

## **Supply and Maintenance of Two JBOD Storage Chassis**

Detailed description:

The requirements to be met by each of the two storage chassis included into the proposed solution are as follows: - 4 rack units size chassis with 45x-60x individually hot-swappable 3.5” SAS/SATA drive slots; - 15x standard 3.5” SAS drives with the minimum capacity of 20TB per drive, max. sustained transfer rate of 285 MB/s and MTBF of 2.5M hours. The drives must not use shingled magnetic recording (SMR); - the storage chassis is mounted on moving rails; - 2 redundant power supplies; - dual redundant SAS expanders providing at least 2 external 12Gb/s SAS ports per expander (prefer-ably 3 external 12Gb/s SAS ports per expander); - at least one IPMI LAN port full details of competition in main tender document available to download
