3. Background

3.1 Introduction to SIDBI

Small Industries Development Bank of India (SIDBI), set up on April 2, 1990 under an Act of Indian Parliament, acts as the Principal Financial Institution for the Promotion, Financing and Development of the Micro, Small and Medium Enterprise (MSME) sector and for Co-ordination of the functions of the institutions engaged in similar activities. Financial support to MSMEs is provided by way of (a) indirect finance / refinance to eligible Primary Lending Institutions (PLIs), such as, banks, State Financial Corporations (SFCs), etc. for onward lending to MSMEs and (b) direct assistance in the niche areas with thrust on MSEs.

3.2 National Portal for Indian Start-up Ecosystem

The necessity of start-ups to receive external aid for its growth cannot be stressed enough. Without external aid, start-ups cannot reach its full potential in this highly competitive global market. Funding plays a key role in formulating long-term goals and perspectives which will ensure the success and inverse development of the businesses. Despite of India being home to 3rd largest number of most valued start-ups (unicorns), India also is a complex opportunity for non-funded start-ups. As per sources, less than 10,000 start-ups are funded i.e. 80% of recognised start-ups are un-funded.

An estimated of Rs. 85,000 crores have been invested in Indian start-ups in 2020 of which only Rs. 1,200 crores (less than 2%) have been below the ticket size of Rs. 5 crores which further emphasis that the funding for early-stage start-ups is very limited and need of the hour.

As per estimations, only 15% of government funding (under various Central and State Government Schemes for start-ups) is actually deployed. Also, there are just 6,000 angel investors in India compared to over 300,000 in the USA. To create an enabling, vibrant and active ecosystem of investments in Indian start-ups, it is important to develop a one-stop National Portal for Indian Start-up Ecosystem funding platform for startups.

SIDBI envisages to develop a National Portal for Indian Start-up Ecosystem funding platform for startups with the following key features for enabling access to capital to entire spectrum of startups – from ideation stage right up to growth stage.

- I. Aggregation and onboarding of all types of investment channels for startups including:
 - a) Central Government Schemes
 - b) State Government Schemes
 - c) Angel investors
 - d) Venture Capital
 - e) Alternative Investment Funds (AIFs)
 - f) Other funding sources
- II. Accessibility to various kinds of funding including:

- a) Equity
- b) Debt
- c) Grants

This RFP is being floated for Development of National Portal for India Startup Ecosystem for unlocking the needed capital for expansion of Indian startup ecosystem.

The platform should be open (standards, open API, plug-n-play capabilities), components coupled loosely to allow changes in sub-system level without affecting other parts, architected to work completely within a heterogeneous compute, storage, and multi-vendor environment. The platform should be robust enough to handle continuous changes.

4.4.2 Provision of a Sustainable, Scalable solution

The motive of this platform is to provide a system that would be sustainable for the next few years. The expectation is that the system should sustain at least 10 years from Go-Live. The solution would be done keeping in mind the scalability of the system. The simplified processes and ease of compliance is expected to lead to huge growth in contract's base.

4.4.3 Security & Privacy

Security and privacy of data should be fundamental in design of the system without sacrificing utility of the system. When creating a system of this scale, it is imperative that handling of the sensitivity and criticality of data are not after-thoughts but designed into the strategy of the system from day one.

4.4.4 SLA driven Approach

System should be available 24*7 covering all the business functionalities. Downtime should be responded based on the criticality of the issue, below factors to be considered on response:

- Maximum time that can be taken to fix the problem & release the same into production

Data from connected smart devices to be readily available (real-time), aggregated, classified and stored, so as not to delay the business processes of monitoring and decision making. Smart Devices means any such software/ hardware with which the Portal may be connected through API, based on evolving requirement

Readily available and consumed device data will facilitate timely access of analytics reports at every level.

4.4.5 Data Distribution Service

As a future roadmap it is envisaged that the functionalities provided by the system should be available as services that could be offered to other stakeholders on request. Keeping this in mind the system shall be able to provide data on subscription- publication basis. The organization of the information exchange between modules is fundamental to publish-subscribe (PS) systems. The PS model connects anonymous information producers (publishers) with information consumers (subscribers).

The functionality and architecture will be discussed during implementation of the project and separate change request shall be considered by SIDBI. However, it is clarified that SIDBI shall not incur any further cost for the said change request apart from the one quoted in Commercial Bid by the bidder.
