6.3 Information regarding abbreviations, symbols and codes appearing on DD Form 1423 - The following information is provided to assist in understanding the intent of the requirement to provide a deliverable item to the government. The explanation of abbreviation, symbols and codes found in a block follows the block number as they appear on the DD Form 1423.

Block A: Is the actual contract line item no.

Block B: Is the actual collective physical list of the deliverable item(s) which are part of the total requirement of the contract/purchase order.

Block C: Is the category of data required, TDP is defined in MIL-T-31000. TM is defined in Part 1X, Section B of DODI 5000.2. NAVSUP-WSS has reasoned that most DD Form 1423's included in our solicitations meet the requirement of TDP as NAVSUP-WSS does not regularly purchase only Technical Manuals without purchasing hardware and related TDP software. Therefore, most NAVSUP-WSS DD Form 1423 category code will be TDP.

Block D: Is the name of the parent system, next higher assembly, or the item being purchased.

Block E: Is the purchase request number, request for proposal number, invitation for bid number or another number for tracking and monitoring purposes.

Block F: Is the successful offerors name and or cage code.

Block G: Is the name of the individual and or the code/activity of the individual who prepared the DD Form 1423 and included the requirement in the Technical Data Package (TDP).

Block H: Self explanatory.

Block I: Is the name and signature of the individual who approved the content and the need for inclusion of the DD Form 1423 in the TDP.

Block J: Self explanatory.

Block 1: Is the Exhibit Line Item Number (ELIN).

Block 2: Is the title of the data item cited in Block 4.

Block 3: Is the subtitle of the data item cited in Block 4 and is used if the title requires clarification.

Block 4: Is the actual Data Item Description (DID) number or the actual Technical Manual Contract Requirements Number. In the event the DD Form 1423 is requiring a technical manual the numbered TMCR will be an attachment to the contract/purchase order.

Block 5: Is the section and paragraph area, where the requirement statement for the DD Form 1423 will be found.

Block 6: Is the activity that will inform the contractor of approval, conditional approval or disapproval of the deliverable item.

Block 7: Is a code which designates authority for inspection and acceptance of the deliverable item. The definition of the codes is as follows:

DD Form 250 Code Inspection Acceptance

SS (1) (2)

DD (3) (4)

SD (1) (4)

DS (3) (5)

LT (6) (7)

NO (8) (8)

XX (9) (9)

(1) Inspection at source.

(2) Acceptance at source.

(3) No inspection performed at source. Final inspection performance at destination.

(4) Acceptance at destination.

(5) Acceptance at source. Acceptance based on written approval from the Contract Officer.

(6) Letter of transmittal only. LT should not be used when inspection is required. The data is sent by the contractor directly to the personnel listed in Block 14 of the DD Form 1423. LT is used when the contracting agency does not desire to have a DD Form 250 for each and every piece of data developed by the contractor.

The only other authorized use of LT is the special case where the contracting agency does not desire to have separate DD Forms 250 but desires to have a Government quality assurance representative perform inspection. The Government quality assurance representative shall be listed on the distribution in Block 14 and requested to provide comments via the quality assurance letter of inspection.

Use of the symbol LT is not authorized for data comprising final delivery of Technical Data Package or for Technical Manuals. (LT may, however, be used for delivery of preliminary TDP's or TM's).

(7) As specified in Block 8 of the DD Form 1423.

(8) No inspection or acceptance required. No DD Form 250 or letter of transmittal required.

Use of the symbol NO is not authorized for data comprising Technical Data Packages or for Technical Manuals.

(9) Inspection and acceptance requirements specified elsewhere in the contract.

Block 8: Is the approval code - Items of critical data requiring specific advanced written approval prior to distribution of the final data item will be identified by placing an "A" in this field. This data item requires submission of a preliminary draft prior to publication of a final document. When a preliminary draft is required, Block 16 of the DD Form 1423 will show length of time required for Government approval/disapproval and subsequent turn-around time for the contractor to resubmit the data after Government approval/disapproval has been issued. Block 16 will also indicate the extent of the approval requirements, e.g., approval of technical content and/or format.

Block 9: Is the distribution statement code which explains how the Government can circulate the deliverable item. The definition

of codes A, B, C, D, E, or F is as follows:

- A. Distribution of the item is unrestricted.
- B. Distribution of the item is limited to agencies only.
- C. Distribution of the item is limited to contractors with a cage code and have a DD Form 2345 on file with the DLA Logistics Information Services (DLIS) Battle Creek, Mich. or Government activities.
- D. Distribution of the item is limited to DOD activities and DOD contractors only.
- E. Distribution of the item is limited to DOD components only.
- F. Distribution of the item is restricted from Foreign Nations and Foreign Nationals.

Block 10: Is the frequency which the deliverable item is expected to be delivered to the Government. The abbreviations and their meaning.

ANNLY Annually
ASGEN As generated
ASREQ As required
BI-MO Every two months
BI-WE Every two weeks
DAILY Daily
DFDEL Deferred Delivery
MTHLY Monthly
ONE/R One time with revisions
QRTLY Quarterly
SEMIA Every six months
WEKLY Weekly
XTIME Number of times to be submitted
(1time, 2times...9times)

Use of these codes requires further explanation in Block 16 to provide the contractor with guidance necessary to accurately price the deliverable data item.

Other abbreviations not appearing on the above list may on occasion be used in Block 10 of the DD Form 1423. When other abbreviations are used they will be fully explained in Block 16 of the DD Form 1423.

Block 11: Is the last calendar date, expressed in year/month/day format, the deliverable item is to be received by the requiring office cited in Block 6 of the DD Form 1423 for an item with a Block 10 entry indication a single delivery. If the item is to be submitted multiple times, the number stated is the number of calendar days after the frequency cited in Block 10 the item is to be received by the requiring office cited in Block 6 of the DD Form 1423. On occasion the deliverable item will be required to be submitted prior to the end of the frequency cited in Block 6. In that event the requirement will be fully explained in Block 16 of the DD Form 1423.

Block 12: Is the date of first submission of the deliverable item to the requiring office (Block 4) expressed in year/month/day format. The abbreviations and their meaning are as follows:

ASGEN As generated

ASREQ As required

DAC Days after contract date

DFDEL Deferred Delivery

EOC End of contract

EOM End of month

EOQ End of quarter

Specific instructions for these requirements will be provided in Block 16. If the deliverable item is constrained by a specific event or milestone the constraint will be fully explained in Block 16 of the DD Form 1423. "As generated", "As required", and "Deferred Delivery" will always be fully explained in Block 16.

Block 13: Is the date of subsequent submission of the deliverable item, after the initial submission. Subsequent submission is only used to indicate the specific time period. The data is required when Block 10 of the DD Form 1423 indicates multiple delivery is required. This does not apply to resubmission of a deliverable item that has been reviewed by the requiring office and determined to be only conditionally acceptable or unacceptable.

Block 14a: Will contain the activity name(s) where the deliverable item is to be sent. If the activity is other than DCMA or NAVSUP-WSS the full name, address (including code) will be specified. That specific information will be located in Block 16 of the DD Form 1423.

Block 14b: Is the number of copies of draft and or final copies to be submitted. When final "Repro" copies are to be submitted Block 16 will clarify the type of Repro copies required. (e.g., vellum, negative, etc.)

Block 15: Is the total of each type of copies to be submitted as required by Block 14.

Block 16: Is the block used to provide additional or clarifying information Blocks 1 through 15. This block is also the only area used to tailor the document listed in Block 4. Only deletions to the minimum requirements stated in the document in Block 4 are allowed. Block 16 may also be used to specify the medium for delivery of the data.

Block 17: Is the block where the bidder or offeror is to enter the appropriate price group. The price groups are defined as follows:

A. Group I - Data which the contractor prepares to satisfy the Government's requirements. The contractor does not need this

type of data to perform the rest of the contract. Price would be based on identifiable direct costs, overhead, General and Administrative (G&A) and profit.

B. Group II - Data essential to contract performance which must be reworked or amended to conform to Government requirements.

The price for data in this group would be based on the direct

cost to convert the original data to meet Government needs and to deliver it, plus allocable overhead, G&A and profit.

C. Group III - Data which the contractor must develop for his own use and which requires no substantial change to conform to Government requirements regarding depth of content, format, frequency of submittal, preparation, and quality of data. Only the costs of reproducing, handling and delivery, plus overhead, G&A and profit, are considered in pricing data in this group.

D. Group IV - Data which the contractor has developed as part of his commercial business. Not much of this data is required and the cost is insignificant. The item should normally be coded "no charge." An example is a brochure or brief manual developed for commercial application which will be acquired in small quantities, and the added cost is too small to justify the expense of computing the charge that otherwise would go with the acquisition.

Block 18: Enter the total estimated price equal to that portion of the total price which is estimated to be attributable to the production or development for the government of that ITEM OF DATA. THE ENTRY "N/C" FOR "NO CHARGE" is acceptable.
