Tender for the Provision of FEA and CFD Analysis Software South East Technological University (SETU)

Detailed description:

provision of FEA and CFD Analysis Software for two years. 1. Engineering simulation software packages and associated licenses for performing engineering computer numerical modelling and analysis as listed in the pricing schedule as shown in Appendix 5. This list includes ANSYS software packages which utilise Finite Element Analysis (FEA), Computational Fluid Dynamics (CFD) as well as other numerical modelling, and engineering analysis, and design optimisation techniques. The list also includes license packages enabling software functionality such as high performance computing. 2. Customer support, maintenance, and latest software release updates for all supplied software packages and licenses. 3. Training for all supplied software packages and licenses at a dedicated and suitably equipped training facility in the Republic of Ireland.
