Overview

The University is after a Primary Hyperscale Cloud Platform Partner for digital enablement services under a mutually collaborative and innovative partnership.

Our proposed outcomes are:

- To enable the Digital Services (ITS) team to deliver high quality, responsive and flexible services to end users thereby improving the end user experience.
- Create a flexible, secure and robust platform as a key deliverable of core enablement of the Digital Strategy.

Our proposed benefits will be identified through digital opportunities across UC that adds overall value and increased improvements to the UC's business outcomes.

You are an industry leading Hyperscale Cloud Platform vendor product owner with a NZ service and support capability.

NOTE: The University is not looking for an Implementation or Support Partner for a vendor cloud platform as this is a requirement under a future RFP tender.
