Tender Details

As Australia's largest water utility, we have an obligation to improve the lives of our customers, communities and environment. We are working towards ensuring that no one is exploited in the provision of goods and services to or on behalf of Sydney Water; that we operate as a sustainable business; and continue to work with our First Nations peoples to protect water and land; and to address inequalities.

From a procurement perspective this means:

- Eliminating the risk of Modern Slavery in our supply chain
- Becoming a Supply Nation member to improve Aboriginal and Torres Strait Islander supplier diversity
- Not harming the environment by sourcing recycled, reused or sustainable goods and services

We want to do business with people who share our values. When submitting your tender application please provide an overview of your enterprise's Corporate Social Responsibility efforts.

The purpose of Procurement at Sydney Water is to get the goods, services and facilities it needs, when it needs them and for the right cost. Procurement is a key enabler and contributor to the success of our strategic objectives and fulfilling our vision to create a better life through world-class water services. As our customers rely on us for reliable, high quality services at affordable prices, we partner with an extensive range of suppliers to help us create thriving, liveable and sustainable cities. It's crucial that we undertake procurement

activities ethically and equitably to ensure that the best commercial outcomes are achieved in line with our organisational values and statutory obligations

We are seeking proposals from businesses interested in providing Preliminary Design and Technical Advisory Services for the Prospect Water System Pre-Treatment Plant.

The successful supplier will be an integral part of the project of supporting the design development, procurement and delivery phases of the project through engineering design, technical input and assurance. The successful supplier will work alongside Sydney Water and other relevant stakeholders to ensure effective and successful delivery of the Prospect Water System Pre-Treatment plant.

The role is critical in supporting Sydney Water to best manage the delivery of this project. The successful supplier will be focused on delivering the outcomes and expected benefits of the Project.

The successful supplier will be required to work with Sydney Water to undertake the following tasks:

- Prepare a Preliminary Design for the Prospect Water System Pre-Treatment Plant
- Undertake site investigations and studies to inform the Preliminary Design
- Undertake specialist studies to inform the environmental impact assessment (which will be carried out by Sydney Water)
- Provide Technical and Engineering Advisory across the Prospect Water System Pre-Treatment Plant project
- Support Sydney Water in understanding risks and opportunities specific to the Prospect Water System Pre-Treatment Plant project including mitigation strategies

Location

NSW Regions: Cumberland/Prospect

RFT Type

Open Tenders - An invitation to tender by public advertisement with no restriction placed on who may tender. Tenderers will normally be required to demonstrate in their tender that they have the necessary skills, resources, experience, financial capacity, and in some cases licences, accreditations, etc., to fulfil the tender requirements.
