Repair Turnaround Time (RTAT) definition: The contractual delivery requirement is measured from asset Return to the date of asset acceptance under the terms of the contract. For purposes of this section, Return is defined as physical receipt of the F-condition asset at the contractor's facility as reflected in the Action Date entry in the Commercial Asset Visibility (CAV) system. In accordance with the CAV Statement of Work, the contractor is required to accurately report all transactions by the end of the fifth regular business day after receipt and the Action Date entered in CAV must be dated to reflect the actual date of physical receipt.

The Contractor must obtain final inspection and acceptance by the Government for all assets within the RTATs established in the subsequent contract.

Required RTAT: ## 119 days after receipt of asset.

Throughput Constraint: Contractor must provide a throughput Constraint for each NSN(s). Total assets to be repaired monthly after initial delivery commences X/month (contractor fill in #). A throughput of ## ____ per

month reflects no throughput constraint.

Induction Expiration Date: 365 days after contract award date. Any asset received after this date in days is not authorized for repair without bi-lateral agreement between the Contractor and NAVSUP WSS Contracting Officer.

Reconciliation: A reconciliation modification will be issued after final Inspection and acceptance of all assets inducted under the subsequent contract. The parties have agreed to a price (shown on the schedule page) for each unit at the negotiated RTAT. Such

prices are based on the Contractor meeting the RTAT requirements described within the schedule page. If the Contractor does not meet the applicable RTAT requirement, consideration will be assessed and subject to negotiation.

ALL CONTRACTUAL DOCUMENTS (I.E. CONTRACTS, PURCHASE ORDERS, TASK ORDERS, DELIVERY ORDERS AND MODIFICATIONS) RELATED TO THE INSTANT PROCUREMENT ARE CONSIDERED TO BE "ISSUED" BY THE GOVERNMENT WHEN COPIES ARE EITHER DEPOSITED IN THE MAIL, TRANSMITTED BY FACSIMILE, OR SENT BY OTHER ELECTRONIC COMMERCE METHODS, SUCH AS EMAIL. THE GOVERNMENT'S ACCEPTANCE OF THE CONTRACTOR'S PROPOSAL CONSTITUTES BILATERAL AGREEMENT TO "ISSUE" CONTRACTUAL DOCUMENTS AS DETAILED HEREIN.

Early and incremental deliveries accepted and preferred.

\

1. SCOPE

1.1 . Markings shall be in accordance with MIL-STD-130.

1.2 Articles to be furnished hereunder shall be repaired, tested and inspected in accordance with the terms and conditions specified in the Requirements Section of this document.

1.3 Unless expressly provided for elsewhere in this clause, equipment such as fixtures, jigs, dies, patterns, mylars, special tooling, test equipment, or any other manufacturing aid required for the manufacture and/or testing of the subject item(s) will not be provided by the Government or any other source and is the sole responsibility of the contractor. The foregoing applies notwithstanding any reference to such equipment or the furnishing thereof that may be contained in any drawing or referenced specification.

1.4 The use of MIL-W-81381 wire in any item to be delivered under this procurement is prohibited. The foregoing prohibition applies notwithstanding any reference to MIL-W-81381 wire that may be made in any of the drawings or specifications for this procurement. SAE-AS22759 series wire shall be used in lieu of MIL-W-81381 wire, in any place where MIL-W-81381 wire is cited in this procurement. Any questions concerning this requirement should be directed to the Procuring Contracting Officer.

1.5 If MIL-STD-454 is referenced in the drawings or in the specification, the contractor is expected to show compliance with IPC/EIAJ-STD-001C Personnel performing tasks in accordance with IPC/EIAJ-STD-001C shall be trained and certified as required by IPC/EIAJ-STD-001C paragraph 5.1.4.

2. APPLICABLE DOCUMENTS - NOT APPLICABLE

3. REQUIREMENTS

The contractor shall maintain a quality control system which meets the requirements of Mil-I-45208A, Mil-Q 9858, ISO-9000 / 9001 / 9002 or equivalent.

RESPONSIBILITY FOR INSPECTION: Unless otherwise specified, the contractor is responsible for the performance of all inspection requirements as specified

herein. Except as otherwise specified, the contractor may use his own or any other facility suitable for the performance of the inspection requirements specified herein.

PROCEDURES: The contractor shall prepare and maintain Quality Control

Documentation, test and repair procedures, and inspection procedures which shall be made available to the Government for review and approval. The procedures shall include sequential diagrams of the test, repair, and

inspection process, as well as the performance specifications to perform the procedures.

QUALITY ASSURANCE PROGRAM PLAN: The contractor shall develop, implement and maintain a Repair Quality Plan in compliance with the requirements of Mil-I-45208A, Mil-Q-9858, ISO,9000 / 9001 / 9002, or equivalent. The plan shall define the specific methods by which compliance with contractual requirements will be assured. All quality assurance data shall be provided to the Government for review and approval upon request.

PURCHASED MATERIAL CONTROL: The contractor shall establish and maintain a system of control over purchased material which shall assure that the necessary requirements of this contract are included in all sub contract agreements. A parts control system shall establish a record of performance for each purchased and internally manufactured part and shall be used to evaluate continued use of the source. The contractors control system shall be in compliance with either Mil-I 45208A/Mil-Q-9858 or equivalent Quality Quality Assurance Standard.(ISO/AS:9000, 9001, 9002).

RECEIVING INSPECTION OF PURCHASED MATERIAL: Purchased items shall be inspected upon receipt at the contractors facility to assure conformance with all requirements of the Technical Data Package (TDP).

Evidence of such inspections shall be maintained for

Government review at least twelve (12) months following acceptance of the end item. Inspection reports shall be maintained by the contractor. The inspection report shall, at a minimum, include a record of all dimensional data (coordinate/positional), material,

finish, and process with appropriate pass/fail criteria, such as certifications, and actual dimensional readings.

FAILURE ANALYSIS AND CORRECTIVE ACTION: All failure analysis and corrective action reports/plans shall be submitted to the Government.

NONCONFORMING MATERIAL: The contractor shall establish an effective system for controlling nonconforming material including procedures for identification, segregation, and disposition.

CONTRACTOR INTERNAL REVIEW BOARD (IRB): IRB authority is delegated to the contractor for this contract only. The IRB may be used only for disposition of materials exhibiting minor non-conformances, scrap or rework to return a part to conformance with drawings or

specifications as authorized by the approved repair procedures. IRB shall not use "AS-IS" disposition. A complete file of IRB actions shall be maintained for review by the Government for concurrence of classification.

MATERIAL REVIEW BOARD (MRB): Formal MRB authority for disposition of "AS-IS" and for minor non-conformances is retained by the Government. The contractor shall submit the appropriate request for Waiver/Deviation via the DCMC to the NAVICP Contracting Officer.

RESPONSIBILITY FOR COMPLIANCE: All items must meet all requirements of this Statement of Work. The inspection requirements set forth in this SOW shall become part of the contractors overall inspection system or quality program. The absence of any inspection

requirements in the SOW shall not relieve the contractor of the responsibility of assuring that all Government equipment submitted for acceptance comply with all requirements. Sampling in quality conformance does not authorize submission of known defective

items, either indicated or actual, nor does it commit the procuring activity to acceptance of any defective items.

REPAIR ASSESSMENT TESTING: The Government may select samples of the Contract Line Items (CLINs) which have completed repair and have been accepted by the Government representative for the purpose of conducting performance testing, environmental testing, and

quality conformance examination in a repair assessment test program. A quantity of CLINs may be randomly selected from each quarterly repair production completion for shipment to the CFA or other Government designated location to conduct this testing.

RECORDS OF DATA COLLECTION: The contractor shall maintain a historical record file to contain copies of applicable data and documents for individual CLINs and assemblies by CLIN serial number. The historical record file shall include, but not be limited to the

following types of historical records:

Receipt inspection documentation.

Repair shop travelers or repair cards.

Parts replacement records.

Parts inspection data before and after repair as applicable.

Acceptance test data.

QA personnel shall maintain a complete receipt inspection, test, repair re-test, history card for each item processed. This information shall be made available to the Government upon request.

3.1 1.0 GENERAL

3.1.1 This Statement of Work (SOW) establishes the criteria for repair and testing /inspection of the subject item. It includes inspection, component repair and replacement, reassembly and testing procedures required to return units back into a servicable condition.

3.2 2.0 DEFINITIONS.

3.2.1 CONTRACTOR: Is defined as the successful offeror awarded a contract, order or issued a project work order. The term "contract" encompasses a contract, an order, or a project work order.

3.2.2 OVERHAUL: An overhauled part is one which has been disassembled, cleaned, inspected, repaired as necessary (by replacing or repairing all components which have been found to exceed limits established by the repair/overhaul manual) reassembled and tested

in accordance with the approved repair/overhaul manual listed in this SOW and returned to a Ready for Issue (RFI) condition (Refer to contract schedule for items to be overhauled).

3.2.3 REPAIR: A repaired part is one which has been restored to a Ready for Issue (RFI) condition (by replacing or repairing those components found to be defective, broken, damaged or inoperative during the initial evaluation and troubleshooting phase) and

tested in accordance with the approved repair/overhaul manual listed in this SOW (Refer to contract schedule for items to be repaired).

3.3 3.0 SCOPE

3.3.1 GENERAL. The items to be furnished hereunder shall be overhauled, upgraded, repaired, tested, inspected, and accepted in accordance with the terms and conditions specified in this contract. Unless expressly provided Government Furnished Property,

including equipment such as fixtures, jigs, dies, patterns, mylars, special tooling, special test equipment, or any other manufacturing aid required for the repair, manufacture, and/or testing of the subject item(s) will not be provided by the Government and

shall be the responsibility of the contractor. The foregoing applies notwithstanding any reference to such equipment or the furnishing thereof that may be contained in any drawing, manual, or specification for the contract items.

3.3.2 REPAIR UPGRADE REQUIREMENTS: The contractor shall provide the necessary facility, labor, materials, parts, and test and tooling equipment required to return the following items to a Ready For Issue (RFI) condition:

ACTUATOR, MECHANICAL ;8681; P/N, ;014833223; NSN, ;IAW applicable repair manuals.; Tech Publications

3.3.3 RFI is defined as that condition allowing the items to perform properly and reliably in an operational environment in a manner they were intended to operate. The contractor must perform all repairs/upgrades at the facility identified within this SOW.

Repairs performed by the contractor or subcontractor shall be performed in accordance with the specified drawings and repair manual(s).

3.4 Changes to such manuals used for repairs under this contract, or changes to drawings or specifications used in the manufacture of parts utilized in these repairs, require Procuring Contracting Officer (PCO) approval in accordance with the Configuration

Management provisions of this Statement of Work or contract. Under no circumstances should the repair, test, and inspection extend beyond the requirements of this paragraph unless authorized by the Government QAR. In addition, requests for approval of changes to a repair source or repair facility shall be submitted in writing to the PCO prior to making any such change.

3.4.1 Any repairs performed using unapproved changes to such manuals, drawings, specifications, or changes to repair source or facility are done at the contractor's own risk. If the Government disapproves the requested change, the contractor shall replace any delivered items repaired using such unapproved manuals, drawing, specification, repair source or repair facility change. The contractor is not entitled to any equitable adjustment to the contract price or terms based on the Government's disapproval of a requested change to manuals, drawings, specifications, or to a repair source or facility.

3.4.2 References on Drawings and Specifications: For repair and overhaul purposes only. All references to the "prime contractor" or the "actual manufacturer" appearing on the drawings and / or specifications or technical data furnished by the Government shall be read as the "Government Designated Agency"

3.4.3 Process Control Documentation: The contractor shall prepare and maintain repair procedures, and test / inspection information / procedures which shall be made available to the Government for review and approval. The procedures shall include sequential diagrams of processes, as well as the performance specifications to perform the testing / inspection procedures. Those processes shall be frozen after approval of the inspection / Test.

3.4.4 Beyond Economical Repair (BER). An item is BER if the cost of the repair exceeds 75% of the production quantity price to replace the item, current at time of award. This replacement price is for the purposes of BER determinations only, and may not be used or relied on by the offeror in the pricing of the repairs required by this contract. Items determined BER are not included in the contract price. The contractor shall obtain written concurrence from DCMA for all units determined by the contractor to be BER. All such determinations, including the basis for the determination, the repair required, the proposed price to repair and the DCMA written concurrence shall be provided by the contractor to the PCO, with a copy to the inventory manager. After receipt of the required documentation, the PCO shall provide the contractor disposition instructions or contractual authority for repair of the item. The contractor is not authorized to proceed with the repair until notification to proceed is received from the PCO. Any disposal ordered shall be performed by the contractor in accordance with all applicable regulations and in accordance with all DCMA disposal procedures and requirements.

3.4.5 Missing on Induction (MOI). A Weapons Repairable Assembly (WRA) is subject to this MOI provision if the item received by the contractor for repair is missing one or more Shop Replaceable Assemblies (SRAs). Contractor replacement of MOI SRAs is not included in the contract price. The contractor shall immediately notify DCMA when an item is received with MOI SRA(s) and shall obtain written verification from DCMA for all WRAs determined to have MOI SRA(s). The contractor shall provide all such determinations, including identification of the missing SRA(s), and the DCMA written verification, to the Inventory Manager with a copy to the PCO and ACO prior to induction and/or repair of the WRA. The contractor shall not induct and/or repair WRAs with MOI SRAs until instructions on how to proceed are provided to the contractor by the Inventory Manager (where no adjustment price to the contract is required) or by the PCO. Items received by the contractor missing consumable parts are not MOI items. Rather, repair of such items and replacement of the missing consumable parts are included in the contract price and the item shall be inducted and repaired by the contractor under this contract.

3.4.6 Replacing Failed or Missing Shop Replaceable Assembly (SRA) when repairing a Weapons Replaceable Assembly (WRA).

3.4.7 A. When the contractor believes one or more SRA(s) within a WRA are either:

3.4.8 Beyond Economic Repair (BER) or Beyond Repair (BR) i. e. the unit is not capable of being repaired because of the extent of physical damage), or Missing on Induction (MOI), the contractor shall obtain written verification from DCMA and advice from the

Inventory Manager whether a SRA may be replaced by one or more of the following options: Ship in place from an existing spares or repair contract, if any, MILSTRIP the SRA(s), otherwise be provided direction for obtaining the SRA(s) at no cost to the

contractor. The detailed procedures are set forth in Section 6.0 of the WEB-BASED COMMERCIAL ASSET VISIBILITY (CAV) STATEMENT OF WORK.

3.4.9 B. When not otherwise provided for (or precluded) by other terms of this contract, the contractor may seek written authorization to replace failed SRA(s) with Ready For Issue SRA(s). When authorized, the procedures set forth in paragraph 3.0 of Section

6.2 of the WEB-BASED COMMERCIAL ASSET VISIBILITY (CAV) STATEMENT OF WORK shall be followed.

3.4.10 Over and Above Repair (OAR). An item sent to the contractor shall be considered to require over and above (OAR) repair effort if the repair required is not the type of repair that would be anticipated as a result of normal Navy operation of the item and

is not included in the contract pricing due to the nature or scope of the repair needed for that particular item. Therefore, repair of OAR items may be subject to equitable adjustment. The Contractor shall obtain written concurrence from DCMA for all units

determined by the contractor to require OAR effort. All such OAR determinations, including the basis for the determination, the repair required, the proposed price to repair and the DCMA written concurrence, shall be provided by the contractor to the PCO prior to undertaking repair of the item.

After receipt of the required documentation, the PCO shall provide the contractor disposition instructions or contractual authority for repair of the item. Any ordered disposal shall be performed by the contractor in accordance with all applicable regulations and DCMA disposal procedures and requirements.

3.5 4.0 PARTS AND MATERIALS

3.5.1 General. The contractor is responsible for supplying all parts and material necessary to perform the required repairs under this contract unless parts or material are specifically identified as Government Furnished Material (GFM). All parts and material used in performance of this contract shall be in accordance with the latest approved revision of applicable drawings and specifications and shall be new in accordance with FAR 52.211-5, Material Requirements, which is incorporated by reference herein.

Authorization to use other than new material as defined by FAR 52.211-5 requires written approval from the PCO. In addition, cannibalization must be approved by the PCO. Cannibalization of units that have not been inducted is not typically authorized and requires specific approval by the PCO.

3.5.2 The contractor shall ensure it has access for the duration of this contract to updated drawings and specifications for parts and material required for repairs performed under this contract. Any change to such parts/material drawings or specifications requires Government approval in accordance with the Configuration Management provisions of this Statement of Work. Written approval from the PCO must be obtained prior to any change to the manufacturing source or manufacturing facility for all parts which

require source approval, unless the contractor is the Design Control Agent (DCA) (i.e. the entity responsible for maintaining the latest configuration data) for the the contract item. If the contractor is the DCA, the contractor may approve changes to manufacturing source or manufacturing facility for all parts, including those which require source approval. Any repairs performed using unapproved changes to such drawings, specifications or manufacturing source or

facility are done at the contractor's own

risk. If the Government disapproves the requested change, the contractor shall replace any delivered items repaired using such unapproved change. The contractor is not entitled to any equitable adjustment to the contract price or terms based on the

Government's disapproval of a requested change to the drawings, specifications or manufacturing source or facility.

3.5.3 Purchased Material Control and Parts Control. The contractor shall establish and maintain a system of control over purchased parts and material. Such controls shall, at a minimum, assure that the parts and material purchased are in compliance with the requirements of this contract.

3.5.4 Receiving Inspection of Purchased Parts and Material. (1) Purchased items shall be inspected upon receipt at the contractor's facility to assure conformance with all requirements of the applicable drawings and specifications or (2) the contractor shall

provide prior to the contract award evidence for Government review and approval of a purchased parts and material system which provides for the inspections to assure conformance with all requirements of the applicable drawings and specifications. Evidence of

such inspections of such inspections shall be maintained by the contractor or subcontractor for Government review. The inspection report shall, at a minimum, include a record of all dimensional data

(coordinate/positional), material, finish, and process with appropriate pass/fail criteria such as certifications and actual dimensional readings.

3.5.5 **NOTE PART CANNIBALIZATION IS NOT AUTHORIZED UNLESS SPECIFICALLY APPROVED BY NAVSUP WSS AND THE BDE.**

3.5.6

3.6 SOURCE AND LOCATION OF REPAIR SOURCE:

3.6.1 The contractor shall specify the name of the Source/Division performing the work and the actual location where work will be performed.

ACTUATOR, MECHANICAL ; CEF Industries; Company Name , ; 320 S Church St, Addison, IL 60101-3750; Address , ; 00268; Cage Code

inspection will be accomplished on the contractor's equipment

3.7 5.0 CONTRACTOR QUALITY REQUIREMENTS:

3.7.1 Quality Program. The Contractor shall establish, implement, document and maintain a quality system that ensures conformance to all applicable requirements of ISO 9001/ SAE AS9100. The Contractor's quality management system/program shall be designed to

promptly detect, correct and prevent conditions that adversely affect quality.

3.7.2 Calibration System Requirements. Contractor shall maintain a calibration system that meets the requirements of ANSI/NCSL Z540.3, ISO-10012-1 or an equivalent calibration program acceptable to the Government.

3.8 6.0 CONFIGURATION MANAGEMENT (CM):

3.8.1 The contractor shall maintain a configuration management plan in accordance with the provisions of NAVSUP WSS configuration management clause NAVICPIA18. (Refer to contract).

3.9 7.0 MARKINGS.

3.9.1 Marking shall be as indicated in the contract when applicable.

3.10 8.0 STORAGE;

3.10.1 The contractor shall provide a proper enclosed warehouse environment for both material items awaiting repair and assets which have been repaired and are awaiting shipment to ensure the items are not damaged while being stored.

4. QUALITY ASSURANCE PROVISIONS - NOT APPLICABLE.

5. PACKAGING- MIL-STD 2073 PACKAGING APPLIES AS FOUND ELSEWHERE IN THE SCHEDULE
