Overview

NCC has recently approved an increase in weed control for Landscape and Conservation reserves over the next 2 financial years. There is the potential for this increase to be extended through to 2030/31. Priority reserves will be the initial focus of the funding. This RFQ is for weed control and ecological restoration on the South West face of the Grampians. This includes a mature stand of native bush, steep slopes of Himalayan honeysuckle and gorse, and a large stand of Tasmanian Blackwoods. We are seeking a team to enact the Ecological Restoration Plan (attached) for the Management Units H, I and J.
