

Louth County Council Roost Site Water Quality Monitoring for the Narrow Water Bridge Project

Detailed description:

In advance of the main construction works, an advanced construction contract has been tendered to construct a roost site within the estuarine environment to provide a roost for wintering birds further remote from the main bridge works than the existing roost site. This contract is to undertake water quality monitoring in advance, during and after completion of this advanced construction contract to ensure that no impact on the water quality arises due to the works
