### Overview

Block A at Pukeatua School is on the list of weathertightness remediation projects where significant improvements to wall cladding and roof coverings is required.

The design development process that sees a complete overhaul of the exterior envelope elements has been through preliminary and developed design review processes and a Building Consent has been issued by Hutt City Council.

This procurement looks for a professional building contractor that can employ appropriately experienced staff, competent sub contractors and proven suppliers to deliver a highly performing and robust refurbishment project.

The scheme will be traditionally executed with a full design team employed by the School Board of Trustees producing full construction documentation.
