

Supply and Implementation of an Occupational Health Software Solution

Detailed description:

The supply and implementation of an occupational health software solution, comprising: • Access to an established Software as a Service (SaaS) Occupational Health solution that will support the Irish Civil Service Office of the Chief Medical Officer. The solution will, a) ensure all data is secure, that access is limited to authorised personnel, that there is no overlap with other customer environments, or dependencies on resources used/applied in other customer environments and hosted in the EU/EEA, b) provide network connectivity to any cloud based infrastructure including the ability to extend private networking address spaces (as defined in RFC 1918 <https://tools.ietf.org/html/rfc1918>) • Implementation of the solution • Training Services for end users of the solution • Support Services associated with the solution.
