## Overview

The redevelopment projects of the Picton and Wellington ferry terminals are a tremendous opportunity for the construction services contractors and partners to work with KiwiRail, which will offer state-of-the-art new ferry infrastructure facilities in the region and for all New Zealanders for the years to come.

KiwiRail calling for construction partners to join iReX project: KiwiRail is looking for the best construction partners to work alongside us on the exciting and challenging iReX programme. This \$1.45 billion dollars of works includes buying two new rail enabled ferries and building two new terminals at Waitohi Picton and Kaiwharawhara Wellington. iReX will be an incredible project to work on – a unique construction and engineering project and the only project in Aotearoa New Zealand working across marine and land environments, civil and virtual engineering, rail and road. We're ready to go and now we're shifting into delivery mode to get our construction partners on board. Watch the video to learn more about this great project, and look out for the Request for Tenders on GETs from late July 2022.
