

Single Party Framework Agreement for the Supply of Topdressing Sand, Peat-Free Sand/Compost Mix & Related Materials to HRI & Subsidiaries

Detailed description:

Supply of Topdressing Sand Topdressing sand will be used for divot repair post racing and topdressing to aid recovery after heavy use. The sand will be applied using dropper machines or spreaders or by hand. The sand will be free draining and should encourage a stable surface. Topdressing will also be carried out to help create a seed bed prior to overseeding and will enhance consistency of surface and aid stabilisation. Supply of Peat-Free Sand/Compost Mix will be used for divot repair post racing to aid recovery after heavy use. The mix will be delivered by hand and bucket into divots. The mix will be free draining and should encourage a stable surface, encourage repair of the grass sward, and improve seed germination and establishment.
