Alternate Physical Fax Number :	

Overview

The project is to remediate weathertightness failings to an area of the administration block added around 1995, to refurbish the staff room and undertake alterations to develop a universal bathroom. The three separate packages of work have been combined to make it a more attractive tender opportunity and minimalise disruptions to the school.

The weathertightness remediation will reconstruct the identified area on the existing concrete slab and include for reforming the roof to remove flat areas.

Refurbishment of the staff room will include an addition, relocation of the kitchen and some minor alterations to the administration.

To address learning support modifications a new universal bathroom will be developed, with consequential alterations to staff toilets and the medical room.

The scheme will be traditionally executed with a full design team employed by the School Board of Trustees producing full construction documentation.
