

Material Coring, Testing & Sampling Framework

Buyer: West Lothian Council

Description:

West Lothian Council is responsible for the maintenance and repair of all carriageways, footways, verges and remote footpaths within the public road network of West Lothian region. The Roads and Transportation department delivers an extensive programme of works, including carriageway surfacing and structural maintenance. A Material Coring, Testing & Sampling Framework is being created to enable materials testing to be undertaken prior to and during works. Services include: Coring on the existing carriageway network within West Lothian and the identification of the presence of coal tar within these cores. Sampling and testing of aggregates. Sampling and testing of soil materials and ground conditions including minor site investigation work and detection of voids. Testing of bituminous materials used during various carriageway resurfacing schemes throughout West Lothian (including surface dressing). Measurement and testing of thermoplastic road marking materials, Road pavement testing to determine residual characteristics. Sampling, testing and analysis of structural concrete and cementitious materials (includes both fresh and hardened materials). Sampling and testing of paint and coating materials used on structures. Provide reports and all test certificates. CPV: 45120000, 45214620, 45120000, 45214620, 45111250.
