Alternate Physical Fax Number :

### Overview

MPI wishes to refurbish its Plant Health and Environment Laboratory in Tamaki (231 Morrin Street, St Johns, Auckland). The current facility is at capacity as both staff numbers and workload has increased. Functional lab work areas are overcrowded.

Stapleton & Elliot completed design work in June 2020 based on the business requirements at that time. A review of the scope was undertaken and with a couple of minor changes, much of the scope remains the same. A Building Consent has been issued by Auckland City Council.
