Overview

This contract is for the reinstatement of various sewers in Farlie with the potential for additional pipelines elsewhere in the District. The works include, but are not limited to the following:

- Relining of 150mm gravity sewer and associated LJR's.
- Root removal.
- Removal of protrusions.
- All Traffic Management.

The objective of the works is to restore the pipelines to a near new state. All product installed shall have a minimum design life of 50 years or more.

All construction shall be subject to all Quality Assurance (QA), Traffic Management, and Health & Safety requirements and shall meet the requirements of the Preliminary and General section of the Specification.

The contractor is required to coordinate with private property owners for works within and adjacent to private property. As such it is expected that the contractor provide relevant project information to private land owners in a professional manner.
