Overview

The core purpose of the Canterbury Health Laboratories (CHL)'s Billing System Upgrade Request for Proposal (RFP) is to find a replacement software solution for its current laboratory billing system that is nearing its end of life. Along with the core billing functionality the new software solution will also need to incorporate two other essential business functions, test costing system functionality and client services system functionality, into one comprehensive 'fit for purpose' platform.

The new software solution will support the business to seek higher efficiency and effectiveness through new capabilities, increased automation, reporting and flexibility as well as providing access to comprehensive, accurate and meaningful information to support Canterbury Health Laboratories (CHL) strategic management and decision-making processes.

We are ideally looking for a modular based system that can be implemented in phases over a period of time in order to reduce the impact on the Canterbury Health Laboratories (CHL) Finance Team.
