Tender Details

As Australia's largest water utility, we have an obligation to improve the lives of our customers, communities and environment. We are working towards ensuring that no one is exploited in the provision of goods and services to or on behalf of Sydney Water; that we operate as a sustainable business; and continue to work with of our First Nations peoples to protect water and land; and to address inequalities.

From a procurement perspective this means:

- Eliminating the risk of Modern Slavery in our supply chain
- Becoming a Supply Nation member to improve Aboriginal and Torres Strait Islander supplier diversity
- Not harming the environment by sourcing recycled, reused or sustainable goods and services

We want to do business with people who share our values. When submitting your tender application please provide an overview of your enterprise's Corporate Social Responsibility efforts.

The purpose of Procurement at Sydney Water is to get the goods, services and facilities it needs, when it needs them and for the right cost. Procurement is a key enabler and contributor to the success of our strategic objectives and fulfilling our vision to create a better life through world-class water services. As our customers rely on us for reliable, high quality services at affordable prices, we partner with an extensive range of suppliers to help us create thriving, liveable and sustainable cities. It's crucial that we undertake procurement activities ethically and equitably to ensure that the best commercial outcomes are achieved in line with our organisational values and statutory obligations.

EOI to participate in tender for the provision of Traffic Management Services.

This scope for the Traffic Management Services covers requirements and objectives for the provision of Traffic Management Services (Works) to Sydney Water which include the following activities:

Supply of Traffic Management Services

Sydney Water performs a range of maintenance and upgrading activities on its water and sewer infrastructure assets. Work is performed by different divisions of the Sydney Water:

- a) Maintenance teams
- b) Civil Projects
- c) Delivery Management and
- d) Regional Delivery Consortia (RDC's)

These groups generally perform reactive maintenance, planned maintenance and upgrade activities across the entire Sydney Water Area of Operations.

In cases some of the activities required traffic control services which need to ensure the safe movement of traffic and the protection of pedestrians, property, and workers in the vicinity of the Client's work area of operations. The need for traffic control is dependent on the location of the activity and its proximity to traffic.

- provision of appropriately skilled and trained operators.
- delivery of the requirement plant and equipment to the job site; and
- liaising with Sydney Water principal contractors to ensure safe, efficient and cost-effective delivery.

Location

NSW Regions: Cumberland/Prospect, Nepean, Northern Sydney, Inner West, South East Sydney, South West Sydney, Illawarra
