Tender Details

The Albert Priest Channel which supplies raw water from Warren to Nyngan consists of a DN900 reinforced concrete (RC) pipeline across the Belaringar Creek. This existing pipeline (hereinafter called “syphon”) has deteriorated and needs replacement. The designed capacity of the syphon is 60 ML/d.

Under this contract, a new syphon pipeline across and under the Belaringar creek shall be constructed together with associated structures such as headwalls as stated in this tender document. The new syphon shall be installed parallel to the existing syphon and connected to the existing open channel section on both ends

Location

NSW Regions: Orana/Far West

RFT Type

Open Tenders - An invitation to tender by public advertisement with no restriction placed on who may tender. Tenderers will normally be required to demonstrate in their tender that they have the necessary skills, resources, experience, financial capacity, and in some cases licences, accreditations, etc., to fulfil the tender requirements.
