- 83000000 - Public Utilities and Public Sector Related Services
Regions: - Canterbury
Exemption Reason : None
Required Pre-qualifications : None
Contact : Kerry Weir
Alternate Physical Delivery Address :
Alternate Physical Fax Number :

Overview

This procurement relates to the delivery of a Building Management System in conjunction with a fault detection/diagnostic/analytical/energy tool that integrates with the building management system. These systems will use interactive dashboards to prioritise building operations through (but not limited to) potential savings, urgency, energy, and comfort impacts. These systems will enable Environment Canterbury to have a proactive maintenance strategy, using data-driven decision making for continuous analysis of the buildings systems. The key outcomes that we want to achieve are the establishment of an intuitive interactive building management system and associated tools that provide Environment Canterbury with an overview of how the system is operating at any given time and also to identify areas of opportunity that will enable the building to operate more efficiently, resulting in reduced costs for the organisation amongst other benefits.
