

## **Inshore survey fleet maintenance and management**

### Detailed description:

Services required for vessel maintenance on 6 survey boats between 8 and 20m length. Services will include supply of repair and fabrication facilities along with replacement of specialist equipment including electronics/electrical and mechanical components. Maintenance schedules will also need to be managed and delivered for all systems including hull and machinery. Close cooperation and liason with the Client will be necessary for all work and services. The services need to be deliverable on a Nationwide basis either directly or sub contracted suppliers under the same terms of the contract. The value of the contract will be determined by the services drawn down and a ceiling of one million is the maximum allowed under the contract.
