

MetroLink Insurance Advisory and Brokerage Services Framework

Detailed description:

Transport Infrastructure Ireland (TII) intends to establish a single-party framework agreement for the provision of insurance advisory and brokerage services primarily for the MetroLink Project under which services required by TII and/or the National Transport Authority (NTA) shall be drawn down under separate call-Off contracts. Subject to the advice of the Insurance Advisor in respect of the appropriate insurance model for the MetroLink Project, it is currently envisaged that an Insurer/Owner Controlled Insurance Programme ("OCIP") will be procured. In addition to planning and managing the OCIP, the Insurance Advisor will also have responsibility for identifying the accompanying provisions for insurances required to be incorporated into the core contracts for the delivery of MetroLink. All associated services are also to be provided as part of this service delivery. TII reserves the right to use this framework for other TII rail projects that are deemed suitable over the duration of the Framework.
