Overview

DQLS and ILE improvements to classrooms including installation of sliding doors between classrooms, creating flexible learning spaces. Replacement of wall linings, carpet and vinyl. New LED lighting. RCT protection to power outlets and lighting circuits and some switchboard replacements. Outside the classrooms the front canopy requires new safety mesh under translucent sheets and roof and gutter replacement to four classrooms and Library.

There are ten classrooms involved and we can only work on two at a time, which will require a contractor that is really flexible to fit within the school's wishes, plus the roofing work to be undertaken during school holiday periods only.
