Overview

The University require supply of milk including a fully managed delivery service to on-campus staff kitchenettes (approximately 90 departments across the UC campus).

The University would like to offer a range of products that includes specialist dietary and where possible alternative milk options.

The University is seeking a supplier who is sourcing/supplying milk from an ethical transparent sustainable supply chain.

Supply chain sustainability is a key focus for the University. Providers must devote absolute commitment to limiting environmental impact in all aspects of conducting business. This should include specific focus on farming intensity and reducing downstream waste, ethical values and practices, transparency, compostable or reusable packaging where possible, support of local producers and local communities.
