

Provision of Mobility as a Service (MaaS) solution

Buyer: West of England Combined Authority

Description:

The MaaS Solution provides the opportunity to deliver a single platform for the West of England area, providing a simplified offer to customers with the ability to access the best fares and remove barriers to use of public transport, and support the delivery of our BSIP and the vision and aims of the National Bus Strategy. The vision for the West of England CA MaaS project is: The West of England CA's MaaS Solution should collaboratively deliver a regional multi-modal journey planning, booking, ticketing, payment and information solution.

We recognise that MaaS (as a solution) can be interpreted in many different ways, technically, operationally and crucially from a customer point of view. For the purposes of this specification and development, deployment and refinement of MaaS in the West of England, we define it as “a platform that, together with associated stakeholder and management services, allows residents and visitors to the West of England to plan, book and pay for single mode and multi-modal journeys across the region, with a simple and personalised interface, based on their specific preferences, needs and behaviours, but also using techniques to encourage the use of low carbon and more sustainable travel modes where practicable”

Country:

United Kingdom

Published date:

Mar 18 2022
