Alternate Physical Delivery Address :  
Alternate Physical Fax Number :

### Overview

Otago Regional Council requires a suitably skilled and experienced contractor to undertake maintenance of waterways within the Dunedin area. This is important to maintain flow capacity to enhance flood protection, and to increase the visual amenity value of the area.

We do not want bids from contractors who have no experience in this type of work. We also do not want bids from contractors who are unable to meet the required schedule for services.

It is important to us that the waterways are kept free from debris, rubbish, and vegetation that could reduce the capacity or cause damage during a flood. It is also important that the visual amenity of these areas is maintained, as they all exist within public urban spaces.
