

Details

RFx ID : 25595068
Tender Name : Technical Infrastructure for the building for climate change programme
Reference # : RFI
Open Date : Friday, 25 March 2022 2:00 PM (Pacific/Auckland UTC+13:00)
Close Date : Saturday, 30 April 2022 5:00 PM (Pacific/Auckland UTC+12:00)
Tender Type : Request for Information (Market research) (RFI)
Tender Coverage : Sole Agency [?]
- 40000000 - Distribution and Conditioning Systems and Equipment and Components
Categories : - 80000000 - Management and Business Professionals and Administrative Services
- 83000000 - Public Utilities and Public Sector Related Services
Regions: - New Zealand
Required Pre-qualifications : None
Contact : Sandra Worboys
TBA
Alternate Physical Delivery Address :
Alternate Physical Fax Number :

Overview

This request for information (RFI) relates to the delivery of technical infrastructure, which will form part of MBIE's Building for Climate Change programme. The vision for the programme is that New Zealand's building related emissions are near zero, while providing healthy places to work and live for present and future generations. Technical infrastructure refers to a system of technical resources, including the methodologies, data and tools, that need to be widely available to support the reliability and consistency of carbon emissions reduction regulations and policies. It will help us and the sector to understand, benchmark, and compare the carbon footprints of building designs and it will increase carbon literacy in the construction industry. This technical infrastructure will underpin potential regulatory requirements that are currently under development, and that were consulted on at a high level in 2020. We want three technical products a national carbon database, carbon calculation tools, and a national repository that should work together but that are not necessarily one solution
