Articles 52 and 69 of the Law; Article 51 of the Royal Decree of 18.04.2017

The mandatory and optional exclusion grounds are given in attachment to these Tender Specifications.

By submitting this tender, the tenderer certifies that he is not in any of the cases of exclusion listed in the Articles 67 to 70 of the Law of 17 June 2016 and the Articles 61 to 64 of the Royal Decree of 18 April 2017.

The contracting authority will verify the exactitude of this Declaration on honour for the tenderer with the best tender.

For that purpose, the contracting authority will ask the tenderer concerned to provide information or documents allowing the contracting authority to verify the tenderer's personal situation by the fastest means and within the term set by the contracting authority.

Art. 83 of the Royal Decree Award

3.4.7.2 Selection criteria

Article 71 of the Law and Articles 65 to 74 of the Royal Decree of 18.04.2017

Moreover, by means of the documents requested in **the ‘Selection file’**, the tenderer must prove that he is sufficiently capable, from an economic and financial as well as from a technical point of view, to successfully perform this public procurement contract.

The minimum required profile of the company/firm will also be analysed at the selection stage. The bidders who will not meet the minimum requirements will not be selected for the award stage.

3.4.7.3 Overview of the procedure

*Text valid in case **several award criteria** are given in the Tender Specifications.*

In a first phase, the tenders submitted by the selected tenderers will be evaluated as to formal and material regularity. Irregular tenders will be rejected.

The contracting authority reserves the right to have the irregularities in the tenderers’ tender regularised during the negotiations.

In a second phase, the formally and materially regular tenders will be evaluated as to content by an evaluation commission. The contracting authority will restrict the number of tenders to be negotiated by applying the award criteria stated in the procurement documents. This evaluation will be conducted on the basis of the award criteria given in these Tender Specifications and aims to setting a shortlist of tenderers with whom negotiations will be conducted. **Maximum 3 tenderers** may be included in the shortlist.

Then, the negotiation phase follows. In view of improving the contents of the tenders, the contracting authority may negotiate with tenderers the initial tenders and all subsequent tenders that they have submitted, except final tenders. The minimum requirements and the award criteria are not negotiable. **However, the contracting authority may also decide not to negotiate.** In this case, the initial tender is the final tender.

When the contracting authority intends to conclude the negotiations, it will so advise the remaining tenderers and will set a common deadline for the submission of any BAFOs. Once negotiations have closed, the BAFO will be compared with the exclusion, selection and award criteria. The tenderer whose BAFO shows the best value for money (obtaining the best score based on the award criteria given below) will be designated the contractor for this procurement contract.

3.4.7.4 Award criteria

3.4.7.5 Final score

The scores for the award criteria will be added up. The procurement contract will be awarded to the tenderer with the highest final score, after the contracting authority has verified the accuracy of the Declaration on honour of this tenderer and provided the control shows that the Declaration on honour corresponds with reality.

The procurement contract will be awarded to the tenderer who has submitted the most economically advantageous tender.

Notice though that in accordance with Art. 85 of the Law of 17 June 2016, there is no obligation for the contracting authority to award the procurement contract.

The contracting authority maintains the right to award only a certain lot or certain lots.

3.4.8 Concluding the procurement contract

Art. 88 of the Royal Decree Award

In accordance with Art. 88 of the Royal Decree of 18 April 2017, the procurement contract occurs through the notification to the selected tenderer of the approval of his tender.

Notification is via digital platforms, e-mail or fax and, on the same day, by registered post.

So, the full contract agreement consists of a procurement contract awarded by Enabel to the chosen tenderer in accordance with:

- These Tender Specifications and its annexes;
- if any, minutes of the information session and/or clarifications and/or the addendum,
- The approved BAFO of the contractor and all of its annexes;
- The registered letter of notification of the award decision;
- Any later documents that are accepted and signed by both parties, as appropriate.

In an objective of transparency, Enabel undertakes to publish each year a list of recipients of its contracts. By introducing his tender, the successful tenderer declares that he agrees with the publication of the title of the contract, the nature and object of the contract, its name and location,

and the amount of the contract.

4 Special contractual provisions

This chapter of these Tender Specifications holds the specific provisions that apply to this public procurement contract as a derogation of the 'General Implementing Rules for public procurement contracts and for public works concessions' of the Royal Decree of 14 January 2013, hereinafter referred to as 'GIR', or as a complement or an elaboration thereof. The numbering of the articles below (between brackets) follows the numbering of the GIR articles. Unless indicated, the relevant provisions of the General Implementing Rules (GIR) apply in full.

These tender documents derogate from Art. 25-33 of the General Implementing Rules.

4.1 Definitions (Art. 2)

- **Contract manager:** The official or any other person who manages and controls the performance of the contract;
- **Performance bond:** Financial guarantee given by the successful tenderer to cover its obligations until final and good performance of the contract;
- **Acceptance:** Observation by the contracting authority that the performance of all or part of the works, supplies or services is in compliance with good practice and with the terms and conditions of the contract;
- **Progress payment:** Payment of an instalment under the contract after service delivery is accepted;
- **Advance:** Payment of part of the contract before service delivery (if accepted);
- **Amendment:** Agreement established between the contracting parties during contract performance in view of changing documents applicable to the contract.

4.2 Correspondence with the service provider (Art. 10)

Notifications by the contracting authority are addressed to the domicile or to the registered office mentioned in the tender, except if the tender documents require the service provider to elect domicile elsewhere after conclusion of the contract.

4.3 Managing official (Art. 11)

The managing official is Mr. **ROOS, Piet, Expert in Technology Enhanced Learning**, e-mail: piet.roos@enabel.be Phone number: +250784831527

Once the procurement contract is concluded, the managing official is the main contact point for the service provider. Any correspondence or any questions with regards to the performance of the procurement contract will be addressed to him/her, unless explicitly mentioned otherwise in these Tender Specifications.

The managing official is responsible for the follow-up of the performance of the contract.

The managing official is fully competent for the follow-up of the satisfactory performance of the procurement contract, including issuing service orders, drawing up reports and states of affairs, approving the services, progress reports and reviews. (S) he may order any modifications to the procurement contract with regards to its subject-matter provided that they remain within its scope.

However, the signing of amendments or any other decision or agreement implying derogation from the essential terms and conditions of the procurement contract are not part of the competence of the managing official. For such decisions the contracting authority is represented as stipulated under the contracting authority.

Under no circumstances is the managing official allowed to modify the terms and conditions (e.g. performance deadline) of the contract, even if the financial impact is nil or negative. Any commitment, change or agreement that deviates from the conditions in the Tender Specifications and that has not been notified by the contracting authority, will be considered null and void.

4.4 Subcontractors (Art. 12 to 15)

The fact that the contractor entrusts all or part of his commitments to subcontractors does not relieve him of liability to the contracting authority. The latter does not recognise any contractual relation with third parties.

The contractor remains, in any case, solely liable to the contracting authority.

The service provider commits to having the procurement contract performed by the persons indicated in the tender, except for force majeure. The persons mentioned or their replacements are all deemed to effectively be involved in the performance of the procurement contract. Any replacements must be approved by the contracting authority.

Art. 12/3 § 2 of the Royal Decree of 14 January 2013:

3° when this involves a service contract in a sector susceptible to fraud, the subcontracting chain may only have two levels at most, namely the contractor's direct subcontractor and the second level subcontractor.

When the contractor uses a subcontractor to carry out specific processing activities on behalf of the contracting authority, the same data protection obligations as those of the contractor are imposed on that subcontractor by contract or any other legal act.

In the same way, the contractor will respect and enforce to his subcontractors, the provisions of Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (General Data Protection Regulation, GDPR). The contracting authority may conduct an audit of the processing carried out in order to validate compliance with this legislation.

4.5 Confidentiality (art. 18)

The knowledge and information gathered by the tenderer under the framework of this public contract is strictly confidential.

Under no circumstances can the information collected, regardless of its origin and nature, be transferred to third parties in any form.

The tenderer is therefore bound by the duty of discretion.

In accordance with Article 18 of the Royal Decree of 14 January 2013 establishing the general rules for public procurement, the tenderer undertakes to consider and process in a strictly confidential manner any information, all facts, any documents and/or any data, whatever their nature and support, which have been communicated to him, in any form and by any means, or to which he has access, directly or indirectly, in the context or on the occasion of this public contract. Confidential information covers, in particular, the very existence of this public contract, without this list being limited.

Therefore, he undertakes to:

- Respect and enforce the strict confidentiality of these elements and to take all necessary precautions in order to preserve their secrecy (these precautions cannot in any case be inferior to those taken by the tenderer for the protection of his own confidential information);
- Consult, use and/or exploit, directly or indirectly, all of the above elements only to the extent strictly necessary to prepare and, if necessary, to carry out this public contract (particularly in accordance with the privacy legislation with respect to personal data processing);
- Not reproduce, distribute, disclose, transmit or otherwise make available to third parties the above elements, in whole or in part, and in any form, unless having obtained prior and written consent of the contracting authority;
- Return, at the first request of the contracting authority, the above elements;
- In general, not disclose directly or indirectly to third parties, whether for advertising or any other reason, the content of this public contract.

4.6 Protection of personal data

4.6.1 Processing of personal data by the contracting authority

The contracting authority undertakes to process the personal data that are communicated to it in response to the Call for Tenders with the greatest care, in accordance with legislation on the protection of personal data (General Data Protection Regulation, GDPR). Where the Belgian law of 30 July 2018 on the protection of natural persons with regard to the processing of personal data contains stricter provisions, the contracting authority will act in accordance with said law.

4.6.2 PROCESSING OF PERSONAL DATA BY A SUBCONTRACTOR

During contract performance, the contractor may process personal data of the contracting authority exclusively in the name and on behalf of the contracting authority, for the sole purpose of performing the services in accordance with the provisions of the Tender Specifications or in execution of a legal obligation.

For any processing of personal data carried out in connection with this public contract, the contractor is required to comply with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (GDPR) and the Belgian law of 30 July 2018 on the protection of natural persons with regard to the processing of personal data.

By simply participating in the contracting process, the tenderer certifies that he will strictly comply with the obligations of the GDPR for any processing of personal data conducted in connection with that public contract.

The personal data that will be processed are confidential. The contractor will therefore limit access to data to the strictly necessary personnel for the performance, management and monitoring of the public contract.

For the performance of the public contract, the contracting authority will determine the purposes and means of processing personal data. In this case, the contracting authority will be responsible for the processing and the contractor will be its processor, within the meaning of Article 28 of the GDPR.

Processing carried out on behalf of a controller must be governed by a contract or other legal act that is binding on the processor with regard to the personal data controller and that sets out that

the subcontractor acts only on the instruction of the person in charge of the processing and that the confidentiality and security obligations regarding the processing of personal data are also the responsibility of the subcontractor Article 28 §3 of the GDPR).

To this end, the tenderer must fill out, sign and submit to the contracting authority the subcontracting agreement given in Annex 6.17.

4.7 Intellectual property (Art. 19 to 23)

§1 the contracting authority acquires the intellectual property rights created, developed or used during performance of the contract.

Without prejudice to clause 1 and unless otherwise stipulated in the procurement documents, when the subject-matter of the procurement contract consists of the creation, manufacture or the development of designs or of logos, the contracting authority acquires the intellectual property thereof, as well as the right to trademark them, to have them registered and to have them protected.

For domain names created under the procurement contract, the contracting authority also acquires the right to register and protect them, unless otherwise stipulated in the procurement documents.

When the contracting authority does not acquire the intellectual property rights, it obtains a patent licence of the results protected by intellectual property law for the exploitation modes that are mentioned in the procurement documents.

4.8 Performance bond (Art. 25 to 33)

4.8.1 Provision of a bond

The performance bond is set at 5% of the total amount, excluding VAT, of the contract. The amount thus obtained shall be rounded up to the nearest 10 euros.

In accordance with the legal and regulatory provisions, the performance bond may be constituted either of cash or of public funds or may take the form of a collective performance bond. The performance bond may also take the form of a guarantee (see “Model of Proof of posting bond”) issued by a credit institution meeting the requirements of the law relating to the status and control of credit institutions (**Bank Guarantee**).

As a deviation from Art. 26, the performance bond may be:

- posted through an establishment that has its registered office in one of the countries of destination of the services. The contracting authority maintains the right to accept or refuse the posting of the bond through that institution. The tenderer shall mention the name and address of this institution in the tender.
- constituted by a one-off deduction from payment of the first invoice as payments will be made in instalments.

These deviations are founded on the idea of providing possible local tenderers with an opportunity to submit a tender.

The successful tenderer must, within 30 calendar days, as from the day of the awarding of the contract, furnish proof that he or a third party has posted the bond in one of the ways set out below:

1. In the case of cash, by transfer of the amount to the bpost account number of the Caisse des Dépôts et Consignations; Fill out the form https://finances.belgium.be/sites/default/files/01_marche_public.pdf as completely as possible and return it to the e-mail address: info.cdcck@minfin.fed.be

After reception and validation of said form, an agent of Belgium's Deposit and Consignment Office (Caisse des Dépôts et Consignations) will communicate to you the payment instructions (account number + communication) for posting the bond in cash

2. in the case of public funds, by depositing such funds, for the account of the Deposit and Consignment Office, with the State Cashier at the head office of the National Bank in Brussels or at one of its provincial agencies or with a public institution with an equivalent function;
3. in the case of a collective performance bond, through the depositing, by a company lawfully practising this profession, of a joint and several performance bond with the Caisse des Dépôts et Consignations or a public body fulfilling a similar function;
4. in the case of a surety, by the written undertaking of the credit institution.

This proof must be provided as applicable by submission to the contracting authority of:

1. the deposit receipt of the Caisse des Dépôts et Consignations or a public body fulfilling a similar function; or
2. a debit notice issued by the credit institution; or
3. the deposit acknowledgement issued by the government cashier or public body fulfilling a similar function; or
4. the original of the joint and several performance bond stamped by the Caisse des Dépôts et Consignations or a public body fulfilling a similar function; or
5. the original of the written undertaking issued by the credit institution.

These documents, signed by the depositor, must state for whom the performance bond has been constituted, its precise allocation through a brief statement of the purpose of the contract and the reference number of the contract documents, together with the name, first name and full address of the successful tenderer and, if applicable, of the third party making the deposit, with the words "lender" or "representative" as applicable.

The period of 30 calendar days specified above shall be suspended during the period of closure of the successful tenderer's business during paid annual holidays and the days off in lieu stipulated by regulation or by a compulsory collective labour agreement.

Proof that the required performance bond has been posted must be sent to the address that shall be mentioned in the contract award notification.

4.8.2 Failure to post the performance bond (Art. 29)

When the contractor fails to prove that the performance bond has been posted within 30 calendar days, he will be set in default by registered mail. This notification will be considered as a 'failure report' as mentioned in art. 44, § 2 of the General Implementing Rules (see below).

When, after notification of this failure by registered letter, the contractor has still failed to produce proof that the performance bond has been posted within a further period of 15 calendar days dating from the date of dispatch of the registered letter, the contracting authority may:

- 1° Post the performance bond itself by deduction from amounts due under the contract in question; in this case, the penalty shall be fixed at a flat rate of 2% of the initial amount of the contract; or
- 2° Apply the measures taken as of right. In any event, termination of the contract for this reason shall preclude the application of penalties or fines for delay.

4.8.3 Release of the Bond (Art. 33)

At the request of the contractor, the bond will be released after final acceptance and at the latest at the expiry of 18 months after the implementation period of the contract.

4.9 Conformity of performance (Art. 34)

The services must comply in all respects with the procurement documents. Even in the absence of technical specifications in the procurement documents, the works, supplies and services must comply in all aspects with good practice.

4.10 Changes to the procurement contract (Art. 37 to 38/19)

4.10.1 Replacement of the contractor (Art. 38/3)

Provided that he meets the selection and exclusion criteria set out in this document, a new contractor may replace the contractor with whom the initial procurement contract was agreed in cases other than those provided for in Art. 38/3 of the General Implementing Rules (GIR).

The contractor submits his request as quickly as possible by registered post, stating the reasons for this replacement and providing a detailed inventory of the state of supplies and services already performed, the new contractor's contact details and the documents and certificates which the contracting authority cannot access free of charge.

The replacement will be recorded in an amendment dated and signed by all three parties. The initial contractor remains liable to the contracting authority for the performance of the remainder of the procurement contract.

4.10.2 Adjusting the prices (Art. 38/7)

For this procurement contract, price reviews are not permitted.

4.10.3 Indemnities following the suspensions ordered by the contracting authority during performance (Art. 38/12)

The contracting authority reserves the right to suspend the performance of the procurement contract for a given period, mainly when it considers that the procurement contract cannot be performed without inconvenience at that time.

The performance period is extended by the period of delay caused by this suspension, provided that the contractual performance period has not expired. If it has expired, the return of fines for late performance will be agreed.

When activities are suspended, based on this clause, the contractor is required to take all necessary precautions, at his expense, to protect the services already performed and the materials from potential damage caused by unfavourable weather conditions, theft or other malicious acts.

The contractor has a right to damages for suspensions ordered by the contracting authority when:

- The suspension lasts in total longer than one twentieth of the performance time and at least ten working days or two calendar weeks, depending on whether the performance

time is expressed in working days or calendar days;

- The suspension is not due to unfavourable weather conditions;
- The suspension occurred during the contract performance period.

Within thirty days of their occurrence or the date on which the contractor or the contracting authority would normally have become aware of them, the contractor reports the facts or circumstances succinctly to the contracting authority and describes precisely their impact on the progress and cost of the procurement contract.

4.10.4 Unforeseen circumstances

As a rule, the contractor is not entitled to any modification of the contractual terms due to circumstances of which the contracting authority was unaware.

A decision of the Belgian State to suspend cooperation with a partner country is deemed to be unforeseeable circumstances within the meaning of this article. Should the Belgian State break off or cease activities which implies therefore the financing of this procurement contract, Enabel will do everything reasonable to agree a maximum compensation figure.

4.11 Preliminary technical acceptance (Art. 42)

The contracting authority reserves the right to demand an activity report at any time of the assignment to the service provider (meetings held, persons met, institutions visited, summary of results, problems encountered and unresolved issues, deviations from the planning and deviations from the ToR...).

4.12 Performance modalities (Art. 146 et seq.)

4.12.1 Deadlines and terms (Art. 147)

The services must be performed within a maximum of 3 calendar months, as from one day after the date on which the service provider received the contract conclusion notification letter. **The closure of the service provider's business for annual holidays is included in this calculation.**

4.12.2 Place where the services must be performed and formalities (Art. 149)

The services will be performed in Kigali - Rwanda

4.12.3 Evaluation of the services performed

If during contract performance irregularities are found, the contractor shall be notified about this immediately by fax or e-mail, which shall be confirmed consequently. The contractor is bound to perform the non-complying services again.

When the services have been performed, the quality and conformity of the services shall be evaluated. A report of this evaluation shall be drawn up. The original copy of this report will be sent to the contractor. Any services that have not been performed correctly or in conformity shall be started again.

4.13 Inspection of the services (Art. 150)

If during contract performance irregularities are found, the contractor will be notified about this immediately by fax or e-mail, which will be confirmed consequently by registered letter. The

contractor is bound to perform the non-complying services again.

The service provider advises the managing official by registered post or e-mail showing the exact date of dispatch, at which date the services can be controlled.

4.14 Liability of the service provider (Art. 152-153)

The service provider takes the full responsibility for mistakes and deficiencies in the services provided.

Moreover, the service provider indemnifies the contracting authority against damages for which it is liable towards third parties due to late performance of the services or due to failure of the service provider.

4.15 Zero tolerance Sexual exploitation and abuse

In application of Enabel's Policy regarding sexual exploitation and abuse of June 2019 there will be zero tolerance towards any misconduct that could impact the professional credibility of the tenderer.

4.16 Means of action of the contracting authority (Art. 44-51 and 154-155)

The service provider's default is not solely related to services as such but also to the whole of the service provider's obligations.

In order to avoid any impression of risk of partiality or connivance in the follow-up and control of the performance of the procurement contract, it is strictly forbidden to the service provider to offer, directly or indirectly, gifts, meals or any other material or immaterial advantage, of whatever value, to the employees of the contracting authority who are concerned, directly or indirectly, by the follow-up and/or control of the performance of the procurement contract, regardless of their hierarchical rank.

In case of violation, the contracting authority may impose a lump-sum fine to the service provider for each violation, which can be to up to three times the amount obtained by adding up the (estimated) values of the advantage offered to the employee and of the advantage that the contractor hoped to obtain by offering the advantage to the employee. The contracting authority will decide independently about the application and the amount of this fine.

This clause is without prejudice to the possible application of other measures as of right provided in the GIR, namely the unilateral termination of the procurement contract and/or the exclusion of procurement contracts of the contracting authority for a determined duration.

4.16.1 Failure of performance (Art. 44)

§1 The contractor is considered to be in failure of performance under the procurement contract:

1° when the delivery is not carried out in accordance with the conditions specified in the procurement documents;

2° at any time, when the delivery has not progressed in such a way that it can be fully completed on the due dates;

3° when he does not observe written orders, which are given in due form by the contracting authority.

§2 Any failure to comply with the provisions of the procurement contract, including the non-observance of orders of the contracting authority, is recorded in a report ('process verbal'), a copy of which will be sent immediately to the contractor by registered mail.

The contractor must repair the defects without any delay. He may assert his right of defence by registered letter addressed to the contracting authority within fifteen days from the date of dispatch

of the report (process verbal). Silence on his part after this period shall be deemed as acknowledgement of the reported facts.

Any defects detected that can be attributed to the contractor render him liable to one or more of the measures provided for in Articles 45 to 49, 154 and 155.

4.16.2 Fines for delay (Art. 46 and 154)

The fines for delay differ from the penalties referred to in Article 45. They are due, without the need for notice, by the mere lapse of the performance term without the issuing of a report and they are automatically applied for the total number of days of delay.

Without prejudice to the application of fines for delay, the contractor continues to guarantee the contracting authority against any damages for which it may be liable to third parties due to late performance of the procurement contract.

4.16.3 Measures as of right (Art. 47 and 155)

§1 When, upon expiry of the term given in Article 44, §2, the contractor has not taken action or has presented means deemed unjustified by the contracting authority, the contracting authority may apply the measures as of right described in paragraph 2.

However, the contracting authority may apply measures as of right without waiting for the expiry of the term given in Article 44, §2, when the contractor has explicitly recognised the defects found.

§2 The measures as of right are:

1° Unilateral termination of the procurement contract. In this case the entire performance bond, or if no bond has been posted an equivalent amount, is acquired as of right by the contracting authority as lump sum damages. This measure excludes the application of any fine for delay in performance in respect of the terminated part;

2° Performance under regie of all or part of the non-performed procurement contract;

3° Conclusion of one or more replacement procurement contracts with one or more third parties for all or part of the procurement contract remaining to be performed.

The measures referred to in 1°, 2° and 3° will be taken at the expense and risk of the defaulting contractor. However, any fines or penalties imposed during the performance of a replacement procurement contract will be borne by the new contractor.

4.17 End of the procurement contract

4.17.1 Acceptance of the services performed (Art. 64-65 and 156)

The managing official will closely follow up the services during performance.

The services will not be accepted until after fulfilling audit verifications, technical acceptance and prescribed tests.

The contracting authority disposes of a verification term of thirty days starting on the final or partial end date of the services, set in conformity with the modalities in the procurement documents, to carry out the acceptance formalities and to notify the result to the service provider. This term commences provided that the contracting authority possesses, at the same time, the list of services delivered or the invoice. Upon expiry of the thirty-day term following the date stipulated for completion of the entirety of the services, depending on the case, an acceptance report or a refusal of acceptance report will be drawn up.

Where the services are completed before or after this date, it is the responsibility of the service provider to notify the managing official by registered letter, and at the same time to ask for the acceptance procedure to be carried out. Within thirty days after the date of receipt of the service provider's request, an acceptance or a refusal of acceptance report will be drawn up, depending on the case.

The acceptance specified above is final.

4.18 Invoicing and payment of services (Art. 66 - 72 and 160)

The contractor/ service provider sends (one copy only of) the invoices and the contract acceptance report (original copy) to the following address:

ToR for the redevelopment of TVET course materials into Moodle-based eContent

1. Background

Enabel is the Belgian development agency. Under the 2030 Agenda for Sustainable Development, we carry out public service assignments in Belgium and abroad. In addition, Enabel enhances the impact of Belgium in international development by carrying out assignments for Belgian and international third-party donors. Its staff members in Brussels and overseas embody the commitment of the Belgian State and other development partners to international solidarity.

Currently, Enabel is implementing a five-year cooperation programme (2019 – 2024) with a total budget of 120 million euros in four priority sectors of development of Rwanda: health, agriculture, urbanisation, and public finance management.

Rwanda Polytechnic (RP) was established by the Government of Rwanda in 2017 to implement Technical and Vocational Education and Training (TVET) skills development across the country. The Government of Rwanda (GoR) has been focusing on a development agenda aimed at transforming Rwanda and the expansion of the TVET system with collaboration from development partners, private sector actors, and civil society is part of this initiative.

Rwanda TVET Board (RTB) is a government institution established in 2020 by the Ministry of Education to be at the forefront of all efforts to promote TVET from level one (1) to level (5) of the Rwanda TVET Qualification Framework.

In a bid to curb the Covid-19 Pandemic especially in the TVET education subsector, Enabel wants to support the TVET institutions Rwanda Polytechnic (RP) and Rwanda TVET Board (RTB) in the development of digital content in different trades at different levels of education.

Enabel is specifically supporting RTB and RP in the redeveloping digital content from existing course materials from at least 7 trades., totaling 100 online modules, as a means build resilience to the effects of Covid19 through digitalization. It is to this end that Enabel is publishing a tender for the online development of 100 online modules, covering at least 7 TVET related trades.

2. Scope and objectives of the assignment

The objective of this assignment is to redevelop, digitalize and/or upload existing learning and teaching materials into the **Moodle** Learning Management System of Rwanda TVET Board and Rwanda Polytechnic.

We expect **100 online modules** to be developed, based on the learning materials that are provided. One online module is expected to have a total run-through time of maximum **4**

hours. This is calculated on reading time, not the actual execution of learning activities and study time. The total running-time of redeveloped eLearning content should therefore be around (maximum) **400 hours**. eLearning content must be developed into native Moodle activities and / or H5P activities.

Learning materials will be provided in Microsoft Word documents, PDF files or PowerPoint files. In total, the learning materials consist of more than 2500 pages. Extra multimedia assets (video, audio, images, ...) will also be foreseen if they are available. The consultant firm can suggest Enabel to develop extra multimedia assets, if applicable.

Enabel will provide the structure of the content and how it is divided into 100 separate modules. This division of content can be consulted in Annex 1 of this TOR.

A content development framework has been created, consisting of seven phases:

Phase 1	Course materials are uploaded onto the LMS in their original format. They are structured well enough to be used as study materials
Phase 2	Course materials are uploaded onto the LMS and are accompanied with basic assessment activities such as quizzes, forums, assignments...
Phase 3	Course materials are redeveloped into static eLearning pages, directly within the LMS, accompanied with basic assessment activities.
Phase 4	Course pages are complemented with interactive eLearning activities (e.g., hotspots, lessons, ...), based on existing and available content.
Phase 5	Extra (interactive) multimedia materials are developed and implemented in the eLearning course. (infographics, audio, video, and animation)
Phase 6	Competence tracking and a grading system are correctly configured and implemented within the eLearning course, e.g. ePortfolio system included.
Phase 7	If applicable, subject specific plugins are leveraged and effectively used in the eLearning courses

With this assignment, we expect each module to have reached at least **phase 4, and 50% of modules to have reached phase 5 and 5 modules to be at phase 7.**

Basic assessment activities are limited to native Moodle or H5P activities, that don't require any extra special plugins.

The objectives of the assignment are structured in stages, following the ADDIE (Analysis-Design-Development-Implementation- Evaluation) instructional design model. Each stage consists of specific objectives and expected outcomes.

The assignment will be completed following an agile approach, with multiple iterations that result in quick deliverables in the form of content batches, and short feedback loops from Enabel's side. Each agile iteration consists of all the phases described below.

A validation by a team of teachers, lecturers and select members of the RESICODI online learning team is in place to validate each iteration of this assignment.

- **Stage 1. Analysis**

The outcome of this stage is an **inception report**.

Enabel, together with its partners, has already extensively worked in the Analysis phase. So far, we have identified:

- Teachers' and industry experts' needs
- Content to be redeveloped, based on a needs assessment

The consultant is expected to:

- Conduct a desk review to identify the needs of teachers, learners and industry experts as described in the needs assessment reports provided by Enabel.
- Conduct a thorough analysis of the learning materials that need to be digitalized, especially the learning content.
- Sit together with the Enabel online learning team and identified stakeholders from the partner institutions

Content will be provided in PDF files. Editable Word file and separate asset files might not be available. **An example document is attached in annex as example.**

Based on the analysis of the above, the consultant is expected to provide a way forward with this given information, including risks and opportunities, in the inception report.

- **Stage 2: Design**

The outcome is a **validated design document** ("blueprint") of the redevelopment of the batch of modules.

As mentioned in the analysis, a content and activity mapping exercise has already been done for some modules, by Enabel and its institutional partners. Following this, an initial online course design has also been developed. The consultant will finish analysis of the remaining modules.

Redevelopment is to be done using native Moodle course activities and H5P activities. Activities that require other external plugins will first have to be validated by the server admins of both partner institutions.

This stage furthermore includes:

- Review of Enabel's suggested course design and suggested improvements, if applicable
- Estimated number of activities and pages per module
- Overview of extra multimedia materials and assets to be developed
- Estimation of development time per module
- Prepare a list of specific learning materials and/or assets that need to be

developed.

- Visual representation of the course flow and structure.
- Considering that multiple (separate) groups will take part in course activities
- ...

- **Stage 3: Development**

The Development stage will be the main area of focus for the consultancy.

The outputs of this stage are **fully developed Moodle courses, delivered in Moodle Backup Files**, based on the 100 modules that were identified by Enabel. Moodle course are to be delivered in Moodle backup files, 1 per Module.

Development includes:

- Redeveloping the course materials into Moodle and / or H5P activities
- Development of multimedia materials and assets, when applicable
- Considering that multiple (separate) groups will take part in course activities
- Directing and facilitate the Enabel, RTB and RP team to rewrite or clarify course contents where necessary.

- **Stage 4: Implementation**

During this stage the delivered backup files from the Development stage will be restored onto the partner institutions' Moodle environment for testing purposes.

Teachers and students will be enrolled.

The output is a **technical testing report**.

- **Stage 5: Evaluation**

The redeveloped eLearning content will be piloted by selected teachers and students. The pilot will serve to test the format, contents, and usability of the course. The consultant is expected to incorporate the feedback.

The output is an **evaluation report**.

- **Stage 6: Training**

Training will take place after all iterations have been finished. The consultant is expected to train a select group of beneficiaries on basic skills of Moodle course development, including H5P activities.

The output is a **training evaluation report**.

- 3.2. The contractor undertakes to process personal data in accordance with the documented instructions of the personal data controller, including for transfers of personal data to third countries or to international organisations, unless it is required under EU or Member State law. In this case, the processor informs the personal data controller of this legal obligation prior to processing unless the relevant law prohibits such information for important public interest reasons.
- 3.3. The contracting authority may unilaterally make limited changes to the instructions. The contracting authority undertakes to consult with the contractor before making significant changes to the instructions. Changes affecting the content of this Agreement must be agreed by the Parties.

The contractor will immediately implement all remedies requested by the contracting authority or the relevant authorities to remedy any data breach or other non-compliance and/or mitigate the risks associated with these events. The contractor will have to cooperate at all times with the contracting authority and observe its instructions in order to enable it to carry out an appropriate investigation into the data breach, formulate a correct response and then take appropriate action.

authority disposes of a minimum period of [...] from the date of reception of said information to voice any objections. Such subsequent subcontracting may only be carried out if the contracting authority has not voiced any objection during said period.

- 7.3. The contractor will use only subsequent subcontractors who provide sufficient guarantees to implement appropriate technical and organisational measures in such a manner that the processing will meet the requirements of this public contract, of Belgian legislation and of the GDPR and assures the rights of the data subject concerned.
- 7.4. When the contractor uses another subcontractor to carry out specific processing activities in the name of the contracting authority, obligations in any respect identical to those provided for in this Agreement will have to be imposed on this subsequent subcontractor; the latter in particular must provide the same sufficient guarantees to implement appropriate technical and organisational measures in such a manner that the processing will meet the requirements of the Regulation.

- The contractor will comply promptly and require his subsequent subcontractor(s) to promptly comply with any request from the contracting authority to comply with a request by the data subject concerned to exercise one of their rights;
- The contractor will ensure that he and his subsequent subcontractor(s) have the technical and organizational capabilities to block access to personal data and to physically destroy the data without the possibility of recovery if and when such a request is made by the contracting authority. Without prejudice to the above, the contractor retains the opportunity to consider whether the request of the contracting authority does not constitute a violation of the Regulation.

8.3. The contractor must, at the request of the contracting authority, provide all necessary assistance and provide all necessary information for the contracting authority to defend its interests in any proceeding - judicial, arbitral or otherwise - brought against the contracting authority or its staff for any violation of the fundamental rights to privacy and the protection of the personal data of the data subjects concerned.

- 9.3. In assessing the appropriate level of security account shall be taken in particular of the risks that are presented by processing, in particular from accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to personal data transmitted, stored or otherwise processed.
- 9.4. The parties recognise that security requirements are continually evolving and that effective security requires frequent assessment and regular improvement of outdated security measures. The contractor will therefore have to continually assess and strengthen, complete or improve the measures implemented with a view to the continued compliance of his obligations.

- 9.5. The contractor provides the contracting authority with a complete and clear description, in a transparent and understandable manner, of how he handles its personal data (Annex 3).
- 9.6. In the event that the contractor changes the security measures applied, the contractor undertakes to notify so immediately to the contracting authority.

The contractor provides the necessary cooperation.
- 10.2. This auditing right may not be used more than once in a calendar year, unless the contracting authority and/or the Supervisory Authority has reasonable grounds to assume that the contractor is acting in conflict with this Agreement and/or the provisions of the Regulation. The restriction of the right of control does not apply to the Supervisory Authority.
- 10.3. At the written request of the contracting authority, the contractor will provide the contracting authority or the relevant Supervisory Authority with access to the relevant parts of the contractor's administration and to all places and information of interest to the contractor (as well as, applicable to those of its agents, subsidiaries and subsequent subcontractors) to determine whether the contractor complies with the Regulation and provisions of this Agreement. At the request of the contractor, the parties concerned agree to a confidentiality agreement.
- 10.4. The contracting authority must take all appropriate measures to minimise any obstruction caused by the audit on the day-to-day functioning of the contractor or the services performed by the contractor.

agree to put in place a plan, including a timetable for implementing the plan, to address the gaps revealed by the audit.

- 10.6. The contracting authority will cover the costs of any audit carried out within the meaning of this article. Without prejudice to the above, the contractor will bear the costs of his employees. However, where the audit has revealed that the contractor is clearly not in compliance with the Regulation and/or provisions of this Agreement, the contractor bears the costs of said audit. The costs of re-compliance with the Regulation and/or the provisions of this Agreement are borne by the contractor.

Article 13: Behaviour towards national government and judicial authorities

- 13.1. The contractor will immediately notify the contracting authority of any request, injunction, investigation or subpoena of a competent national government or judicial authority addressed to the contractor or its subsequent subcontractor(s) that involves the disclosure of personal data processed by the contractor or a subsequent subcontractor for and on behalf of the contracting authority or any data and/or information relating to that processing.
