Overview

The New Zealand Police (Police) Information Communication and Technology Service Centre (ITSC) seeks to implement a Security Orchestration, Automation and Response (SOAR) platform to permit data to be ingested from a variety of sources. It will automate repetitive manual tasks, allow for the creation of a playbook to prioritise, standardise and scale response processes in a consistent and documented way.

A SOAR platform will enhance our real-time collaboration in protecting our data by leveraging our existing technology and presenting a customisable dashboard to Security Analysts on prioritised threats, alerts and incidents of compromise.

For more information, please request the RFQ documentation from ICTStrategicsourcing@police.govt.nz
