinity.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its annual financial statements.

1.30 Accounting by principals and agents

Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

Accounting Policies

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that it is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

1.31 Service concession arrangements: Entity as grantor

Identification

Service concession arrangement is a contractual arrangement between a grantor and an operator in which an operator uses the services concession asset to provide a mandated function on behalf of a grantor for a specified period, where the operator is compensated for its services over the period of the service concession arrangement.

A grantor is the entity that grants the right to use the service concession asset to the operator.

A mandated function involves the delivery of a public service by an operator on behalf of a grantor that falls within the grantor's mandate.

An operator is the entity that uses the service concession asset to provide a mandated function subject to the grantor's control of the asset.

A service concession asset is an asset used to provide a mandated function in a service concession arrangement that:

- is provided by the operator which:
 - the operator constructs, develops, or acquires from a third party; or
 - is an existing asset of the operator; or
- is provided by the grantor which:
 - is an existing asset of the grantor; or
 - is an upgrade to an existing asset of the grantor.

Recognition of asset and liability

The entity recognises an asset provided by the operator and an upgrade to an existing asset of the entity, as a service concession asset if the entity controls or regulates what services the operator must provide with the asset, to whom it must provide them, and at what price, and if the entity controls (through ownership, beneficial entitlement or otherwise) any significant residual interest in the asset at the end of the term of the arrangement. This applies to an asset used in a service concession arrangement for its entire economic life (a "whole-of-life" asset).

After initial recognition or reclassification, service concession assets are clearly identified from other assets within the same asset category, and are clearly identified from owned and/or leased assets.

Accounting Policies

Where the entity recognises a service concession asset, and the asset is not an existing asset of the entity (grantor), the entity (grantor) also recognises a liability.

The entity does not recognise a liability when an existing asset of the entity is reclassified as a service concession asset, except in circumstances where additional consideration is provided by the operator.

Measurement of asset and liability

The entity initially measures the service concession asset as follows:

- Where the asset is not an existing asset of the entity, the asset is measured at its fair value.
- Where the asset is an existing asset of the entity and it meets the recognition criteria of a service concession asset, the asset is reclassified as a service concession asset, and the asset is accounted for in accordance with the policy on Investment property, Property, plant and equipment, Intangible assets, or Heritage assets, as appropriate.

The entity initially measures the liability at the same amount as the service concession asset, adjusted by the amount of any other consideration from the entity to the operator, or from the operator to the entity.

Financial liability model

Where the entity has an unconditional obligation to pay cash or another financial asset to the operator for the construction, development, acquisition, or upgrade of a service concession asset, the entity accounts for the liability as a financial liability.

The entity allocates the payments to the operator and accounts for them according to their substance as a reduction in the liability recognised, a finance charge, and charges for services provided by the operator.

The finance charge and charges for services provided by the operator in a service concession arrangement are accounted for as expenses.

Where the asset and service components of a service concession arrangement are separately identifiable, the service components of payments from the entity to the operator are allocated by reference to the relative fair values of the service concession asset and the services.

Where the asset and service components are not separately identifiable, the service component of payments from the entity to the operator is determined using estimation techniques.

Grant of a right to the operator model

Where the entity does not have an unconditional obligation to pay cash or another financial asset to the operator for the construction, development, acquisition, or upgrade of a service concession asset, and grants the operator the right to earn revenue from third-party users or another revenue-generating asset, the entity accounts for the liability as the unearned portion of the revenue arising from the exchange of assets between the entity and the operator.

The entity recognises revenue and reduces the liability according to the substance of the service concession arrangement.

Dividing the arrangement

If the entity pays for the construction, development, acquisition, or upgrade of a service concession asset partly by incurring a financial liability and partly by the grant of a right to the operator, it accounts separately for each part of the total liability.

Other liabilities, contingent liabilities and contingent assets

The entity accounts for other liabilities, contingent liabilities, and contingent assets arising from a service concession arrangement in accordance with the policy on Provisions, Contingent liabilities and contingent assets and Financial instruments.

Accounting Policies

Other revenues

The entity accounts for revenues from a service concession arrangement, other than those relating to the grant of a right to the operator model, in accordance with the Standard of GRAP on Revenue from exchange transactions.

1.32 Commitments

Capital commitments disclosed in the annual financial statements represent the contractual balance committed to capital projects on reporting date that will be incurred in the period subsequent to the specific reporting date. The municipality discloses capital commitments exclusive of VAT.

1.33 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.34 Statutory receivables

Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

Carrying amount is the amount at which an asset is recognised in the statement of financial position.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount (for purposes of this Standard) for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

Initial measurement

The municipality initially measures statutory receivables at their transaction amount.

Accounting Policies

Subsequent measurement

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised.

Accrued interest

Where the municipality levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

Interest on statutory receivables is recognised as revenue in accordance with the policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (Taxes and transfers), whichever is applicable.

Other charges

Where the municipality is required or entitled in terms of legislation, supporting regulations, by-laws or similar means to levy additional charges on overdue or unpaid amounts, and such charges are levied, the entity applies the principles as stated in "Accrued interest" above, as well as the relevant policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (Taxes and transfers).

Impairment losses

The municipality assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

In assessing whether there is any indication that a statutory receivable, or group of statutory receivables, may be impaired, the municipality considers, as a minimum, the following indicators:

- Significant financial difficulty of the debtor, which may be evidenced by an application for debt counselling, business rescue or an equivalent.
- It is probable that the debtor will enter sequestration, liquidation or other financial re-organisation.
- A breach of the terms of the transaction, such as default or delinquency in principal or interest payments (where levied).
- Adverse changes in international, national or local economic conditions, such as a decline in growth, an increase in debt levels and unemployment, or changes in migration rates and patterns.

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced, either directly or through the use of an allowance account. The amount of the losses are recognised in surplus or deficit.

In estimating the future cash flows, a municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the entity discounts the estimated future cash flows using a rate that reflects the current risk free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted either directly or by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

Accounting Policies

Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or
- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity:
 - derecognise the receivable; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The entity considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

1.35 Construction contracts and receivables

Construction contract is a contract, or a similar binding arrangement, specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.

Contractor is an entity that performs construction work pursuant to a construction contract.

A contractor is an entity that enters into a contract to build structures, construct facilities, produce goods, or render services to the specifications of another entity either itself or through the use of sub-contractors. The term "contractor" thus includes a general or prime contractor, a subcontractor to a general contractor, or a construction manager.

The municipality participates as a non-accredited municipality in the national housing programme. The municipality's roles and responsibilities in the housing development process are set out in the binding arrangements entered into with the Western Cape Department of Human Settlements. The municipality assesses the terms and conditions of each contract concluded with the Western Cape Department of Human Settlements to establish whether the contract is a construction contract or not. In assessing whether the contract is a construction contract, the municipality considers whether it is a contractor.

The binding arrangements entered into with the Western Cape Department of Human Settlements are non-commercial fixed price contracts. The objective of the arrangements is to construct low cost houses for the beneficiaries of the National Housing Programme in return for full reimbursement of costs from the department through a housing grant or subsidy.

Where the outcome of a construction contract can be estimated reliably, contract revenue and costs are recognised by reference to the stage of completion of the contract activity at the reporting date, as measured by the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs.

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent that contract costs incurred are recoverable. Contract costs are recognised as an expense in the period in which it was incurred.

Advances received in excess of work completed are included in trade and other payables.

4. Investments		
Institutions holding the deposits		
ABSA	55 420 770	111 041 862
FNB	86 032 566	71 536 699
Standard Bank	142 669 945	83 680 730
Nedbank	112 400 918	127 478 836
Investec	81 529 896	110 592 048
	478 054 095	504 330 175
Current assets		
At amortised cost	478 054 095	504 330 175

The value of the investments has been measured at amortised cost using the effective interest rate method.

Short-term deposits are invested with various banking institutions for a period longer than three months, but not exceeding twelve months in accordance with the cash management and investment policy. This information is disclosed in terms of Section 125(2)(b) of the MFMA.

All unspent conditional grants and certain provisions and reserves, which are included in the short-term investments above, have been ring-fenced and may not be utilised for any other purposes. Refer to note 51.

The different institutions have external credit ratings from rating agencies.

5. Receivables from exchange transactions

5.1 Net balance

Consumer debtors - Electricity	39 019 094	33 095 804
Consumer debtors - Water	34 253 605	37 978 255
Consumer debtors - Sewerage	9 214 084	8 184 224
Consumer debtors - Refuse	9 869 052	9 050 222
Sundry receivables	1 067 508	989 395
Recoverable losses	189 588	33 399
Other receivables	32 057 861	27 687 988
	125 670 792	117 019 287

5.2 Receivables from exchange transactions past due but not impaired

Trade and other receivables with a payment ratio of more than 90% are not considered to be impaired. In instances where the payment ratio is less than 90%, the individual debtor is impaired based on the actual non-payment percentage of outstanding debt. At 30 June 2020, R 49 510 791 (2019: R 44 272 730) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

1 month past due	5 566 100	3 773 156
2 months past due	2 919 785	1 766 979
3 months past due	2 576 991	1 457 511
4 to 12 months past due	8 820 207	7 337 439
More than a year past due	29 627 708	29 937 645
	49 510 791	44 272 730

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
5.3 Reconciliation of provision for impairment		
Opening balance	(124 560 560)	(107 954 435)
Impairments	(2 095 871)	(17 767 603)
VAT movement	(424 997)	1 161 478
	(127 081 428)	(124 560 560)

An increase in the actual debt write-off, resulted in a decrease in the provision for impairment when compared to the provision recognised in the 2018/19 financial year.

6. Receivables from non-exchange transactions

6.1 Net balance

Consumer debtors - Rates	25 332 303	21 226 297
Fines	9 679 010	9 829 494
	35 011 313	31 055 791

Statutory receivables included in receivables from non-exchange transactions above are as follows:

Consumer debtors - Rates	25 332 303	21 226 297
Fines	9 679 010	9 829 494
	35 011 313	31 055 791

6.2 Statutory receivables general information

Consumer debtors - Rates

Property rates arise from the application of the Municipal Property Rates Act 6 of 2004. The transaction amount is based on the market value of a property and any impairments are based on the individual collection ratio.

The municipality levies interest on rates outstanding after the due date for payment at prime +1% per annum (2019: prime +1% per annum).

Fines

Fines arise from the application of the Administrative Adjudication of Road Traffic Offences Act, 1998. The transaction amount is based on the traffic offence committed and any impairments are based on the collection ratio.

No interest is levied on fines outstanding.

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

6.3 Statutory receivables past due but not impaired

Rates consumer debtors with a payment ratio more than 90% are not considered to be impaired. In instances where the payment ratio is less than 90%, the individual debtor is impaired based on the actual non-payment percentage of outstanding debt. At 30 June 2020, R25 265 101 (2019: R16 350 350) were past due but not impaired.

Fine debtors is impaired based on the non-collection ratio of outstanding fines. At 30 June 2020, R 9 171 103 (2019: R9 464 423) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

1 month past due	5 874 717	1 384 977
2 months past due	1 422 860	1 014 115
3 months past due	1 649 554	938 131
4 to 12 months past due	6 009 383	6 515 288
More than a year past due	19 479 690	15 962 262
	34 436 204	25 814 773

6.4 Receivables from non-exchange transactions impaired

As at June 30, 2020, traffic fines of R 31,528,247 (2019: R 32,018,430) were impaired and provided for. The amount of the provision was R 21,849,237 as of June 30, 2020 (2019: R 22,188,936).

The ageing of the traffic fines is as follows:

6.5 Summary of traffic fines by ageing

Current (0 - 30 days)	507 907	365 070
31 - 60 days	626 551	439 540
61 - 90 days	55 952	380 658
91 - 120 days	658 874	345 822
121 - 365 days	3 779 353	3 336 277
> 365 days	4 050 373	4 962 127
	9 679 010	9 829 494

6.6 Reconciliation of provision for impairment of receivables from non-exchange transactions

Opening balance	(58 295 695)	(64 623 348)
Impairments:		
Consumer debtors - Rates	(5 499 177)	(3 109 839)
Fines	339 700	9 437 492
	(63 455 172)	(58 295 695)

An increase in the actual debt write-off, resulted in a decrease in the provision for impairment when compared to the provision recognised in the 2018/19 financial year.

At the reporting date the municipality had outstanding commitments under operating leases which fall due as follows:

Minimum lease payments due

- within one year	885 341	2 863 765
- in second to fifth year	225 855	751 096
	1 111 196	3 614 861

Operating lease payments represent rentals payable by the municipality for certain of its office properties. No contingent rent is payable. The term pertaining to the leases ranges from 1 to 3 years (2019: 1 to 3 years) and escalation rates vary from 8% to 10% (2019: 8% to 10%) per year.

Operating leases - as lessor (income)

Minimum lease payments due

- within one year	957 528	1 092 878
- in second to fifth year	497 270	493 968
	1 454 798	1 586 846

Operating leases consist of rentals on the letting of premises. Lease agreements are non-cancellable and have terms from 1 to 10 years (2019: 1 to 10 years). The escalation rates of the lease agreements vary from 5% to 12% (2019: 5% to 12%). There are no contingent rents receivable.

	129 436 281	129 436 281

In 2006 the municipality entered into a service concession arrangement with the WCDM for an initial period of 10 years wherein the WCDM operates the municipality's assets to provide bulk water to the municipality to distribute to its consumers. The agreement was subsequently extended until 30 June 2022. The other parties to this arrangement are Bergrivier municipality and Swartland municipality which also appointed the WCDM as an operator.

The WCDM uses the bulk water services assets to provide water to the local municipalities and private users. In terms of the service level agreement the local municipalities determine a tariff, in consultation with the WCDM, that allows the WCDM to recover the costs the WCDM incurs in the provision of the bulk water services. The local municipalities also pay the WCDM an administrative fee of 8% (2019:10%) of the operational costs of the water function which is also included in the tariff above.

The local municipalities recognise the costs recovered by the WCDM through the tariff as expenditure in their respective financial statements by its nature, as bulk purchases for water. The local municipalities also recognise all revenue earned from providing water to consumers, through monthly billing of the consumers, within their respective areas of jurisdiction.

The WCDM also provides water services to third parties and bills the third parties directly (farmers in remote areas and some commercial consumers). The provision of the water to these third parties is approved by the local municipalities when the tariff for the year is approved. The water provided to third parties by the WCDM is thus recognised in their records.

Other information

Provision has been made for the estimated cost of rehabilitating landfill sites, included in infrastructure, as disclosed in note 21. Infrastructure assets were assessed during the year to determine whether there are any indicators of impairment. Refer to note 38.

All moveable assets were reviewed for changes in useful life and conditions. This resulted in changes of accounting estimates which was applied prospectively. Refer to note 48.

All completed projects were unbundled in line with the CIDMS asset hierarchy.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

Details of valuation

The effective date of the revaluations was Tuesday, 30 June 2020. Revaluations were performed by Mr Igshaan Oosterwyk, an employee of SBM. Mr Oosterwyk is a registered Professional Associated Valuer with the SA Council for Valuers Profession, registration number 5902, and member of the SA Institute of Valuers and has the appropriate experience in performing valuation of investment properties.

The valuation for the land portion was based on adapted comparable sales and for the improvements there-on on replacement costs.

These assumptions are based on current market conditions.

No investment property has not been pledged as security.

No expenditure was incurred to repair and maintain investment property.

Unspent conditional grants and receipts by source

National government	-	10 022 003
Provincial government	42 686 919	20 911 352
Public entities	1 573 452	1 573 452
	44 260 371	32 506 807

Movement during the year

Balance at the beginning of the year	32 506 807	40 721 810
Received during the year	150 723 488	145 318 804
Interest for the year	22 438	156 681
Income recognition during the year	(138 565 418)	(146 915 428)
Other conditions met during the year	(73 501)	(953 589)
Grants repaid	(353 443)	(5 821 471)
	44 260 371	32 506 807

These amounts are invested in a ring-fenced investment until utilised. See note 51.

For the purposes of section 123 of the Municipal Finance Management Act 56 of 2003, the unspent grants relating to Human Settlements Development Grant should be increased by R 856 225 (2019: R 4 619 533). In terms of GRAP 11 any unspent portion received for the construction should be recognised as revenue received in advance and not as an unspent conditional grant. Refer to note 14 and appendix D for more details.

18. Borrowings		
At amortised cost		
DBSA	116 986 075	127 056 070
DBSA - WCDM	4 500 000	10 156 781
ABSA - WCDM	3 374 245	6 409 173
	124 860 320	143 622 024
Non-current liabilities	112 706 972	124 860 318
Current liabilities	12 153 348	18 761 706
	124 860 320	143 622 024
Balance at the beginning of year	143 622 024	160 785 925
Loans redeemed	(18 761 704)	(17 163 901)
	124 860 320	143 622 024

Long-term liabilities have been utilised in accordance with the MFMA.

The balance of the borrowings assumed by the municipality as part of the service concession arrangement with the WCDM is R7 874 245 (2019: R16 565 953) which are included above. The WCDM entered into loan agreements with financial institutions in the past to construct and/or upgrade some of the service concession assets. The municipality is responsible for servicing the loans.

Pledged as security

No assets were pledged as security for external borrowings.

Long term borrowings are repaid over periods varying from 10 to 15 years (2019: 10 to 15 years) and at interest rates varying from 6.75% to 13.38% (2019: 6.75% to 13.38%) per annum.

The amortised cost of the long-term liabilities was determined after considering the standard terms and conditions of agreements entered into between the municipality and the relevant financing institutions. Refer to appendix A for more information.

Current liabilities	271 061	109 062
	<u>437 481</u>	<u>229 813</u>

The term period pertaining to these leases are between two and three years. Interest rates are linked to the prime interest rate at the contract date. The lease has fixed repayments and no arrangement has been entered into for contingent rent. The municipality's obligation under the finance lease is secured by the lessor's charge over the leased asset.

20. Employee benefit obligations

Total employee benefit obligation liability

Present value

The post-retirement healthcare benefit is a defined benefit plan and consists of the fixed contribution percentage that is paid to various medical aid plans by the municipality consisting of LA Health, Key Health, Bonitas, Fed Health, Samwumed and Hosmed.

The employees of the municipality and their dependants are currently entitled to a subsidy of 70% of the medical scheme contributions after they retire or in the case of death. This percentage is reduced if an employee did not complete a required service period before retirement. Widow(er)s and orphans of in-service members are entitled to a subsidy of 60% of the contribution payable. Upon a member's death-in retirement, the surviving dependants will continue to receive the same benefits.

Proportion of eligible current non-member employees joining the scheme by retirement	15%	15%
Mortality during employment	SA85-90	SA85-90
Mortality post-retirement	PA(90) -1 with a 1% mortality improvement p.a. from 2010	PA(90) -1 with a 1% mortality improvement p.a. from 2010

Withdrawals

Age	Females	Males
20	9%	9%
25	8%	8%
30	6%	6%
35	5%	5%
40	5%	5%
45	4%	4%
50	3%	3%
55	-%	-%
55+	-%	-%

Discount rate

GRAP 25 stipulates that the choice of this rate should be derived from government bond yields consistent with the estimated term of the post-employment liabilities. However, where there is no deep market in government bonds with a sufficiently long maturity to match the estimated term of all the benefit payments, current market rates of the appropriate term should be used to discount shorter term payments, and the discount rate for longer maturities should be estimated by extrapolating current market rates along the yield curve.

Consequently, a discount rate of 10.37% (2019: 9.42%) per annum has been used. The corresponding index-linked yield at this term is 4.71% (2019: 3.38%). These rates were reduced from the yield curve obtained from the Johannesburg Stock Exchange of South Africa after the market close on the reporting date.

Family profile

It has been assumed that female spouses will be five years younger than their male counterparts. Further, it was assumed that 60% of eligible employees on a healthcare arrangement at retirement will have a spouse dependant on their medical aid. For current retiree members, actual marital status was used and the potential for remarriage was ignored.

Medical scheme option

It has been assumed that in-service members and continuation members will remain on the same medical scheme and option. In-service non-members were assumed to join Samwumed Option B, should they join a scheme by retirement and continue to receive the post-employment subsidy.

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

Withdrawals

The assumed rates of withdrawal from service are set out below:

Age	Females	Males
20	9%	9%
25	8%	8%
30	6%	6%
35	5%	5%
40	5%	5%
45	4%	4%
50	3%	3%
55+	-%	-%

Normal salary inflation rate

The assumed rate of salary inflation was set as the expected future CPI plus 1%. In addition to the normal salary inflation rate, the following promotional salary increases were assumed:

Age	Promotional increase
20-24	5%
25-29	4%
30-34	3%
35-39	2%
40-44	1%
44+	-%

LSA arrangement

It was assumed that the employer's LSA arrangements would remain and that the level of benefits in respect of such, would remain unchanged, with the exception of allowing for inflationary adjustments.

Discount rate

GRAP 25 stipulates that the choice of this rate should be derived from government bond yields consistent with the estimated term of the post-employment liabilities. However, where there is no deep market in government bonds with a sufficiently long maturity to match the estimated term of all the benefit payments, current market rates of the appropriate term should be used to discount shorter term payments, and the discount rate for longer maturities should be estimated by extrapolating current market rates along the yield curve.

Consequently, a discount rate of 7.69% (2019: 8.26%) per annum has been used. The first step in the derivation of this yield is to calculate the liability-weighted average of the yields corresponding to the actual terms until payment of long-service awards, for each employee. The 7.69% (2019: 8.26%) is then derived as the liability-weighted average of the yields derived in the first step. The corresponding liability-weighted index-linked yield is 3.89% (2019:3.00%). These rates do not reflect any adjustment for taxation. These rates were deduced from the yield curve obtained from the Bond Exchange of South Africa after the market close on the reporting date.

The liability-weighted average term of the total liability is 7.56 years.

20.5 Multi-employer plans

Retirement benefit information

The municipality makes provision for post-retirement benefits to eligible councillors and employees who belong to different pension schemes. These funds are governed by the Pension Funds Act and include both defined benefit and defined contribution schemes.

The only obligation for the municipality with respect to the retirement benefit plans is to make the specified contributions. Where councillors / employees leave the plans prior to full vesting of the contributions, the contributions payable by the municipality are reduced by the amount of forfeited contributions. The total expense recognised in the Statement of Financial Performance of R37 821 387 (2019: R34 642 799) represents contributions payable to these plans by the municipality at rates specified in the rules of the plans.

These schemes are subject to a tri-annual, bi-annual or annual actuarial valuation as set out hereunder. The amounts included are the latest available actuarial valuations for the fund.

LA Retirement Fund:

The LA Retirement Fund operates both as a defined benefit and defined contribution scheme.

Defined benefit scheme

The contribution rate of the defined benefit scheme is 27%; 9% by the members and 18% by their councils. The actuarial valuation report at 30 June 2019 disclosed an actuarial valuation amounting to R1 655 893 000 (30 June 2018: R1 776 181 000), with a net accumulated surplus of R11 167 000 (2018: R63 423 000), with a funding level of 100.7% (30 June 2018: 103.7%).

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

Defined contribution scheme

The actuarial valuation report at 30 June 2019 indicated that the defined contribution scheme of the fund is in a sound financial position, with net assets amounting to R1 960 090 000 (30 June 2018: R2 018 237 000), net investment reserve of Rnil (30 June 2018: Rnil) and with a funding level of 100% (2018: 100%).

The municipality has 6 employees (2019: 8 employees) that are members on this fund.

Consolidated Retirement Fund (Previously Cape Joint Retirement Fund):

The most recent statutory valuation performed as at 30 June 2019 revealed that the assets of the fund amounted to R26 128 000 000 (30 June 2017: R21 359 000 000), with funding levels of 124.9% and 100.3% (30 June 2017: 127.3% and 100%) for the Pensions Account and the Share Account respectively. The contribution rate paid by the members (7,50%/9%) and the municipalities (19,50%/18%) is sufficient to fund the benefits accruing from the fund in the future. The actuary certified that the structure of the assets is appropriate relative to the nature of the liabilities, given normal circumstances and that the Fund is in a sound financial condition as at the valuation date.

The municipality has 816 employees (2019: 786 employees) and 15 Councillors (2019: 15 Councillors) that are members of this fund.

Municipal Workers Retirement Fund:

The Municipal Workers Retirement Fund is a defined contribution scheme. Members contribute at a rate of not less than 7.5% of salaries, as required by the Rules. The employers contribute at a total rate of not less than 18%. From 1 July 2017, members and employers that fall under other bargaining councils or forums are not bound by the above minimum contribution rates. The statutory valuation performed as at 30 June 2017 stated that the assets of the fund amounted to R7 720 948 000 (30 June 2014: R6 574 750 000), with funding levels of 102.0% (30 June 2014: 111.7%). As a percentage of members' Fund Credits, the investment smoothing reserve has decreased from 5.6% to 4.9% over the valuation period. As a percentage of the market value of assets, it has decreased marginally from 4.6% to 4.4%. The Fund's assets are sufficient to cover the members' Fund Credits, the targeted levels of the Risk Benefits Reserve and the data and processing error reserve, and an Investment Smoothing Reserve of 4.9% of members' Fund Credits as at 30 June 2017. In addition, there is brought-forward surplus of some R152.8 million which has been allocated to former members and is awaiting payment. The Fund is therefore in a sound financial position.

The municipality has 173 employees (2019: 187 employees) that are members of this fund.

The Municipal Councillors Pension Fund:

The Municipal Councillors Pension Fund operates as a defined contribution scheme. The statutory valuation performed as at 30 June 2018 stated that the net assets of the fund amounted to R1 798 030 000 (30 June 2017: R1 480 549 000), with funding levels of 103.26% (30 June 2017: 101.31%). The contribution rate paid by the members (13,75 %) and council (15 %) is sufficient to fund the benefits accruing from the fund in the future. The Actuary certified that the Fund was in a sound financial condition as at 30 June 2018, in that the assets of the fund were sufficient to cover the accrued service liabilities including the recommended Contingency Reserves in full.

The municipality has 1 councillor (2019 : 1 councillor) that is a member of this fund.

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

South African Local Authorities Pension Fund:

The pension fund operates both as a defined benefit and defined contribution scheme.

The statutory valuation performed as at 1 July 2018 stated that the net assets of the fund amounted to R14 298 600 (30 June 2015: R13 231 200), with funding levels of 96.0% (30 June 2015: 100%). The actuary recommended that employers continue to contribute at the current rate of 19.18% of pensionable salary.

It is the actuary's opinion that:

- they are satisfied with the investment strategy of the fund;
- the nature of the assets is, in their opinion, suitable for the nature of the liabilities of the fund as defined in the rules of the fund;
- the matching of assets with the liabilities of the fund is adequate; and
- the insurance arrangements are appropriate compared to the cover provided can be regarded as financially sound at the valuation date.

National Fund for Municipal Workers:

The fund operates as a defined contribution fund and in terms of the rules of the fund category A and category C members contribute at a rate as agreed upon by the Local Authority and the member, subject to an absolute minimum contribution of 2% and 5% of their remuneration respectively. Category C-Members, appointed after 1 July 2012, who are not part of the Schedule shall make monthly contributions to the Fund equal to 7.5% of their pensionable salary.

The most recent statutory valuation performed as at 30 June 2018 stated that the net assets of the fund amounted to R15 393 671 000 (30 June 2015 : R10 050 029 000), with funding levels of 100.46% (30 June 2015: 100.42%). The actuary certified that the assets of the fund are sufficient to cover 100.46% of the members' liabilities, also that it can be expected that the funding level of a fund of this nature will fluctuate around 100%, for example due to timing differences in investment and receipt of monies, slight mismatching of assets and liabilities and processing errors.

The municipality has no members in this fund.

Current liabilities	3 107 329	8 210 558
	70 359 793	99 561 331

Reconciliation of provisions - 2020

	Opening Balance	Additions	Utilised during the year	Reduction due to re-measurement	Total
Environmental rehabilitation	99 561 331	5 043 391	(4 046 922)	(30 198 007)	70 359 793

Reconciliation of provisions - 2019

	Opening Balance	Additions	Reduction due to re-measurement	Total
Environmental rehabilitation	81 896 040	7 894 778	9 770 513	99 561 331

There are five sites under consideration, being the Vredenburg landfill, Langebaan landfill, Saldanha (Kalkrug) landfill and two landfill sites in Hopefield. A reconciliation of the environmental rehabilitation provision for these sites is provided below.

	Actual/ estimated rehabilitation start date		
Langebaan	1 March 2017	5 437 976	8 210 558
Vredenburg	1 July 2030	52 865 295	70 936 780
Hopefield (1)	1 July 2023	1 890 681	4 647 780
Hopefield (2)	1 July 2023	2 001 162	5 089 907
Kalkrug	1 July 2021	8 164 679	10 676 306
		70 359 793	99 561 331

The estimation of the liability to rehabilitate the landfill sites was performed by Delta Built Environment Consultants (Pty) Ltd. The firm is registered with the Council of Engineers. Delta Built Environment Consultants (Pty) Ltd is not connected to the municipality.

An appropriate discount rate was used to determine the present value of the future environmental rehabilitation liability.

The funds to rehabilitate these landfill sites are included in the short-term investments. The funds are ring-fenced to ensure that this liability is cash-backed. Refer to note 51.

Sundry income	627 467	1 000 978
	17 907 206	22 167 969

30. Property rates

Property rates	246 368 708	223 848 284
Less: Income forgone	(16 688 696)	(14 780 383)
	229 680 012	209 067 901

Valuations

Residential	27 332 283 460	27 249 637 190
Commercial	5 111 559 200	5 104 510 850
State	1 562 546 500	1 547 463 500
Municipal	872 723 830	866 562 830
Small holdings and farms	1 488 381 580	952 591 235
Other	343 922 811	537 435 246
	36 711 417 381	36 258 200 851

Valuations on land and buildings are performed every four years. The last general valuation came into effect on 1 July 2017. Interim valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions.

A residential rate of 0.6028 cents in the Rand (2019: 0.5676 cents in the Rand) was used to determine assessment rates on categories based on the following ratios:

Residential property	1:1
Residential business	1:1.4
Private open spaces	1:1
Residential nature reserve	1:0.3
Public service infrastructure property	1:0.0
Public benefit organisation property	1:0.25
Agricultural property	1:0.10

Rates are levied on an annual or monthly basis.

	138 565 418	146 915 430

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

Equitable Share

In order to qualify for a 100% indigent subsidy, the qualifying income for a household must be R4 600 or less per month. The income limits for seasonal workers will be calculated over a period of one year.

The second category is based on an income of R6 000 per month, such households will receive an indigent subsidy of 70% of the above-mentioned category.

All indigent subsidies are funded from the equitable share.

33. Fines

Traffic Fines	20 813 947	22 913 710
Court Traffic Fines	327 120	(300)
Pound Fees Fines	43 970	-
Library books	30 838	40 560
	21 215 875	22 953 970

Key assumptions made with the recognition of revenue on traffic fines:

Revenue from traffic fines is recognised on a net basis after adjusting the fines issued for the probability of the traffic fines being withdrawn, reduced, written off (struck off) or the offender being given a rebate when settling the traffic fine. Based on historical information, 24.28% (2019: 18.71%) of all fines issued will be withdrawn, reduced or the offender will be given a rebate when settling the traffic fine.

34. Other income

Donated assets	12 271 366	212 609
Forfeits	4 272 254	6 039 409
Donated materials and supplies	972 991	-
	17 516 611	6 252 018

Services in-kind

The municipality received services in-kind under voluntary or non-voluntary schemes which included free training, workshops and technical assistance from government departments and entities. These services in-kind have not been recognised as they were assessed not to be significant to the municipality's operations and/or basic service delivery objectives.

Property, plant and equipment - Remaining useful lives reviewed	1 383 736	8 091 841
Property, plant and equipment - Residual value reviewed	26 617	12 452
Landfill sites - Increase / (decrease) in estimated rehabilitation cost	(8 774 037)	9 770 513
Net impact on property, plant and equipment	(7 363 684)	17 874 806

Category and reason for change in accounting estimate

Traffic fines receivables - Decrease in success ratio	(2 915 132)	-
Net impact on traffic fines receivables	(2 915 132)	-

During the year under review the municipality assessed the conditions of property, plant and equipment. The estimation of rehabilitation cost for the landfill sites, the remaining useful lives of other assets as well as reviewed residual lives resulted in additional depreciation. The change in accounting estimate led to a net decrease on property, plant and equipment to the amount of R-7 363 684 (2019: R17 874 806). Refer to note 10. The estimation of rehabilitation cost for the landfill sites resulted in the provision being decreased by R30 198 007 which resulted in R8 774 037 decreased assets and the remaining R21 423 970 was allocated directly to surplus and deficit.

Furthermore, the traffic fines being withdrawn and reduced increased from the previous year to 24.28% thus the estimated average success ratio for traffic fines also decreased to 75.72%. The average non-payment ratio of traffic fines increased from 69.7% in 2019 to 72.3% in the current year.

-----------------	------	------

Errors

The following prior period errors adjustments occurred:

Error 1

During an assessment of the housing arrangements, it was identified that inventory on arrangements for which the municipality is the developer were incorrectly being accounted for. Expenditure on top structures which were not handed over at year-end was derecognised as inventory.

Error 2

The vat implications on the re-imbursement received from the WCDM was previously incorrectly accounted for.

Error 3

The average non-payment ratio was incorrectly applied when calculating the impairment movement.

Error 4

The operating lease asset was incorrectly calculated during the 2018/19 financial year.

Error 5

An invoice relating to the 2018/19 financial year was not accrued for and subsequently paid during the 2019/20 financial year.

Error 6

Expenditure on graveboxes were incorrectly capitalised while the expenditure is operational in nature. Depreciation on grave boxes previously capitalised has been reversed.

Error 7

An invoice relating to the 2018/19 financial year was incorrectly accrued for when the payment was made directly from the Section 12 bank account.

Error 8

During an assessment of the housing arrangements, it was identified that contract revenue and revenue received in advance, for arrangements for which the municipality is the developer, were incorrectly accounted for. These transactions have subsequently been accounted for in accordance with GRAP 11.

Error 9

Contract revenue was incorrectly recognised for land that was not transferred at year-end.

Error 10

It was identified that buildings that had been demolished during the 2017/18 financial year was not derecognised. The depreciation and derecognition has been subsequently corrected.

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

Error 11

The cashflow implications for the following items were previously incorrectly accounted for:

- opening balance of contract revenue received in advance; and
- expenditure on top structures where the municipality is appointed as accounts administrators.

Error 12

The cashflow implications for the following items were previously incorrectly accounted for:

- net movement in capital acquisitions accrued for; and
- capital assets acquired through finance leases.

Error 13

The cashflow implications of proceeds on the sale of intangible assets was previously incorrectly accounted for.

Reclassifications

The following reclassifications adjustment occurred:

Reclassification 1

West Coast District Municipality creditor has been reclassified to debtors as both relates to bulk water purchased.

Reclassification 2

Capital expenditure for signage was reclassified from Community assets to Infrastructure assets as it related to solid waste infrastructure.

50. Utilisation of Long-term liabilities reconciliation

Unspent borrowings at the beginning of the year	4 269 888	14 970 076
Utilised during the year to finance property, plant and equipment	(1 938 345)	(10 700 188)

Payments made in the previous financial years where section 67(1)(a) of the MSA was not adhered to and identified in the current financial year	-	6 959 912
Less: Amounts written-off by Council		
Payments made in the previous financial years where section 116(3) of the MFMA was not adhered to	(2 231 506)	-
Payments made where section 67(1)(a) of the MSA was not adhered to	(9 434 212)	-
Payments made not following the due SCM process	-	(7 748 275)
Payments made where CIDB regulation 25(7A) was not adhered to	(445 856)	(45 902 858)
Expenditure incurred prior to ratification of minor breach of the procurement process	-	(629 225)
Closing balance	-	10 934 172

Payments made contrary to regulation 25(7A) of the CIDB:

During the audit of the 2017/18 financial year another award was made where the municipality did not adhere to regulation 25(7A) of the CIDB. No expenditure was however incurred during the 2017/18 financial year. During the 2018/19 financial year expenditure amounting to R1 491 303 was incurred relating to the award.

During the 2019/20 financial year expenditure amounting to R445 856 was incurred relating to the award. As a result of lockdown the project could not be finalised in the current year.

Payments made not following the due SCM process:

During the audit for the 2017/18 financial year irregular expenditure amounting to R105 893 was identified. The municipality cancelled contracts with service providers that were unable to perform and awarded the contracts for the outstanding works to the service providers that scored the second highest points during the competitive bidding process. This was found to be not in line with the requirements of SCM regulation 19(a). In the 2018/19 financial year expenditure amounting to R7 739 175 was incurred relating to the awards made.

During the 2018/19 financial year irregular expenditure amounting to R9 100 was identified where due SCM processes i.t.o. SCM regulation 17 was not followed prior to incurring the expenditure.

Ratification of minor breach of the procurement process:

During the 2018/19 financial year irregular expenditure amounting to R629 225 was identified. Expenditure was incurred before minor breach identified was ratified by the Accounting Officer through a Ratification of minor breach of the procurement process i.t.o. SCM regulation 36(1)(b) and SCM policy adopted by Council.

Payments made where section 116(3) of the MFMA was not followed:

During the year-end process for the 2018/19 financial year irregular expenditure amounting to R2 216 502 was identified. The contract of the consultant responsible for professional engineering services for the Development of the Langebaan Waste Facility was not amended in terms of section 116(3) of the MFMA.

During the 2019/20 financial year irregular expenditure amounting to R15 004 was identified. The contract for the network printers was not extended in terms of section 116(3) of the MFMA. Services was delivered and had to be paid by the municipality resulting in the irregular expenditure.

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

Payments made where section 67(1)(a) of the MSA was not followed:

An amount of R8 717 670 was disclosed as irregular expenditure in the previous financial year for the expenditure incurred between the 2010/11 financial year and the 2018/19 financial year.

During the 2019/20 financial year, a further amount of R716 542 was recognized as irregular until 30 November 2019 when the employment contracts were terminated.

The total amount of R9 434 212 was considered and written-off by Council on 15 June 2020.

53. Fruitless and wasteful expenditure

Balance at the beginning of the year	805 444	2 744
Interest and penalties accrued on late payments	252	35 454
Incorrect salary payment	17 498	1 760
Cancellation of tenders	12 345	25 833
Cost incurred without receiving any services	-	41 995
Extension of time claim	-	805 444
Less: Amounts recovered by Council	-	-
Incorrect salary payment	(17 498)	(2 744)
Interest on overdue accounts	(252)	(35 454)
Cost incurred without receiving any services	-	(41 995)
Less: Amounts written-off by Council	-	-
Incorrect salary payment	-	(1 760)
Extension of time claim	(805 444)	-
Cancellation of Tenders	(12 345)	(25 833)
Closing balance	-	805 444

Interest and penalties accrued on late payments

During the 2018/19 financial year fruitless and wasteful expenditure amounting to R35 454 was identified and recovered by the municipality.

During the 2019/20 financial year fruitless and wasteful expenditure amounting to R252 was identified and recovered by the municipality. The expenditure incurred relates to late payments of accounts on which interest was levied.

Incorrect salary payments

During the 2017/18 financial year, incorrect salary payments of R14 166 were made to five employees. An amount of R3 262 was recovered from one employee, R8 160 was written off by Council in terms of section 32(2) of the MFMA and R2 745 was recovered from the responsible Manager in the 2018/19 financial year. During the 2018/19 financial year, incorrect salary payments of R1 760 was made to an employee who resigned with immediate effect after payment was received by the 25th of the month.

During the 2019/20 financial year an employee resigned and the full amount of the bursary could not be recovered timeously from her salary in November. The amount of R17 498 was paid back by the former employee to the municipality after resignation.

Cancellation of tenders

During the 2018/19 financial year two tenders were advertised by the municipality and had to be cancelled. The first tender was cancelled due to section 13(1)(d) of the Preferential Procurement Policy Framework Act, 2000: Preferential Procurement Regulations, 2017 not being adhered to when Health and Safety agreement contained an human error. The second tender was cancelled due to extension of validity period not being requested for all tenderers.

During the 2019/20 financial year one tender advertised, had to be cancelled. Section 31 of the Firearm and Ammunition Act 60 of 2000 was not included in the tender specifications resulting in the tender having to be cancelled. The expenditure incurred relating to adverts placed in the newspapers meet the definition of fruitless and wasteful expenditure.

Saldanha Bay Municipality

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
Cost incurred without receiving any services		
During the 2018/19 financial year fruitless and wasteful expenditure amounting to R41 995 was identified and subsequently recovered by the municipality. A payment for services delivered was made to a supplier whom submitted two invoices for work already completed.		
Extension of time claim		
During the 2018/19 financial year the municipality received an extension of time claim amounting to R805 444 from a contractor responsible for the civil works to be performed on phase two of the borehole drilling. The claim was received in light of the municipality not timeously applying for the construction works permit which resulted in the contract being extended by 18 working days until 31 January 2019.

-----------------	------	------

55. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

These circumstances are typically for emergency procurement, procurement where goods or services are available from only one supplier and procurement where it is impractical or impossible to follow the official procedures.

Regulation 36(1)(b) further allows the accounting officer to ratify any minor breaches of the procurement processes which are purely of a technical nature.

Deviations for the year

Emergencies	6 823 397	7 326 746
Sole provider	912 497	4 723 501
Impractical or impossible to follow the SCM process	11 759 003	17 248 320
Ad-hoc repairs	753 932	1 440 568
Strip and quote	10 491 532	10 111 893
Minor breaches of the procurement process	-	6 056
	30 740 361	40 857 084

The details of the deviations for the year under review amounting to R30 740 361 (2019: R40 857 084) is included as Annexure E.

During the year under review six minor breaches were made to Aecom, Motla Consulting Engineers, BSP Consulting Engineers, ETL Consulting Engineers (Pty) Ltd and OWS and EAS Joint Venture respectively. The municipality did follow due process in terms of the MFMA and SCM Regulations. Minor breaches were performed to ensure that due processes were followed and enable the municipality to complete processes prescribed in the MFMA and SCM Regulations. No expenditure was incurred before the ratification of the breaches.

During the previous year under review two minor breaches were made to Siyakhula Property Valuers and WEC Consulting Engineers respectively. The municipality did not timeously follow a process to extend the existing contracts with the suppliers in terms of the MFMA and SCM regulations. A minor breach was performed to correct this and enable the municipality to begin with a process to extend the contracts.

56. Commitments

Authorised capital expenditure

Already contracted for but not provided for

Infrastructure assets	67 323 074	23 092 866
Other assets	455 000	210 483
Community assets	7 368 752	1 655 512

Barry John Bickerdyke Stephan: Case no.15307/16

An application for the reviewing and setting aside of a Town Planning resolution, of the Portfolio and Appeals Committee of Council for and an application for departure in respect of Farm 116 and Farm Fishing Lease no 117 in the Saldanha Bay Municipality Division Malmesbury. Judgement was delivered and the municipality has initiated the appeal process. The estimated liability towards Council is estimated at R550 000 (2019: R400 00).

Vredenburg Urban Renewal Project

The municipality obtained a conditional grant from the Department of Transport and Public Works for the acquisition of 7 properties, 32 hectares of land, to be used for the Vredenburg Urban Renewal Project. The conditions of the grant indicated that the municipality shall transfer to the Department the serviced sites, 4,3145 hectares of the purchased properties, for development by the department. An unspent conditional grant liability has been recognised for the cost associated with servicing the sites. The re-zoning of the 7 properties acquired are currently in process, the 4,3145 hectares portion to be transferred to the department was estimated based on historic cost. There is uncertainty about the amount of the obligation the municipality has under this agreement and the timing of the outflow of the economic benefits and/or service potential is also uncertain. The liability for Council relating to the transfer of the 4,3145 hectare portion is estimated at R9 092 190 (2019: R3 853 171).

West Coast Miracles (PTY) LTD/V Kearns and 35 Others of SBM, Case no: 13790/18

Application for the eviction of the occupants from Erven 35 and 40, St Helena Bay. Judgement was delivered and the municipality has initiated the appeal process. The estimated liability towards Council is estimated at R200 000 (2019: R350 000).

Van Pletzen & 5 Others/ Stephan & SBM & Minister of Local Government, Case no: 18342/18

Application for the reviewing and setting aside the approval of building plans in respect of Farm 116 and Farm Fishing Lease no 117 in the Saldanha Bay Municipality, division Malmesbury. Judgement was delivered and the municipality has initiated the appeal process. The estimated liability towards Council is estimated at R200 000 (2019: R100 000).

Trustees of Carlou Trust & 34 Others/SBM

Application declaring liability to install services infrastructures and provide bulk municipal services to Erven 22, 23 and 24 St Helena Bay. The estimated liability towards Council is estimated at R350 000 (2019: R300 000).

Cancom Canfleet (Pty) Ltd & 9 Others/ SBM & TMT Services and Supplies & 14 Others: Case no: 21394/19

Application for declaring section 73 of the National Road Traffic Regulations unconstitutional and interdict the use of the presumption imposed by section 73 of the act. The estimated liability towards Council is estimated at R350 000

Contingent assets

Lateral Unison - Pending insurance claims	2 475 947	2 793 554
---	-----------	-----------

Outstanding insurance claims

The municipality had 36 outstanding insurance claims with Lateral Unison as at 30 June 2020 (2019: 22) of which the payout of, according to the municipality's assessment, is only probable and not virtually certain. The settlement of the claims is estimated to be R2 475 947 (2019: R2 793 554).

58. Events after the reporting date

Adjusting event

In terms of the service concession agreement, the local municipalities determine a tariff, in consultation with the WCDM, that allows the WCDM to recover the costs the WCDM incurs in the provision of the bulk water services. The local municipalities also pay the WCDM an administrative fee of 8% of the operational costs which is also included in the tariff above. The calculation of the 2019/20 surplus/deficit and its split between the local municipalities was finalised and agreed on 31 July 2020 and is regarded as an adjusting event after the reporting date. The Statement of Financial Position and Statement of Financial Performance have been adjusted to include the surplus amounting to R24 901 198.

-----------------	------	------

60. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks such as market risk, credit risk and liquidity risk.

The municipality's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance.

Liquidity risk

Liquidity risk is the risk that the municipality might not be able to meet its obligations as they fall due. The municipality has a prudent liquidity risk management strategy which ensure that it maintains sufficient cash and cash equivalents to meet its objective as they fall due. The short-term investments are invested over terms that ensure that the municipality has a short-term maturing every month to reduce the liquidity risk. The municipality also manages liquidity risk through an ongoing review of future commitments and credit facilities.

The average collection rate of receivables is 95.2% (2019: 95.6%). Cash flow forecast are prepared and adequate utilised borrowings facilities are monitored.

2020	Up to 1 year	1 to 5 years	More than 5 years	Total

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

Credit risk

Credit risk is the risk of financial loss to the municipality if customers or counter parties to the financial instrument fail to meet their contractual obligation, and arises mainly from the municipality's investments, receivables from exchange and non-exchange transactions, non-current receivables and cash and cash equivalents.

Receivables from exchange transactions

Receivables from exchange transactions are amounts owing by customers, and are presented net of impairment losses. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. The impact of the COVID-19 pandemic on the economy and consumers will affected the impairment provision for the current year. The provision estimates were adjusted to account for this increase in risk of missed payments or default. Individual risk limits are set based on internal or external ratings in accordance with limits set by the Council. The utilisation of credit limits is regularly monitored.

Cash and cash equivalents and Investments

The municipality limits its exposure to credit risk by investing with only the major commercial banks in South Africa that have a sound credit rating and within the specific guidelines set in the council approved cash management and investment policy. Accordingly, the municipality does not consider its exposure to credit risk significant.

Non-current receivables

The non-current receivables have been fully impaired and provided for thus do not expose the municipality to credit risk.

The carrying amount of the financial assets represents the maximum credit exposure and the carrying amount of the financial assets as at 30 June was as follow:

Cash and cash equivalents	185 332 917	95 912 380
Investments	478 054 095	504 330 175
Receivables from exchange transactions	125 670 792	119 998 103

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

Market risks

Interest rate risk

The municipality has interest-bearing assets however, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

The municipality's interest rate risk arises from long-term borrowings, receivables from exchange transactions, cash in current banking institutions and investments. Financial instrument at variable rates expose the municipality to cash flow interest rate risk. Financial instrument at fixed rates expose the municipality to fair value interest rate risk, the COVID-19 pandemic contributed to the 2% decrease in the average interest rate.

At 30 June 2020, if the weighted average interest rate on financial instruments had been 1% higher/lower with all other variables held constant, surplus for the year would have been R 6 633 560 (2019: R 5 766 186) lower/higher, mainly as a result of higher/lower interest income on financial instrument at variable rates.

Cash flow interest rate risk

Financial instrument	Weighted average interest rate	Due in less than a year	Due in one to two years	Due in two to three years	Due in three to four years	Due after five years
Trade and other receivables - normal credit terms	8.62 %	125 670 79	-	-	-	-
Cash in current banking institutions	3.80 %	185 332 917	-	-	-	-
Investments	7.81 %	478 054 095	-	-	-	-

Fair value interest rate risk

Financial instrument	Weighted average interest rate	Due in less than a year	Due in one to two years	Due in two to three years	Due in three to four years	Due after five years
Borrowings	10.73 %	(12 153 347)	(50 576 396)	-	-	(62 130 575)

Foreign exchange risk

The municipality currently procures Microsoft Licences of which the purchase price is denominated in foreign currency (US Dollars) which exposes the municipality to foreign-currency risk. The municipality does not hedge foreign exchange fluctuations. The movement in the currency was not material to the municipality procurement and, consequently, is not elaborated on any further.

61. Budget differences

Material differences between budget and actual amounts

The reasons for the material variances between the approved budget and the final budget are explained below. A variance is considered material if it is 10% or more and if the amount exceeds R5 million.

The adjustments made between the approved budget and the final budget include virements that were made after the approval of the final adjustment budget on 15 June 2020. Virements are transfers from one operating cost element or capital project to another, and are made in accordance with the virement policy.

Presented below are those items contained in the statement of financial position, statement of financial performance and cash flow statement that have been assessed to have material variances:

Expenditure			
Impairment of assets	20 572 009	74	Less debtors were impaired than anticipated when the budget was prepared.
Finance costs	(7 728 605)	(34)	Interest on post-retirement medical aid benefits for employees amounting to R10 026 786 is budgeted under employee-related cost. If budgeted under finance cost, the variance is only 8%.
Contracted services	25 758 811	23	Less funds were spent on training, consultants, professional fees and repairs and maintenance of municipal assets than budgeted for due to COVID-19 pandemic.
General expenses	19 832 948	19	Actual expenditure on general expenditure is lower than budgeted due to lower levels of expending incurred as a result of the COVID-19 pandemic.
Actuarial gains	16 431 746	100	Unable to anticipate gains as it is based on an expert valuation performed annually. Gain could not be anticipated.
Gain on reversal of provision	21 423 970	100	Unable to anticipate gains as it is based on an expert valuation performed annually. Gain could not be anticipated.
Loss on disposal of assets and liabilities	(7 794 658)	(100)	Losses could not have been anticipated during budget preparation.

Saldanha Bay Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

61.2 Statement of Financial Position

	Variance	%	Reasons
Current assets			
Cash and cash equivalents	87 530 571	89	Lower capital expenditure resulted in more cash available than budgeted.
Inventories	(6 821 671)	(29)	Less inventories were held at year-end than anticipated when budgeting as a result of low-cost housing incorrectly accounted for previously. Refer to note 49.
Investments	132 414 100	38	Lower capital expenditure resulted in more cash available to invest than budgeted.
Receivables from exchange transactions	20 882 406	20	A Service concession surplus amounting to R24.9 million was recognised from the WCDM. This could not have been anticipated when budgeting.
Current liabilities			
Vat payable	12 667 640	433	VAT payable at year-end was more than what was anticipated when budgeted.
Unspent conditional grants and receipts	17 639 938	66	Less conditions met in respect of National and Provincial grants received than what was anticipated when budgeted.
Borrowings	(6 608 357)	(35)	Budget is the forecast as at June 2019 of the payments to be made within the next 12 months, while the actuals represents the payments to be made within the next 12 months as at June 2020.
Employee benefit obligation	8 774 014	27	The liability at year-end more than anticipated when budgeted.
Provisions	(5 103 229)	(62)	The decrease in the value of the provision for rehabilitation of landfill sites at year-end was not anticipated when budgeted.
Non-current liabilities			
Employee benefit obligation	(17 299 099)	(14)	The decrease in the liability at year-end was not anticipated when budgeted.
Provisions	(30 988 309)	(32)	The decrease in the value of the provision for rehabilitation of landfill sites at year-end was not anticipated when budgeted.

61.3 Cash Flow Statement

	Variance	%	Reasons
Cash flows from operating activities			
Interest income	5 174 474	11	More interest on investments realised as more funds were available for investment due to the lower capital expenditure than budgeted.
Other receipts	9 742 012	31	More capital contributions were received than budgeted for. The budgeted amount for construction contracts is allocated under Grants, whereas the actual is included as part of Other receipts.
Suppliers and other	75 557 949	14	Payments to suppliers were less than budgeted due to the COVID-19 pandemic.
Cash flows from investing activities			
Purchase of property, plant and equipment	144 661 954	50	Net cashflow is due to capital expenditure accrued for at year end and the underspending of the capital budget. Refer to note 61.4 for the reasons for the underspending of the capital budget.
Purchases of intangible assets	8 059 309	74	Variance is due to capital expenditure accrued for at year end.
Net movement in investments	(138 690 179)	(87)	Less investment funding was needed to fund the capital spending, as capital expenditure was lower than anticipated when budgeting.

Economic Development and Strategic Services	18 588 413	4 899 888	13 688 525	26	6 084 383
Financial Services	972 930	726 608	246 322	75	-
Council	80 000	426	79 574	1	-
	299 871 949	185 631 883	114 240 066	62	65 623 577

Where the unspent balance of a project is more than R2 million, the reasons thereof are provided below:

Project	Unspent amount	Reasons
Infrastructure & Planning Services		
Development of new Landfill site Langebaan	9 174 771	The project experienced delays due to the national Covid 19 pandemic and lockdown regulations. The contractor is back on site and the unspent funds will be rolled over to the next financial year to complete the project.
Paternoster Water Pipeline	7 295 428	This is a multi-year project. The construction process was delayed due to the national Covid 19 pandemic and the lockdown regulations. Construction activities have resumed. The unspent fund will be rolled over to the next financial year to complete the project.
Paternoster Water Reservoir 3 MI	5 921 331	This is a multi-year project. The construction process was delayed due to the national Covid 19 pandemic and the lockdown regulations. Construction activities have resumed. The unspent fund will be rolled over to the next financial year to complete the project.
Meeuwklip Reservoir	5 670 548	This is a multi-year project. The construction process was delayed due to the national Covid 19 pandemic and the lockdown regulations. Construction activities have resumed. The unspent fund will be rolled over to the next financial year to complete the project.
Construction of Perron street from Station road to Kooitjieskloof	4 757 000	Grant funding for this project became available through the January 2020 adjustment budget. A consulting engineer has been appointed for the planning, design and construction monitoring. The progress was delayed due to national Covid 19 pandemic and the lockdown regulations. Unspent funds will be rolled over to the next financial year to complete the project.

Notes to the Annual Financial Statements

Figures in Rand 2020 2019

Project	Unspent amount	Reasons
Tsitsiratsitsi Toilet Facilities	4 128 304	Procurement has taken place and manufacturing of the units are in process. The service provider could not finalise and deliver all the toilet facilities by 30 June 2020 due to the national Covid 19 pandemic and the lockdown regulations. A grant roll-over application has been submitted to the Western Cape Provincial Government on 13 July 2020 to roll over unspent funds to the next financial year.
Upgrade Langebaan Sewerage Works	2 737 558	This is a multi-year project. The construction process was delayed due to the national Covid 19 pandemic and the lockdown regulations. Construction activities have resumed. The unspent funds will be rolled over to the next financial year to complete the project.
Laingville Upgrade Sludge Treatment Phase 4	3 095 543	This is a multi- year project. The tender was scheduled for completion by 30 June 2020. The construction process was delayed due to the Covid 19 national lockdown regulations. All construction activities had to be stopped as a result of the lockdown. Construction activities have again resumed and the work is progressing. Unspent funds will be rolled over to the next financial year to complete the project.
Vredenburg: Landfil Site Extension	3 712 989	The remaining amount represents the VAT portion of the grant.
Renewal of Diazville Civic Centre	2 812 315	The Service Provider was on track to complete the project before 30 June 2020. The completion of the project was delayed due to national Covid-19 pandemic and lockdown regulations. The project will be completed early in the next financial year and unspent funds must be rolled over.
Upgrade Vredenburg Sewerage Works	2 782 251	The work was for the installation of a new fence at the Waste Water plant. The initial tender was advertised and awarded. The item for pallisade,clear view fencing had to be re-advertised. The tender is now at Bid Adjudication Committee for award. The tendering process was delayed due to the Covid 19 pandemic and lockdown regulations. Unspent funds will be rolled over to the next financial year for the project to be completed.
Langebaan Road Aquafer Well Field	2 027 983	Grant funding to the value of R1.5 million was received during June 2020. Additional own funds was therefore available and resulted in a saving which will be transferred back to the municipal own reserves.
	<u>54 116 021</u>	

Economic Development and Strategic Services

Laptop Replacement	3 084 383	These items was procured on Tender 12-19-20 but items could not be delivered on time due do to the national lockdown regulations. A limited bid was also issued due to bidders indicating that they could no longer deliver on bid 12-19-20 as a result of escalation. Unspent funds will be rolled over to the next financial year.
Middelpos Box Park	3 000 000	Bids for this project closed during the national lockdown. Delays with the appointment of a contractor were experienced due to this. An application was made to roll over the unspent funds to the next financial year.
	<u>6 084 383</u>

Project	Unspent amount	Reasons
Community and Operational Services		
Develop New Sport Grounds: Langebaan Sport Ground	5 423 173	This is a multi phase project for which funding is spread over multi-years. The project allocation for the 2019/20 financial year was inadequate to implement and execute the entire project. The management of the Department of Sport and Municipal Manager had to secure the shortfall needed for the project to continue to construction stage. Such process took longer than anticipated and impacted or delayed implementation of the project. The project is currently at tender stage and will be advertised for construction soon. The Covid-19 pandemic also impacted on the timeous execution of the project. Unspent funds will be rolled over to the next financial year.
	<u>5 423 173</u>	

62. BBBEE Performance

Information on compliance with the B-BBEE Act is included in the annual report under the section titled B-BBEE Compliance Performance Information.

63. Material losses

Water losses	<u>12 573 753</u>	<u>12 524 994</u>
---------------------	-------------------	-------------------

The kilolitres purchased was 10 459 784 (2019: 10 387 631) while the kilolitres sold was 8 963 447 (2019: 8 930 139). This resulted in losses recorded at 14.31% (2019: 14.07%). These losses are predominantly due to metering inefficiencies, unmetered connections, aging pipeline infrastructure, burst pipes, old reticulation networks and other leakages which are by nature regarded as normal production losses.

Electricity losses	<u>39 658 788</u>	<u>34 713 557</u>
---------------------------	-------------------	-------------------

The kilowatts purchased was 230 467 445 (2019: 238 368 962) while the kilowatts sold amounted to 201 151 347 (2019: 208 962 143). This resulted in losses recorded at 12.72% (2019: 12.34%). These losses are the result of technical losses caused by the nature of electricity and the manner of its distribution, via the network, status / condition and age of the network, weather conditions and load on the system as well as non technical losses, e.g. theft and vandalism.

CAS 257/10/2019 Allegation of Fraud

An internal investigation lead to the identification of alleged fraudulent activities committed by an employee of the municipality by utilising already processed pre-paid airtime memorandums to prepare cash cheques. The alleged fraudulent transaction was confirmed in September 2019 and reported to SAPS during October 2019 in accordance with section 32 of the MFMA for criminal investigation. The municipality's internal investigation identified several possible fraudulent payments resulting in the appointment of an external investigator. The external investigation was concluded on 05 October 2020, the report concluded that the suspected loss suffered by the municipality is R2 139 540.

CAS 87/5/2020 Allegation of Theft

An internal investigation lead to the identification of alleged theft committed by an employee of the municipality. It was identified that goods confiscated during the National lockdown, were stolen. The alleged theft was confirmed in April 2020 and reported to SAPS during May 2020 in accordance with section 32 of the MFMA for criminal investigation. At the date when the Annual Financial Statements were ready for issue the investigation was still ongoing, the municipality suffered a loss of R187 465 due to the alleged theft.

31646	2019/12/13	R 9 700	Tra-Col Solutions	Straight fix couplers for emergency repair on the 375mm Oliphantskop steel supply water pipeline	Permission is granted for Deviation in terms of clause 36 (1)(a)(i) of the Municipal Supply Chain Management Policy
31034	2019/11/25	R 8 200	Tra-Col Solutions	Repair robot submersible pump at Strandloper Pump Station	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
32196	2020/01/09	R 318 467	Transtech	Attend to blade and slide assy's and repair defects. Fault finding. (CFG 9375) R71 Driver: John	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
28954	2019/09/25	R 111 717	Transtech	Strip and assemble fan cowlings, new front mounting. Fault finding. (CFG 1185) S20 Driver: JM Snyders	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
28731	2019/09/17	R 80 918	Transtech	Defective slide blade (ejector panel) and compactor blades. Fault finding and repair chevron plate, bearing, blade and beam Driver: CFG 33020 (R67) Isuzu	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
34883	2020/05/14	R 44 637	Transtech	Attend to defective hydraulic pump, no pressure and electrical cooling. Fault finding and repair lights and pressure hose. (CFG 23683) Driver: Bobba	Permission is granted for Deviation in terms of clause 36 (1)(a)(i) of the Municipal Supply Chain Management Policy
27059	2019/07/26	R 38 686	Transtech	Attend to defective blade cylinder and repair. (CFG 3700) (R6) Nissan Driver: George	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
32630	2020/01/23	R 36 781	Transtech	Attend to defective lifter system. Repair no pressure on lifter system. (CFG 37415) R91	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy

<u>Order number</u>	<u>Date Order Issued</u>	<u>Value of Deviation</u>	<u>Awarded to:</u>	<u>Description</u>	<u>Deviation is in terms of:</u>
32022	2020/01/02	R 32 347	Transtech	Attend to blade and slide. (CFG 3700) R6 Driver: George	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
28953	2019/09/25	R 30 107	Transtech	Defective compactor blade cylinder leaking hydraulic oil. Fault finding and repair, cylinder, tailgate, switch Driver: CFG 30686 (R73) M/Benz	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
32201	2020/01/09	R 29 299	Transtech	Attend to slow tail gate on operation service vehicle. (CFG 2142) R47	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
28325	2019/09/05	R 18 894	Transtech	Attend to defective lifter system not working properly. Fault finding and repair lifter, frame and tail gate cylinder. (CFG 22616) (R77) M/Benz	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
32110	2020/01/07	R 7 409	Transtech	Attend to defective lifter system. Install 2 new clever pins for levers. (CFG 17855) (R14) Nissan. Driver: Leonard	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
35112	2020/05/27	R 7 070	Transtech	Attend to defective slides on blades and hopper top side and repair pivot pins. (CFG 2142) (R47) Nissan Driver: Bobba	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
31091	2019/11/26	R 6 682	Transtech	Attend to defective ejector panel. (CFG 3313) R62 Driver: John Talmakkies	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
33552	2020/02/25	R 4 691	Transtech	Attend to PTO. (CFG 17855) R14 Driver: Leonard	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
34199	2020/03/17	R 4 541	Transtech	Attend to defective operating system in hydraulic system. (CFG 37415) R91	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
30212	2019/11/01	R 4 526	Transtech	Attend to defective faulty revs. (CFG 3700) R6	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
30016	2019/10/25	R 4 359	Transtech	Install 2 x rear hoses (blue) and 64mm lay flat hose. (CFG 1185) S20. Driver: JM Snyders	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
27404	2019/08/06	R 4 029	Transtech	Attend to defective lifter. Fit lifter micro switches. (CFG 17855) (R14) Driver: Leonard	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
34198	2020/03/17	R 2 714	Transtech	Attend to defective ejector panel sticky and not moving. Fault finding and fit new ejector panel. (CFG 3313) R62 Driver: Loyiso	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
32311	2020/01/15	R 2 590	Transtech	Attend to defective hydraulic. Fault finding and repair light rotating beacon amber and wear nylon. (CFG 3700) R6	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
27649	2019/08/15	R 2 400	Transtech	Attend to defective pin on side of compactor. (CFG 33899) (R41) Isuzu	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
30706	2019/11/18	R 7 741	Travel Manor	DCOG: Benchmarking - Remuneration and Conditional Services Senior Management Study (18 - 19 November 2019) (Flights)	Permission is granted for Deviation in terms of clause 36 (1)(a)(v) of the Municipal Supply Chain Management Policy
28669	2019/09/16	R 37 013	Tricom Africa	Emergency repairs of a 15KW at Laingville WWTW in St. Helena Bay	Permission is granted for Deviation in terms of clause 36 (1)(a)(i) of the Municipal Supply Chain Management Policy
31005	2019/11/25	R 10 663	Tricom Africa	Modifications at Kaktus Pump Station - Langebaan	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
27114	2019/07/26	R 126 238	Truck Marine Centre	Attend to noise in engine. Fault finding and repair radiator, Driver: Valpie CFG 23381 (S2) Toyota	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
33772	2020/03/02	R 94 342	Truck Marine Centre	Hard start faulty, defective ground cylinder seized, defective hydraulics, fault finding. (CFG 22199) S29	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
33686	2020/02/27	R 79 203	Truck Marine Centre	Attend to pressure in water system, non start. Fault finding. R64) Driver: Piet Blouw	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
30606	2019/11/13	R 72 516	Truck Marine Centre	Attend to defective loose rear axle. Fault finding, repair bearings, washers, O'rings and rear diff. (CR 2759) (S88) Loader Driver: Pypies	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
32231	2020/01/10	R 70 708	Truck Marine Centre	Attend to engine cut out. Test radiator and fit new injector. (CFG 21796) S85 Driver: Vernie	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
33653	2020/02/26	R 50 044	Truck Marine Centre	Attend to defective clutch and brake system. (CFG 11573) R2 Driver: David	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
30730	2019/11/18	R 44 208	Truck Marine Centre	Attend to non start. Fault finding, repair injector pump, fuel tank and fuel hoses. CFG 22077 (R40) Nissan Driver: Raymond	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
34407	2020/03/24	R 42 449	Truck Marine Centre	Attend to defective fuel leak on fuel system. (CFG 9552) S151	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
27203	2019/07/30	R 38 301	Truck Marine Centre	Attend to defective clutch. Fault finding and repair gearbox. CFG 29976 (S156) Ford Driver: Neil	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
28138	2019/09/02	R 36 385	Truck Marine Centre	Attend to fuel starvation. Fault finding, repair fuel hose, fuel tank and injectors. (R64) Landfill Compactor	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
30935	2019/11/22	R 35 702	Truck Marine Centre	Attend to defective front suspension. Fault finding, remove, fit new tierods and wheel stud. (CFG 3313) Driver: Eric	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
31205	2019/11/27	R 32 704	Truck Marine Centre	Service on 16713km. Fault finding, repair wheel cylinders, brake shoes and window handle. CFG 6095 (S80) Nissan Driver: Edwardo	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
34408	2020/03/24	R 31 430	Truck Marine Centre	Service and COFrepairs. Check brake linings, wheel bearing and suspension, (CFG 9375) R71 Driver: Bobba	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
30605	2019/11/13	R 30 881	Truck Marine Centre	Attend to defective brakes. Fault finding. Fit new rear inner hub seals, adjust all brakes and handbrake. CFG 28651 (S21) Nissan.	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
30347	2019/11/05	R 30 332	Truck Marine Centre	Attend to defective front suspension and diff, greasennipple couplings. Fault finding. (CFG 22199) S29	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
32232	2020/01/10	R 30 050	Truck Marine Centre	Attend to hard starting. Fault finding, test and calibrate fuel pumps. (CFG 16731) S46 Driver: Tino Bailey	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
28728	2019/09/17	R 29 624	Truck Marine Centre	Attend to noise in gearbox. CFG 31227 (T9) Ford Driver: Garrit	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
31902	2019/12/30	R 29 362	Truck Marine Centre	Attend to defective hydraulics. (R64) Bomag Compactor	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
33649	2020/02/26	R 28 419	Truck Marine Centre	Service. Replace engine oil, degreaser and injector cure. Fault finding (CFG 13340) R88 Driver: Vusumu	Permission is granted for Deviation in terms of clause 36 (1)(a)(vii) of the Municipal Supply Chain Management Policy
