> (Open Tender Two Part ) (E-TENDER) (Through NIC)

#### SPECIFICATION: SE/M/GTS/OT- 03 / 2022-23

OFFICE OF THE CHIEF ENGINEER GAS TURBINE SCHEMES 144, ANNA SALAI CHENNAI-600 002 TAMIL NADU.

Service Provider: NIC Limited, Website for online bid submission https://tntenders.gov.in/nicgep/app

# INSTRUCTION TO BIDDERS FOR SUBMISSION OF ONLINE BIDS IN E-TENDER

#### **Instructions for Online Bid Submission**

The bidders are required to submit soft copies of their bids electronically on the <u>https://tntenders.gov.in/nicgep/app</u>, using valid Digital Signature Certificates. The instructions given below are meant to assist the bidders in registering on the portal, prepare their bids in accordance with the requirements and submitting their bids online.

More information useful for submitting online bids on the portal may be obtained at <u>https://tntenders.gov.in/nicgep/app</u>.

#### REGISTRATION

- 1) Bidders are requested to enroll on the e-procurement module of the Tamil Nadu Tenders procurement portal <u>https://tntenders.gov.in/nicgep/app</u> by clicking on the link "**on line bidder Enrollment**" which is free of charge.
- 2) As part of the enrolment process, the bidders will be required to choose a unique username and assign a password for their accounts.
- 3) Bidders are advised to register their valid email address and mobile numbers as part of the registration process .These would be used for any communication from the portal.
- 4) Upon enrolment, the bidders will be required to register their valid Digital Signature Certificate (Class II or Class III certificates with signing key usage) issued by any Certifying Authority recognized by CCA India (e.g.Sify/nCode/eMudhra etc), with their profile.
- 5) Only one valid DSC should be registered by a bidder. Please note that the bidders are responsible to ensure that they do not lend their DSC 's to others which may lead to misuse.
- 6) Bidder then log in to the site through the secured log-in by entering their user ID/password and the password of the DSC/e-Token.

# SEARCHING FOR TENDER DOCUMENTS

- There are various search operations built in the <u>https://tntenders.gov.in/\_nicgep/app</u> to facilitate bidders to search active tenders by several parameters. These parameters could include Tender ID, Organisation Name, Location, Date, Value,etc. There is also an option of advanced search for tenders, wherein the bidders may combine a number of search parameters such as Organization Name, Form of Contract, Location, Date, Other key words etc to search for a tender published on the CPP portal.
- 2) Once the bidders have selected the tenders they are interested in, they may download the required documents/tender schedules. These tenders can be moved to the respective 'My Tenders' folder. This would enable to intimate the bidders through SMS/e-mail in case there is any corrigendum issued to the tender documents.
- 3) The bidder should make a note of the unique Tender ID assigned to each other in case they want to obtain any clarification/help from the Helpdesk.

#### **PREPARATION OF BIDS:**

- 1) Bidder should take in to account any corrigendum published on the tender document before submitting their bids.
- 2) Please go through the tender advertisement and the tender document carefully to understand the documents required to be submitted as part of the bid. Please note the number of covers in which bids documents have to be submitted, the number of documents – including the names and content of each of the document that need to be submitted. Any deviations from these may lead to rejection of the bid.
- 3) Bidder, in advance, should get ready the bid documents to be submitted as indicated in the tender document /schedule and generally they can be in PDF/XLS/RAR/DWF/JPG formats. Bid documents may be scanned with 100 dpi with black and white option which helps in reducing size of the scanned document.
- 4) To avoid the time and effort required in uploading the same set of standard documents which are required to be submitted as part of every bid, a provision of uploading such standard documents (e.g PAN card copy, annual reports,

auditor certificates etc) has been provided to the bidders .Bidders can use "My Space" or "Other Important Documents" area available to them to upload such documents. These documents may be directly submitted from the "My Space" area while submitting a bid, and need not be uploaded again and again. This will lead to a reduction in the time required for bid submission process.

#### SUBMISSION OF BIDS:

- 1) Bidder should log in to the site well in advance for bid submission so that they can upload the bid in time i.e on or before the bid submission time. Bidder will be responsible for any delay due to other issues.
- 2) The Bidder has to digitally sign and upload the required bid documents one by one as indicated in the tender document.
- 3) Bidder has to select the payment option as "offline" to pay the tender fee/EMD as applicable and enter details of the instrument.
- 4) Bidder should prepare the EMD as per the instructions specified in the tender document.
- 5) Bidder is requested to note that they should necessarily submit their financial bids in the format provided and no other format is acceptable. If the price bid as a standard BOQ format with the tender document, then the same is to be download and to be filled by all the bidders.

Bidders are required to download the BOQ file, open it and complete the white coloured (unprotected ) cells with their respective financial quotes and other details (such as name of the bidder).No other cells should be changed. Once the details have been completed, the bidder should save it and submit it online, without changing filename. If the BOQ file is found to be modified by the bidder, the bid will be rejected.

6) The server time (which is displayed on the bidder's dashboard) will be considered as a standard time for referencing the deadline for submission of the bids by the bidders, opening of bids etc.,. The bidder should follow this during bid submission.

- 7) All the documents being submitted by the bidders would be encrypted using PKI encryption techniques to ensure the secrecy of the data. The data entered cannot be viewed by unauthorized persons until the time of bid opening. The confidentiality of the bids is maintained using the secured Socket Layer 128 bit encryption technology. Data storage encryption of sensitive fields is done. Any bid document that is uploaded to the server is subjected to symmetric key. Further this key is subjected to asymmetric encryption using buyers/bid openers public keys. Overall, the uploaded tender documents become readable only after the tender opening by the authorized bid openers.
- 8) The uploaded tender documents become readable only after the tender Opening by the authorized bid openers.
- 9) Upon the successful and timely submission of bids (ie after Clicking "Freeze Bid Submission" in the portal ),the portal will give a successful bid submission message & a bid summary will be displayed with the bid no. and the date & time of submission of the bid with all other relevant details.
- 10) The bid summary has to be printed and kept as an acknowledgement of the submission of the bid. This acknowledgement may be used as an entry pass for any bid opening meetings.

#### **ASSISTANCE TO BIDDERS**

- 1) Any queries relating to the tender document and the terms and conditions contained therein should be addressed to the Tender Inviting Authority for a Tender or the relevant contact person indicated in the tender.
- 2) Any queries relating to the process of online bid submission or queries relating to <u>https://tntenders.gov.in/</u>nicgep/app in general may be directed to the 24X7 Helpdesk of the portal.

#### SYSTEM REQUIREMENT:

- i) Operating System Windows XP-SP3 & above
- ii) Firefox/Internet browser IE7 and above
- iii) Signing type digital signature
- iv) JRE 7 update 79 (Preferred file- Windows X-86 Offline) and above to be Downloaded and installed in the system

To enable ALL active X controls and disable 'use pop up blocker' under Tools  $\rightarrow$  Internet Options  $\rightarrow$  custom level.

# <u>SECTION - I</u>

# EARNEST MONEY DEPOSIT

 Tenderer should pay the specified amount towards Earnest Money Deposit as follows: Earnest Money Deposit : Rs.80,000/- (Rupees Eighty five Thousand and four hundred only)

2) The Earnest Money Deposit specified above should be in the form of NEFT/RTGS as mentioned above in 5 of Foreword for the above amount. Scanned copy of the E-receipt duly reflecting the UTR Number shall be uploaded. The EMD amount has to be received in TNEB/TANGEDCO account through e-payment, 2 hours before closing time of tender. EMD amount received beyond tender closing time will be summarily rejected.

3) The Tenderers who are having valid Permanent EMD with TNEB/TANGEDCO for an amount of Rs.20 Lakhs and above are exempted from payment of Earnest Money Deposit and are eligible to participate in the tender.

Firms who have PEMD less than specified above are not eligible to participate on the basis of the PEMD deposited by them even for lesser quantity and value.

If the Tenderer desires to become a Permanent E.M.D. holder, he is advised to deposit the required amount with the TANGEDCO as Permanent E.M.D. well in advance, obtain a certificate from the CFC/General and enclose copy of the same along with the tender offer as mentioned in Clause-2 above.

4) The EMD will not carry any interest.

5) The Earnest Money Deposit will be refunded to the unsuccessful tenderers on application to the Superintending Engineer/ Mech/Gas Turbine Schemes, after intimation of the rejection/ non-acceptance of their tender is sent to them.

# 6) Any other mode of payment of EMD other than NEFT/RTGS shall not be accepted towards EMD and the tenders shall be rejected if EMD is not paid in the prescribed manner. EMD may also be paid by Account Transfer.

7) (i) The following categories of Industries are exempted from payment of EMD.

- a) The Small Scale Industrial Units located within the State and registered with the Tamil Nadu Small Industries Development Corporation.
- b) The Small Scale Industrial Units registered with the National Small Industries Corporation
- c) The SSI Units holding Acknowledgement issued for entrepreneur memorandum Part-II obtained from the District Industries Centre in respect of those items for which registration certificate /Acknowledgement has been issued.
- d) Departments of the Government of Tamil Nadu.
- e) Undertakings and Corporations owned by the Government of Tamil Nadu.
- f) Labour Contract Co-operative Societies.
- g) Tiny Industries classified as S.S.I. registered with the State of Tamil Nadu and registration Certificate issued by the Department of Industries and Commerce/Government of Tamil Nadu in respect of those items covered under

Registration Certificate.

- h) Small Scale Industrial Units located outside the State and such of those units registered with National Small Industries Corporation in respect of those items covered under Registration Certificate.
- i) UAM submitted by bidders may also be considered for EMD exemption.
- j) Micro and small scale industries registered in Udyam Portal are also exempted.
- k) The enterprises registered prior to 30.06.2020 as SSI units should register in Udyam registration portal for claiming EMD exemption in respect of tenders to be opened on or after 01.04.2022.

8) SSI units having provisional registration Certificate are not eligible for exemption, from payment of EMD.

9) Those tenderers who are exempted from payment of EMD will have to pay as penalty an amount equivalent to EMD along with costs if any, in the event of nonfulfillment or non-observance of any of the conditions stipulated in the contract consequent to such breach of contract i.e. in all cases where EMD paid will be forfeited. The GST applicable shall also be paid by the bidder to TANGEDCO.

10) Small Scale Industries registered within the State of Tamil Nadu shall upload duly attested Photostat copy of their Entrepreneur Memorandum Part-II and acknowledgement for the Entrepreneur Memorandum Part-II issued by DIC, subject to the material tendered has been furnished in Format-II or the photocopy of valid registration certificate issued by NSIC for small scale industrial unit for subject materials specifying capacity for which they are permitted to manufacture and the period of validity of the certificate as proof of eligibility for exemption of EMD.

11) Others viz. Central and other State Government Departments/ Undertakings and Corporations other than those in Tamil Nadu shall have to pay Earnest Money Deposit and Security Deposit.

12) The tenderers shall upload the audited attested copy of Profit and Loss account, Balance Sheet along with the proof for exemption from payment of EMD.

In case the investment held by the tenderer in Plant and Machinery as per their financial statement of Accounts exceeds Rs.5 Crores, the General Manager, District Industries Centre concerned will be requested to verify the SSI status of the firm. Till receipt of confirmation from General Manager/District Industries Centre concerned, the exemption from paying EMD for SSI Units will not be extended.

#### 13) UDYAM REGISTRATION - UDYAM REGISTRATION - EXEMPTION FROM PAYMENT OF EMD UNDER MSMED ACT 2006 - RECLASSIFICATION OF ENTERPRISES.

Government of India, Ministry of MSME, vide Notification No.S.O.2119(E) dated 26.06.2020 has notified certain composite criteria for classifying the enterprises as Micro, Small and Medium Enterprises and insisted Udyam registration in "Udyam Registration Portal" to obtain an e-certificate viz. Udyam Registration Certificate.

**Composite Criteria:** A composite criteria of investment in Plant and Machinery or equipments and turnover has been specified to classify an enterprises as Micro, Small and Medium. The composite criteria stipulated in the said notification are to be complied by the micro and small industries for claiming EMD exemption and purchase preference in TANGEDCO's tenders floated from 01.07.2020 onwards.

**Classification of Enterprises:** An enterprise shall be classified as a micro, small or medium enterprises on the basis of the following criteria, namely:

- (i) A micro enterprise, where the investment in plant and machinery or equipment does not exceed one crore rupees and turnover does not exceed five crore rupees;
- (ii) a small enterprise, where the investment in plant and machinery or equipment does not exceed ten crore rupees and turnover does not exceed fifty crore rupees; and
- (iii) a medium enterprise, where the investment in plant and machinery or equipment does not exceed fifty crore rupees and turnover does not exceed two hundred and fifty crore rupees.

#### Calculation of Turnover:

In calculation of turnover of an enterprise, Exports of goods or services or both, shall be excluded while calculating the turnover of any enterprise whether micro, small or medium, for the purposes of classification.

However, it is suggested to insist a certificate from Chartered Accountant, along with the bid from the bidders whose turnover includes export proceeds, for ascertaining the turnover achieved on export of goods or services or both and included in the total turnover.

#### **Calculation of Investment:**

The Plant and Machinery shall have the same meaning as assigned to the plant and machinery in the Income Tax Rules, 1962 framed under the Income Tax Act, 1961 and shall include all tangible assets (other than land and building, furniture and fittings). The cost of certain items specified in the Explanation I to sub-section (1) of section 7 of the Act shall be excluded from the calculation of the amount of investment in plant and machinery.

The investment value in Plant and Machinery for the purpose has to be certified by a Chartered accountant and the same is to be uploaded in the bid in case the bidder claims EMD exemption.

#### **Registration of existing enterprises:**

- i. All existing enterprises registered under EM-Part-II or UAM shall register again on the Udyam Registration portal on or after the 1st day of July, 2020.
- ii. All enterprises registered till 30th June, 2020, shall be re-classified in accordance with the said notification.
- iii) The existing enterprises registered prior to 30th June, 2020, shall continue to be valid upto to 31.03.2022.
- iv) An enterprise registered with any other organisation under the Ministry of

Micro, Small and Medium Enterprises shall register itself under Udyam registration.

#### Updation and transition period in classification:

An enterprise having Udyam Registration Number shall update its information online in the Udyam Registration portal, including the details of the ITR and the GST Return for the previous financial year and such other additional information as may be required, on self-declaration basis.

In case of an upward change in terms of investment in plant and machinery or equipment or turnover or both, and consequent re-classification, an enterprise will maintain its prevailing status till expiry of one year from the close of the year of registration.

In case of reverse-graduation of an enterprise, whether as a result of reclassification or due to actual changes in investment in plant and machinery or equipment or turnover or both, and

whether the enterprise is registered under the Act or not, the enterprise will continue in its present category till the closure of the financial year and it will be given the benefit of the changed status only with effect from 1st April of the financial year following the year in which such change took place.

# 14) The following should be uploaded by the Vendor during submission of Techno-commercial bid for payment of EMD failing which the offer will be SUMMARILY REJECTED.

- i) The e-receipt of payment of EMD through NEFT/RTGS.
- ii ) The proof of Permanent EMD Holder.
- ii) The documents in support of investment held in plant and machinery.

14) The Earnest Money Deposit/ Permanent EMD made made by Tenderer will be forfeited if:

- (a) he withdraws his tender or backs out after acceptance.
- (b) he withdraws his tender before the expiry of validity period stipulated in the Specification or fails to remit the Security Deposit.
- (c) he violates any of the provisions of these regulations contained herein.
- (d) he revises any of the terms quoted during the validity period.
- (e) in the event of documents furnished with the offer being found to be bogus or the documents contain false particulars, the EMD paid by the tenderers will be forfeited in addition to blacklisting them for future tenders/contracts in TANGEDCO.

\*\*\*\*\*\*

# <u>SECTION – II</u>

# **BID QUALIFICATION REQUIREMENTS (BOR)**

# The Bidders shall become eligible to bid on satisfying the following Bid Qualification Requirements and on uploading the required documentary evidences along with tender.

- 1) The bidder should have performed mechanical related annual maintenance works in Gas Turbine and its auxiliaries or Steam Turbine and its auxiliaries or HRSG /Boiler and its auxiliaries, DM plant or Fire protection system within a period of the past 5 years as on the date of tender opening in any one of the Gas Turbine Power Stations/Thermal Power Stations of TANGEDCO Ltd. The bidder should upload the copy of work order for the above **attested by the Notary public / Gazetted Officer**
- 2) The Annual Turnover of the bidder should be more than Rs. 22 Lakhs (Rupees Twenty two Lakhs only) in any one of the three financial years viz; 2018-19, 2019-20 and 2020-21. The bidder should furnish the copy of any one of the following certificates **attested by the Notary public / Gazetted Officer**

i) Annual turn over Certificate for above 3 years certified by Chartered Accountant

(or)

ii) Annual statement of Accounts (i.e.) Profit & Loss Accounts and Balance Sheet for

the above 3 years certified by Chartered Accountant in support of Annual Turn Over

# (or )

ii) Attested copy of Income Tax return filed

# (or)

iii) Attested copy of enlistment certificate issued by NSIC containing turnover details.

- 3) The bidder should enclose valid contract labor license / copy of obtaining application for obtaining labor license / agree to obtain labor license from Inspector of factories Sivagangai or as a special case, exemption for obtaining labor license for the above work obtained from competent authority.
- 4) The bidder should enclose registration certificate in GST, ESI, EPF with appropriate organization

The offers of the bidders, who do not satisfy the above BQR, will be summarily rejected.

\*\*\*\*\*

# **SECTION - III REJECTION OF TENDERS**

- I. Tender will be SUMMARILY rejected if
  - (a) The EMD requirements are not complied with as specified in Section I.
  - (b) Bid Qualification Requirements as specified in Section II are not complied with.
  - (c) If the documents furnished with the offer is found to be bogus or the documents contains any false particulars.
- **II.** Tender is LIABLE to be rejected, if it is:
  - (a) Not covering the entire scope of Hiring of crane, Hydra, Fork lift and lower bed trailer and their operating personnel.

# 2.0. SCOPE OF WORKS:

**VGTPS-Phase-II - Mechanical -**Periodical and breakdown maintenance of GTG & GBC, IA/PA & ACC, HRSG, STG, DM Plant, Fire and safety, 60TR Centralized AC Unit and its auxiliaries, connected pipelines and associated valves for a period of one year from the date of commencement during 2022-2023.

# 3.0 SUBMISSION OF TENDER OFFER:

The tenderer is expected to examine all instructions, Schedules and Annexures detailed in the Specification and upload the Schedule of Prices and other required particulars in the Schedules and Annexures called for in this Specification, only as per the formats prescribed herein.

# 4.0 SUBMISSION OF TENDERS:

- 4.1.1 The Tender Offer consisting of Schedules-A to F, and Annexures I to IV should be filled up and signed by the Tenderer or any person holding Power of Attorney authorizing him to sign on behalf of the Tenderer before submission of the Tender. The date of signature should invariably be indicated.
- 4.1.2 In the event of tender being submitted by other than a firm, it must be signed by a partner (copy of partnership deed should be enclosed) and in the event of the absence of any Partner, it shall be signed on his behalf by a person holding a Power of Attorney authorising him to do so, certified copies of which shall be enclosed.

4.1.3 Tender submitted on behalf of companies registered under the Indian Companies Act, shall be signed by person duly authorised to submit the tender on behalf of the company and shall be accompanied by certified true copies of the resolutions, extracts of the Articles of Association, special or general Power of Attorney etc., to show clearly the title, authority and designation of persons signing the tender on behalf of the company.

#### **5.0** Modifications/Clarifications to Tender Documents:

- 5.1.1 At any time after the issue of the tender documents and before the opening of the tender, TANGEDCO may make any changes, modifications or amendments to the tender documents and the same will be intimated to the concerned vendors through corrigendum which can be down loaded from the vendor login.
- 5.1.2 In case any tenderer asks for a clarification to the tender documents before 48 hours of opening of tenders, the CE/GTS/TANGEDCO/Chennai-2 will clarify the same.
- 5.1.3 If any tenderer raises clarifications after the opening of the tender, the clarified reply issued by the Chief Engineer/Gas Turbine Schemes, TANGEDCO, Chennai-600 002 on the clarifications will be final and binding on the Tenderer.
- 5.1.4 All tender offers shall be prepared by typing or printing in the formats enclosed with this specification.
- 5.1.5 All information in the tender offer shall be in ENGLISH only. It shall not contain interlineations, erasures or overwriting except as necessary to correct errors made by the tenderer.
- 5.1.6 Any and all the exemption, which the bidder may take to any of the clauses with specification shall be clearly outlined in the schedule of deviations enclosed in the Schedules B&C, failing which the offer will be deemed to conform fully to the Technical specification and general terms and conditions.

#### 6.0 ALTERNATIVE TENDERS:

Bid should be submitted as per indent of the tender Documents, as alternative offers are liable to be rejected.

#### 7.0 QUOTATION OF RATES:

Rates should be quoted figures i.e., integers only.

Offers giving lumpsum price, without giving their breakup as per details required in the attached Price Schedule-A shall be liable for rejection.

#### 8.0 **PRINTED TERMS AND CONDITIONS IN TENDERS:**

Supplier's printed terms and conditions will not be considered as forming part of the tender under any circumstances.

#### 9.0. **INCOMPLETE TENDERS:**

Tender, which is incomplete, obscure or irregular is liable for rejection.

# **10.0 AMBIGUITIES IN CONDITIONS OF TENDERS:**

In the case of ambiguous or contradictory terms / conditions mentioned in the bid, interpretation as may be advantageous to the purchaser may be taken without any reference to the Tenderer.

#### **11.0 DISQUALIFICATION OF TENDERS:**

The tender offer shall contain full information asked for in the accompanying schedules and elsewhere in the specification.

Tenderers shall bear all costs associated with the preparation of e-tender and the purchaser will in no case be responsible or liable for these costs.

No offer shall be withdrawn by the Tenderer in the interval between the deadline for submission and the expiry of the period of validity specified / extended validity of the tender offer.

The Tenderers are requested to furnish the exact location of the factories with detailed postal address and pin code, telephone and Fax Nos. etc in their tenders so as to arrange inspection by the TANGEDCO, if considered necessary.

#### **12.0 TENDER OPENING:**

#### **OPENING OF COMMERCIAL & TECHNICAL BIDS WITHOUT PRICE (PART-I):**

The bid (except price Bid) will be opened electronically at 14.30 Hrs on the date notified at the Office of the Superintending Engineer/Mechanical/ Gas Turbine Schemes 3<sup>rd</sup> Floor, Eastern Wing, NPKRR Maaligai,144, Anna Salai, Chennai- 600002 through https://tntenders.gov.in/nicgep/app in the presence of tenderer's authorized representative who may wish to be present on the date of opening.

#### **OPENING OF THE PRICE BIDS: (PART - II)**

The date and time of opening of Price Bids shall be later notified to the registered e-mail to the bidders who fulfill the BQR criteria and whose bids are found to be commercially and technically acceptable.

Price bids of those bidders who fulfill the BQR criteria and whose bids are found to be commercially and technically acceptable in e-tender will be opened electronically **by the nominated members**.

During the bid submission in e-tender, bidders are advised to use **Attach Documents** link to upload documents in document library. Multiple documents can be uploaded. Maximum size of single document for upload is 8 MB.

Once documents are uploaded in the library, vendors can attach documents through **Attach** Document link by selecting the particular tender from the dropdown list

The bidder should note that only a file which is "attached" with the e-tender shall be considered during evaluation of the Technical Bid. Files which are not attached to the e-tender shall not be considered for evaluation. The Bidder should also note that a Bid will be considered as submitted if and only if the Bidder has made Final Submission. Only such Bids will be opened for which Final Submission has been made. It is further clarified that saving of Technical Bid and / or Price Bid without Final Submission will be treated as non-submission of bid in e-tender

Since the uploaded documents shall be downloaded for evaluation of bid, bidders are advised to upload clear scanned copies (pdf format files only). <u>One hard copy of the electronically submitted bid documents excepting the price schedule shall</u>

# have to be submitted upon intimation by TANGEDCO after opening of the etender.

Upon successful submission of e-tender, the Bidder shall receive a bid acknowledgement mail from the system automatically in the registered email id.

E-tender cannot be accessed after the due date and time for bid submission.

In case the due date for receipt and opening of tender happens to be declared holiday, tenders will be opened on the immediate succeeding working day without any change in the timings indicated

# **13.0 INFORMATION REQUIRED AND CLARIFICATIONS:**

In the process of examination, evaluation and comparison of tender offers, TANGEDCO may, at its discretion, ask the Tenderer for a clarification of his offers. All responses to requests for clarifications shall be in writing to the point only. No change in the price or substance of the offer shall be permitted.

TANGEDCO will examine the tender offers to determine whether they are complete, whether any computational errors have been made, whether required sureties have been furnished, whether the documents have been properly signed and whether the offers are generally in order.

The Tender offers shall be deemed to be under consideration immediately after they are opened and until such time of official intimation of award / rejection is made by the Tender Accepting Authority to the tenderers. <u>The Tenderers shall not make attempts to establish unsolicited and unauthorized contact with the Tender Inviting Authority, Tender Accepting Authority or Tender Scrutiny Committee after the opening of the tender and prior to the notification of the award and any attempt by any tenderers to bring to bear extraneous pressures on the Tender Accepting Authority shall be sufficient reason to disgualify the tenderer.</u>

After acceptance of the tender by the Tender Accepting Authority, the details will be arranged to be published in the Tender Bulletin of Tamil Nadu Government.

Mere submission of any Tender offer connected with these documents and Specification shall not constitute any agreement. The tenderer shall have no cause of action or claim, against the TANGEDCO for rejection of his offer, except as mentioned in Clause-11.0. The TANGEDCO shall always be at liberty to reject or accept any offer or offers at its sole discretion and any such action will not be called into question and the Tenderer shall have no claim in that regard against the TANGEDCO.

# 14.0 EVALUATION AND COMPARISON OF THE TENDER OFFERS:

- 14.1 The tenders will be evaluated strictly as per the Tamil Nadu Transparency in Tenders Act, 1998 and the Tamil Nadu Transparency in Tender Rules, 2000 and the amendments thereof.
- 14.2 The tender offers received will be examined to determine whether they are in complete shape, all required Data have been furnished, properly signed and generally in order and conforms to all the terms and conditions of the Specification without any deviation.
- 14.3 For the purpose of evaluation of tender offers, the following factors will be taken into account for arriving the evaluated price:

- (a) The quoted price will be corrected for arithmetical errors.
- (b) Since GST is enacted wherein all taxes & duties are subsumed, price evaluation shall be inclusive of applicable GST in all cases, i.e. even if the bidders are only within the State or bidders are within the State and outside Tamilnadu.

#### 15.0 VALIDITY:

- 15.1 The tender offer shall be kept valid for acceptance for period of **90 days** from the date of opening of offers. The offers with lower validity period are liable for rejection.
- 15.2 Further, the tenderer shall agree to extend the validity of the Bids without altering the substance and prices of their Bid for further periods, if any, required by the TANGEDCO.

#### **16.0 RIGHTS OF THE BOARD:**

Notwithstanding anything contained in this Specification, the TANGEDCO reserves the rights :

- (a) to recover losses, if any, sustained by TANGEDCO, from the supplier who pleads his inability to supply and backs out of his obligation after award of contract. The security deposit paid shall be forfeited.
- (b) to cancel the orders for not keeping up the delivery schedule.
- (c) to vary the delivery period based on the requirement and contingencies at the time of placing the Purchase order.
- (d) to accept the lowest eligible tender.
- (e) to reject any or all the tenders or cancel without assigning any reasons therefore.
- (f) to relax or waive or amend any of the conditions stipulated in the tender Specification wherever deemed necessary in the best interest of the TANGEDCO.
- 16.1 The purchaser reserves the right to request for any additional information and also reserves the right to reject or accept the proposal of any tenderer, if in the opinion of the purchaser, the qualification data is incomplete or in the opinion of the TANGEDCO the bidder is found not qualified to satisfactorily perform the contract.

# **17.0 DEVIATIONS :**

The offers of the Tenderers with Deviations in Commercial terms and Technical Terms of the Tender Document are liable for rejection. No alternate offer will be accepted.

#### **18.0. BAR OF JURISDICTION:**

Save as otherwise provided in the Tamil Nadu Transparency in Tenders Act 1998 and subsequent amendments, taken by any officer or authority under this Act shall be called in question in any court, and no injunction shall be granted by any court in respect of any action taken or to be taken by such officer or authority in pursuance of any power conferred by or under this Act.

#### 19.0 APPEAL:

Any tenderer aggrieved by the order passed by the Tender accepting

Authority under Section-10 of the Tamil Nadu Transparency in Tenders Act 1998 may appeal to the Government within 10 (Ten) days from the date of receipt of order.

**20.0** a) GSTIN Number: The tenderers are requested to furnish their GSTIN Number in the offer.

b) Permanent Account Number (PAN) Registration Number:

The tenderers are requested to furnish the Permanent Account Number in their offer.

**21.0** The tenderer who is an industrial company shall state clearly whether the company is a potentially sick Industrial Company in terms of **Section 23 or 25 of the sick Industrial Companies act 1985.** 

# **22.0 TENDER AND AGREEMENT:**

**22.1** The fact of submission to the Board of tender shall be deemed to constitute and reement between the tenderer and the Board whereby such tender shall remain open for ceptance by the TANGEDCO. If the tenderer is notified that his tender is accepted by the nder and such acceptance there of by the TANGEDCO. Until a formal contract of the same nder has been executed between him and the TANGEDCO in replacement of such reement. The stamp duty payable to this agreement shall be borne by the successful tenderer.

**22.2** A Non-judical stamp paper to the value of Rs.20/- (Rupees Twenty only) may be handed over to TANGEDCO for preparation of agreement for this work and the K2 agreement should be executed by you before the commencement of works. An undertaking has to be executed in Non-judical stamp paper for value of Rs.80/- indemnifying the board against any loss or damage. Failure for the execution of K2 agreement and for undertaking within the due dates specified above will entitle cancellation of work awarded besides forfeiture of EMD deposited by you for the above works.

\*\*\*\*\*\*\*

#### <u>SECTION – V</u> COMMERCIAL

#### **1.0. SCOPE:**

Name of the work – VGTPS Phase-II – Mechanical – Periodical and breakdown maintenance of GTG & GBC, IAPA & ACC, HRSG, STG, DM Plant, Fire and safety, 60TR Centralized AC Unit and its auxiliaries, connected pipelines and associated valves for a period of one year from the date of commencement during 2022-2023.

# a) PERIOD OF CONTRACT:

The period of contract is one year from the date of commencement during 2022-2023.

# b) PLACING OF ORDERS ON RATE CONTRACT BASIS:

The award of contract will be issued to the successful tenderer with all TANGEDCO's terms and conditions, duly indicating the approved unit rates and the approximate quantity allotted to them for a period of one year. The approved rates will be FIRM and valid for one year from the date of receipt of award of contract.

# 2.0 **PRICE**:

The price quoted should be firm during the entire duration of the contract. The rates shall be both in figures and words. Where there is discrepancy between the rates quoted in figures and words the lowest rates among them will be considered. It will be deemed that the rates quoted by the Tenderers are inclusive of all incidental items of work not necessarily mentioned in the schedule but are nevertheless essential for the correct and complete execution of work.

# 3.0. Goods and Service Tax:

1) The GST (SGST+CGST) will be paid extra as applicable. The amount of GST and percentage payable shall be indicated separately in the tender offer. GST are not applicable to Freight and Insurance charges.

2) The Tamil Nadu Generation And Distribution Corporation Ltd., has been registered as a dealer under GST and Registration No.33AADCT4784E1ZC with effect from 01.07.2017.

3) In case of delayed work, GST(SGST+CGST) prevailing on the date of dispatch or on the last date of the contractual delivery period whichever is LESS will be admitted. For both the cases the supplier shall furnish documentary evidence while submitting the bills for the payment.

4) Provided always it is hereby agreed and declared that in case, where the board has doubt and belief that the GST is not at all payable for the transaction in question, the Board reserves the right to withhold the amount of Tax until the party produces an order of court of competent jurisdiction, declaring the liability of the transaction to the GST. Concessional rate GST if any, shall be taken into account and included in the price quoted giving proof thereof.

5) The following certificates have to be furnished for admittance of claim of GST

(i) Certified that the transaction in which the GST has been claimed and has been/will be included in the return to be submitted to the GST(SGST or CGST) authorities for assessment of the GST and the amount GST claimed from the purchaser has been/ will be paid to GST(SGST or CGST)authorities.

(ii) Certified that the goods on which the GST has been charged have not been exempted under GST and the Rules made there under and the charges on account of GST on these goods are correct, under provision of relevant Act or Rules made there under.

(iii) Certified that we shall indemnify the TANGEDCO, in case if it is found at a later date that wrong/incorrect or excess payment has been recouped on account of GST paid by us.

(iv) Certified that we are registered as dealer under the GST and our Registration No. is...... and under GST act.

(v) Certified that GST credit availed by me has been taken into account in the rates quoted.

(vi) The tenderer should be uploaded GST registration details and material HSN Code & SAC Code for work portion along with the offer.

# GST shall be applicable on LD, Forfeiture of EMD/SD and any other recoveries of the bill as per the provision of GST Act.

#### 3.0a. TDS under GST:

Tax @ 2% will be deducted from the payment made or credited to the supplier of taxable goods or services or both, where the total value of taxable supply, under a contract exceeds Rs.2,50,000/- from the invoices raised by suppliers/contractors from 01.10.2018. TDS under GST in also applicable for suppliers/contractors registered under composition scheme also.

# 4.0 INSURANCE:

- 1) It is incumbent on the part of the contractor to see that it shall be his sole responsibility to protect the public and his employees, against any accident from any cause and he shall indemnify the TANGEDCO against any claim for damaged for injury to person or property resulting from any such accident and shall also where the provisions of workman's compensation Act apply take steps to properly insure against any claim there under by way of accident, risk, insurance demand for all purposes of relief, failing, failing the same or otherwise, contractor alone will be responsible to meet the compensation awarded under the said act.
- 2) The tenderer should take comprehensive insurance group policy against any accidents to the workers during the course of work and produce the same to engineer in charge as and when required for perusal. The Policy should be taken immediately after award of the contract. Without this insurance policy tenderers will not be permitted to commence the work.
- 3) Recoveries will be made from Contractor's bill for any liability for the accidents and refund of the same considered later after the claim is fully settled by the Insurance authorities.
- 4) Insurance coverage for working above 9.0 mtrs. level should be ensured.

# **5.0 SECURITY DEPOSIT:**

The successful tenderer will have to furnish a security deposit of 5% (five percent) for the total value of the contract which includes EMD already remitted and should be paid as Bankers Cheque or Demand Draft at o/o SE/VGTPS /Ramnad.

The successful contractor will have to furnish the Security Deposit within 30 days from the date receipt of award letter. Non-payment of security deposit within the above period will entail cancellation of contract as it will be considered that successful tenderer is not interested in accepting the contract.

The Security Deposit against this contract will be repaid to the contractor only if the contract is completed to the satisfaction of the TANGEDCO. If the TANGEDCO incurs any loss or damage on account of the breach of any of the clauses mentioned or any other amount arising out of the contract becomes payable by the contractor to the TANGEDCO, then TANGEDCO will in addition to such other rights that the TANGEDCO may have under the law appropriate the whole

or part of the security deposit and such amount that is appropriated will not be refunded to the Contractor.

The Banker's Cheque / DD towards payment of SD may be drawn in favour of Superintending Engineer/Valuthur Gas Turbine Power Station/Ramnad payable at Ramnad. No interests for the security deposit will be paid.

# 6.0 PAYMENT:

Payment will be made on the contractors claim bill duly certified by the Engineer/TANGEDCO. 95% of the value of works so certified by the Engineer will be paid to the contractor in part bills within 90 days. The 5% retention amount will be paid together with security deposit on satisfactory completion of work in all respect and completion of guarantee period provided if any that there is no recovery or forfeiture of any amount from the contractor.(Through NEFT/RTGS)

Under the certificate to be issued by Engineer in-charge on the satisfactory completion of entire works, the 5% retention amount, EMD & SD will be released after deduction all recoveries, if any.

No certificate of the Engineer shall be considered conclusive evidence as to the sufficiency of any work or materials or correctness of measurement to which it relates, nor shall it relieve the contractor from his liability to make good defects as provided by the contract. No advance payment will be considered.

When there are complaints from the labour department about non-payment of wages to the labourers employed by the contractor for the execution of work under agreement, the Engineer in-charge shall have full power to with hold the bills claimed by the contractor.

Payment will be made within 90days from the date of completion of work. For any delay in payment, simple interest shall be paid by the TANGEDCO for the delayed period beyond 90 days at SBI 3 months MCLR rate prevailed at the time of signing of Agreement.

# 7.0 LIQUIDATED DAMAGES:

If the contractor fails to perform the works as specified in the contract or any extension thereof, the TANGEDCO LTD shall recover from the contractor as liquidated damages a sum of half a percent (0.5%) of the contract, price of the in completed works for each completed calendar week of delay the total liquidated damages shall not exceed 10% of the contract prices.

In respect of contracts where works executed in part could not be beneficially used by the TANGEDCO LTD due to such incomplete works, Liquidated damages shall be worked out on the basis of entire contract price only and not on the value of delayed portion.

The defaulted contractor is liable to pay to the TANGEDCO LTD in addition to

liquidated damages for delay, the actual difference in price, wherever TANGEDCO LTD orders the delayed quantity to be executed by other agencies at a higher rate. The date of actual handing over to TANGEDCO LTD after satisfactory execution shall be reckoned as date of completion.

#### Note:

It should be noted that if a contract is placed on a higher tenderer in preference to the lowest acceptable offer in consideration of offer of earlier completion, the contractor will be liable to pay to the TANGEDCO LTD the difference between the contract rate and that of the lowest acceptable tenderer in case of failure to complete the supplies/works in terms of such contract within the date of delivery specified in the tender and incorporated in the contract

# 8.0 WORKING HOURS:

The timings for work is as per the Power Station working hours & 24 hrs in case of emergency situation considering as over time beyond 8 hrs No work of any description shall be carried out on Sundays and other important National Holidays without the Knowledge and formal sanction in writing of the Engineer/TANGEDCO.

# 9.0 SUSPENSION OF WORK:

The Engineer/TANGEDCO may from time to time by direction in writing for any valid reasons with out in any way violating this contract direct the contractor to suspend so long as the Engineer in-charge may deem desirable and the contractor shall not after receiving such written notice proceed with the works therein ordered to be suspended until he shall have received written notice or authority to the effect from the Engineer/TANGEDCO.

The Contractor shall not be entitled to claim from the purchaser and compensation for any loss or damage sustained by him by reason of the suspension of works as aforesaid.

# **10.0 FAILURE TO EXECUTE THE CONTRACT:**

Suppliers failing to execute the order placed on them to the satisfaction of the TANGEDCO under terms and conditions set forth therein, will be liable to make good the loss sustained by the TANGEDCO, consequent to the placing of fresh orders elsewhere at higher rate, i.e. the difference between the price accepted in the contract already entered into and the price at which fresh orders have been placed. This is without prejudice to the imposition of Liquidated Damages and forfeiture of security deposit.

# **11.0 LIABILITY FOR ACCIDENTS:**

Prior to the taking over of works of Plant, the contractor shall indemnify and save harm to the TANGEDCO against all actions, suits, claims, demands, cost or expenses arising in connection with injuries suffered by the persons employed by the contractor or his sub-contractor on the works whether under the general law or under the work men's compensation Act. 1928, or any other statue in force on the date of the contract dealing with question of liability of employer for injuries suffered by employees and to have taken steps prosperity to insure against and claims there under.

On the occurrence of an accident which results in the death of the workmen employed by the contractor or which is due to the contract work and of so serious as to be likely to result in the death of any such workmen, the contractor shall within 24 hours of happening of such accident intimate in writing to the concerned Engineer and such officers as required by the provision of the Workmen's Compensation Act, the fact of such accident.

The contractor shall indemnify the TANGEDCO against all loss or damage sustained by the TANGEDCO resulting directly or indirectly for his failure to give intimation in the manner

aforesaid including the penalties or fines, if any, payable by the TANGEDCO as a consequence of the TANGEDCO's failure to give notice under the workmen's compensation Act or otherwise to confirm to the previsions of the said Act in regard to such accident.

In the event of any claim being made or action brought against the TANGEDCO involving the contractor and arising out of the matters referred to and in respect of which the contractor is liable under laws, the contractor shall be immediately notified thereof, and he shall with the assistance, if he so requires, of the TANGEDCO but at the sole expense of the contractor, conduct all negotiation for the settlement of the same or any litigation that may arise there from. In such cases the TANGEDCO shall, at the expense of the contractor afford all available assistance for any such purpose.

In the event of an accident in respect of which compensation may become payable under Workmen's Compensation Act-VII of 1923 and any subsequent amendment thereof whether by the contractor, or by the TANGEDCO, as principle, it shall be lawful for the Engineer to retain out of money due and payable to the contractor such sum or sums of money as may in the opinion of the said Engineer be sufficient to meet such liability. The opinion of the Engineer shall be final in regard to all matters arising under this clause and will not be subject to any arbitration.

Liability for damages or loss to third party including inspection officers due to act of the contractor or his sub contractor connected with the execution of this contract shall be fully borne by the contractor. The contractor shall maintain such detailed records to furnish information regarding entertainment and discharge of all workmen employed under the contract as to be adequate for the timely and full settlement of claims under the Workmen's Compensation Act. All cases of accident or injuries shall be reported to the Engineer with full details required for the settlement under the Workmen's Compensation Act.

The contractor shall report about all accidents within 24 hours to the Engineer of the TANGEDCO in the preliminary accident form. He should furnish other particulars such as medical certificates, wage particulars, fitness, proof of having paid the compensation fixed by the TANGEDCO etc., in due course without delay.

#### 12.0 LIABILITY FOR DAMAGE TO WORKS OR PLANT:

The contractor shall during the progress of the work properly cover up and protect the work and plant from injury by exposure to the weather, and shall take every reasonable, timely and useful precaution against accident or injury to the same from any cause and shall remain answerable and liable for all accidents or injuries thereto which until the same, be or be occasioned by the acts or omissions of the contractor or his workmen or his sub-contractors, and all losses and damages to the works or plant arising from such accidents or injuries as aforesaid shall be made good in the most complete and substantial manner by and at the sole cost of the contractor and to the reasonable satisfaction of the Engineer should such loss of damage happen to unit or works or plant or materials falling outside the scope of this contract and due to the contract, those shall be replaced or compensated for by the contactor to the satisfaction of the Engineer.

In the case of loss or damage to any portion of the work occasioned by other causes, the same shall, if required should be made good by the contractor in like manner but at the cost/ at a price to be agreed between the contractor and the TANGEDCO. The decision of SE/VGTPS/Ramnad in this regard will be final.

#### **13.0 FORCE MAJEURE:**

If at any time during the continuance of this contract, the performance in whole or in part in any delegation under this contract shall be prevented or delayed by reasons if any war, hostilities, acts of public enemy, acts of civil commotion, strikes, lock outs, sabotages, fires, floods, explosions, epidemics, warranting restrictions or other acts of God (herein after referred to as eventualities), then provided notice of the happening of any such eventuality is given by the Tenderer to the Corporation within 15 days from the date of occurrence thereof, neither party shall, by reasons of such eventuality, be entitled to terminate this contract nor shall have any claims for damages against the other in respect of such non-performance or delay in performance and deliveries under this contract shall be refunded as soon as practicable after such eventuality has come to an end or ceased to exist.

Provided that if the performance in whole or part by the Contractor or any obligation under this contract is prevented or delayed by reasons of any eventuality for a period exceeding 60 days, the Corporation may at its option, terminate this contract by notice in writing.

#### **14.0 ARBITRATION:**

Arbitration clause is not applicable to this contract.

#### **15.0 CLEARING UP THE SITE:**

Upon completion of the work the contractor should remove from the vicinity of the work all plants and other materials belonging to him or used by him during execution and in the event of failure to do so, the same will be removed by the TANGEDCO and relevant expenditure will be recovered from the contractor.

#### 16.0 RECOVERY OF MONEY FROM CONTRACTOR IN CERTAIN CASES:

In every case in which provision is made for recovery of money from the contractor. TANGEDCO shall be entitled to retain or deduct the amount there of from any money that may be due or become due to the contractor under this contract and or under other contract or contracts or any other account whatsoever.

#### 17.0 NEGLIGENCE:

If the Contractor shall neglect to execute the work with due diligence and expedition or shall refuse or neglect to comply with any reasonable orders given to him in writing by the Engineer/TANGEDCO in connection with the work, or shall contravene the provision of this contract, the TANGEDCO may give seven days notice in writing, to the contractor to make good the failure neglect or contravention complained of and should the contractor fail to comply with the notice within a reasonable time from date of service thereof in the case of failure, neglect or contravention capable of being made good within that time or otherwise within such time as may be reasonably necessary for making it good, then and in such case, the TANGEDCO shall be at liberty to comply other workmen and forthwith perform such work as the contractor may have neglected to do, or of the TANGEDCO shall think fit, it shall be lawful for him to take the work wholly or in part off the contractors hands and reconstruct at a reasonable price with any other persons or provide any other materials tools and tackles or labour for the purpose of completing the work, or any part thereof and in that event the TANGEDCO shall, without being responsible to the contractor for the said wear and tear of the same have the free use of all the materials, tools, tackles construction plant or other things which may be on the site for use at any time in connection with the work in the execution of any right of the contractor over the same and the TANGEDCO shall be entitled to retain and apply any balance which may be otherwise due on the contract by him of the contractor or such part thereof as may be necessary to the payment of the cost of executing such work as aforesaid.

If the cost of executing the work as aforesaid shall exceed the balance due to the contractor and the contractor fails to make good the deficit, the said materials, tools, tackle, construction plant or other things which are the properties of the contractor may be seized and

sold by the TANGEDCO and proceeds applied towards the payment of such differences and the cost of an incidental to such sale. Any outstanding balance existing after crediting the proceeds of such sale, shall be paid by the contractor on the certificate of the Engineer, but when all expenses, costs and charges incurred in the completion of the work are paid by the contractor all such materials, tools, tackle, construction plant or other things remaining unsold removed by the Contractor.

# **18.0 INCOME TAX CLEARANCE:**

The tender to be submitted against this enquiry should be accompanied by Income Tax Clearance Certificate in the prescribed form issued by the competent authority.

# **19.0 JURISDICTION FOR LEGAL PROCEEDINGS AFTER AWARD OF CONTRACT:**

No suit or any proceedings in regard to any matter arising in any respect, under this contract shall be instituted in any court save in the city civil court of Chennai or the court of small causes at Chennai. It is agreed that of no other court shall have jurisdiction to entertain any suit or proceeding even though part of the cause of action might arise within their jurisdiction. In case any part of cause of action arises outside the jurisdiction of any of the courts in Tamil Nadu, then it is agreed to between parties that such suits or proceedings shall be instituted in a court within Tamil Nadu and no other courts outside Tamil Nadu shall have jurisdiction even though any part of the cause of action might arise within the jurisdiction of such courts. The successful tenderer shall furnish an undertaking in a non/Judicial stamp paper of Rs.80/- (Format as per schedule-E) agreeing to the above condition.

# 20.0 DUES TO TANGEDCO:

The TANGEDCO is empowered:

(a) To recover any dues against this contract in any bills/

Security Deposit/Earnest Money Deposit due to the suppliers either in this contract or any other contracts with TANGEDCO.

# **GENERAL CONDITIONS (STATUTORY COMPLIANCES)**

1) The Contractor shall employ labour in sufficient numbers to maintain the required rate of progress and of quality to ensure workmanship of the degree specified in the Contract and to the satisfaction of the Engineer in-Charge. The

Contractor shall not employ in connection with the Works any person who has not completed his eighteen years of age.

2) The Contractor shall pay to labour employed by him either directly or ugh digital transfer. The wages should not be less than fair wages as defined in current PWD Schedule rates (or) Minimum Wages Act (if applicable).

3) The Contractor shall in respect of labour employed by him comply with or cause to be complied with the Contract Labour Regulations in regard to all matters provided therein

4) The Contractor shall comply with the provisions of the payment of Wages Act, 1936, Minimum Wages Act, 1948, Employers' Liability Act, 1938, Workmen's Compensation Act, 1923, Industrial Disputes Act, 1947, Maternity Benefit Act, 1961, Employees Provident Fund & Miscellaneous Provisions Act, 1952, Employees State Insurance Act, 1948, Payment of Bonus Act, 1965 and Mines Act, 1952, Contract Labour Regulation & Abolition Act, 1970 or any modifications thereof or any other law relating thereto and rules made there under from time to time

5) The Engineer in-Charge shall on a report having been made by an Inspecting Officer as defined in the Contractors Labour Regulations have the power to deduct from the moneys due to the Contractor any sum required or estimated to be required for making good the loss suffered by a worker or workers by reason of non-fulfilment of the Conditions of the Contract for the benefit of workers, non-payment of wages or of deductions made from his or their wages which are not justified by the terms of the Contract or non-observance of the said Contractors Labour Regulations

6) The Contractor shall indemnify the Corporation against any payments to be made under and for observance of the Regulations afore said without prejudice to his right to claim indemnity from his sub- contractors. (if permitted)

7) In the event of the Contractor committing a default or breach of any of the provisions of the aforesaid Contractors Labour Regulations as amended from time to time or furnishing any information or submitting or filling any Form/ Register/Slip under the provisions of these Regulations which is materially incorrect then on the Report of the Inspecting Officers as defined in the Contractors Labour Regulations the Contractor shall without prejudice to any other liability pay to the Corporation a sum not exceeding Rs. 50.00 as liquidated damages for every default, breach or furnishing, making, submitting, filling materially incorrect statement as may be fixed by the Engineer-in-Charge and in the event of the Contractor's default continuing in this respect, the liquidated damages may be enhanced to Rs. 50.00 per day for each day of default subject to a maximum of ten percent of the estimated cost of the Works put to tender. The Engineer in-Charge shall deduct such

amount from bills or security deposit of the Contractor and credit the same to the Welfare Fund constituted under Regulations. The decision of the Engineer in-Charge in this respect shall be final and binding.

#### **1.0 CONTRACT LABOUR REGULATIONS:**

(i) Notice of commencement: The Contractor shall, within SEVEN days of commencement of the work, furnish in writing to the Inspecting Officer of the area concerned the following information:

- (a) Name and situation of the work.
- (b) Contractor's name and address
- (c) Particulars of the Department for which the work is undertaken,

(d) Name and address of sub-contractors as and when they are appointed.

(e) Commencement and probable duration of the work.

(f) Number of workers employed and likely to be employed.

(g) 'fair wages' for different categories of workers

(h)Number of hours of work which shall constitute a normal working day:

- (ii) The number of hours which shall constitute a normal working day for an adult shall be NINE hours. The working day of an adult worker shall be so arranged that inclusive of intervals, if any, for rest it shall not spread over more than twelve hours on any day, when an adult worker is made to work for more than NINE hours on any day or for more than FORTY EIGHT hours in any week he shall, in respect of overtime work, be paid wages at double the ordinary rate of wages
- (iii) Weekly day of rest: Every worker shall be given a weekly day of rest which shall be fixed and notified at least TEN days in advance. A worker shall not be required or allowed to work on the weekly rest day unless he has or will have a substituted rest day, on one of the five days immediately before or after the rest day. Provided that no substitution shall be made which will result in the worker working for more than ten days consecutively without a rest day for a whole day
  - (a) Where in accordance with the foregoing provisions a worker works on the rest day and has been given a substituted rest day he shall be paid wages for the work done on the weekly rest day at the overtime rate of wages
  - (b) Note: The expression 'ordinary rate of wages' means the fair wage the

worker is entitled to.

- (c) Display of notice regarding Wages, Weekly Day of Rest etc. The Contractor shall before he commences his work on contract, display and correctly maintain and continue to display and correctly maintain in a clean and legible condition in conspicuous places on the works, notice in English and in the local Indian Language, spoken by majority of workers, giving the rate of fair wages, the hours of work for which such wages are payable, the weekly rest days workers are entitled to and name and address of the Inspecting Officer. The Contractor shall send a copy each of such notices to the Inspecting Officers.
- (i) Register of Workmen: A register of workmen shall be maintained in the Form appended to these regulations and kept at the work site or as near to it as possible, and the relevant particulars of every workman shall be entered therein within THREE days of his employment.
- (ii) Employment Card: The contractor shall issue an employment card in the Form appended to these regulations to each worker on the day of work or entry into his employment. If a worker already has any such card with him issued by the previous employer, the contractor shall merely endorse that Employment Card with relevant entries. On termination of employment the Employment Card shall again be endorsed by the Contractor and returned to the worker.
- (iii) Register of Wages etc.,: A Register of Wages-Cum-Muster Roll in the Form appended to these regulations shall be maintained and kept at the work site or as near to it as possible.
- (iv) Fines and deductions: Wages of a worker shall be paid to him without any deductions of any kind except the deduction for damage to or loss of goods expressly entrusted to the employed person for custody, or for loss of money which he is required to account for, where such damage or loss is directly attributable to his neglect or default
- (a) No fine shall be imposed on a worker and no deductions for damage or loss shall be made from his wages until the worker has been given an opportunity of showing cause against such fines or deductions
- (b) The Contractor shall maintain a register of fines and the register of deductions for damage or loss in the Forms appended to these regulations which should be kept at the place of work
- (v) Register of Accidents: The Contractor shall maintain a register of accidents in such form as may be convenient at the work place but the same shall include the following particulars:
  - (a) Full particulars of the labourers who met with accident

- (b) Rate of Wages.
- (c) Sex.
- (d) Age
- (e) EPF UAN number
- (f) ESI number
- (g) Aadhaar number
- (h) Nature of accident and cause of accident
- (i) Time and date of accident.
- (j) Date and time when admitted in hospital
- (k) Date of discharge from the hospital.
- (I) Period of treatment and result of treatment.

(m) Percentage of loss of earning capacity and disability as assessed by Medical Officer.

- (n) Claim required to be paid under Workmen's Compensation Act
- (o) Date of payment of compensation

(p) Amount paid with details of the person to whom the same was paid.

- (q) Authority by whom the compensation was assessed
- (r) Remarks

[Note: k,l,m,n for the workmen not covered under the ESI provisions]

- (vi) Preservation of Registers: The Register of workmen and the Register of Wages-cum-Muster Roll required to be maintained under these Regulations shall be preserved for 3 years after the date on which the last entry is made therein
- (vii) Enforcement: The Inspecting Officer shall either on his own motion or on a complaint received by him carry out investigations, and send a report to the Engineer-in-Charge specifying the amounts representing Workers' dues and amount of penalty to be imposed on the Contractor for breach of these Regulations, that have to be recovered from the Contractor, indicating full details ofs the recoveries proposed and the reasons there for. It shall be obligatory on the part of the Engineer-in-Charge on receipt of such a report to deduct such amounts from payments due to the

#### Contractor

- (viii) Disposal of amounts recovered from the Contractor: The Engineer in-Charge shall arrange payment to workers concerned within FORTY FIVE days from receipt of a report from the Inspecting Officer except in cases where the Contractor had made an appeal under Regulation 16 of these Regulations. In cases where there is an appeal, payment of workers dues would be arranged by the Engineer-in-Charge, wherever such payments arise, within THIRTY days from the date of receipt of the decision of the competent authority
- (ix) Welfare Fund: All moneys that are recovered by the Engineer in-Charge by way of workers dues which could not be disbursed to workers within the time limit prescribed above, due to reasons such as whereabouts of workers not being known, death of a worker etc. and also amounts recovered as penalty, shall be credited to a Fund to be kept under the custody of the Corporation for such benefit and welfare of workmen employed by Contractors
- (x) Appeal against decision of Inspecting Officer: Any person aggrieved by a decision of the Inspecting Officer may appeal against such decision to the competent authority concerned within THIRTY days time stipulated from the date of the decision, forwarding simultaneously a copy of his appeal to the Engineer in-Charge. The decision of the competent authority shall be final and binding upon the Contractor and the workmen
- (xi) Inspection of Books and other Documents: The Contractor shall allow inspection of the Registers and other documents prescribed under these Regulations by Inspecting Officers and the Engineer in-Charge or his authorized representative at any time and by the worker or his agent on receipt of due notice at a convenient time
- (xii) Interpretation, etc.,: On any question as to the application interpretation or effect of these Regulations, the decision of the Commissioner of Labour (or) Director/ Industrial Safety and Health shall be final and binding
- (xiii) Amendments: Government may, from time to time, add to or amend these Regulation and issue such directions as it may consider necessary for the proper implementation of these Regulations or for the purpose of removing any difficulty which may arise in the administration thereof

# 2.0 Compliance of EPF& MP Act, 1952:

- (a) The Contractor who take up works contract for TANGEDCO is required to comply with all the relevant provisions stipulated in the EPF & MP Act.
- (b) The Contractor should have a separate EPF main code number
- (c) The Contractor should be responsible for the payment of necessary EPF

contributions both Employer's and Employee's contribution as per the provisions of the EPF Act in respect of the actual workers engaged for the specified works.

- (d) The contractor should submit necessary returns to EPF Organisation within the stipulated time as required under the said EPF & MP Act.
- (e) The Contractor should produce the proof of payment of contribution both Employer's and Employee's contributions made to EPF Organisation in order to claim the Bills for the respective works
- (f) The contractor should be fully liable to meet and fulfill all the relevant provisions of the EPF act in the respect of the execution of the Tendered work
- (g) In case the Contractor fails to fulfill any of the statutory provisions of the EPF & MP Act and consequently it happens that TANGEDCO Ltd has to meet such requirements of the said Act or Statutory provisions in the capacity of Principal Employer, TANGEDCO shall make good such requirements out of the money due and payable to the said Contractor and further the performance of the said Contractor in this regard will be noted for all future Contracts of TANGEDCO
- (h) The workers engaged by the contractors should have EPF-UAN Number(Universal Account Number)

(i) The Employer's contribution made to the EPF may be claimed under "PMRPY Scheme."

1.1 In respect of the category of employee for whom the wages are fixed at the rate of Rs.500/- and above in the current PWD Schedule rates (or) say the monthly wages of Rs.15,000/- above. The EPF employer contribution will be restricted upto Rs.15,000/- only.

#### 3.0 Compliance of ESI Act 1948:

- (a) The contractor who take up the works contract for TANGEDCO is required to comply with all the provisions stipulated to ESI Act 1948
- (b) The contractor should have a separate ESI main code number
- (c) The contractor should be responsible for the payment of necessary ESI contributions – both Employer's and Employee's contributions as per the provisions of the ESI Act in respect of the actual workers engaged for the specified works
- (d) The contractor should submit necessary returns to the ESI Organization within the stipulated time as required under the said ESI Act
- (e) The contractor should produce the proof of payment of contributions both Employer's and Employee's contributions made to ESI Organization in

order to claim the Bills for the respective work

- (f) The contractor should be fully liable to meet and fulfill all the relevant provisions of the ESI Act in respect of the execution of the Tendered work
- (g) In case the Contractor fails to fulfill any of the statutory provisions of the ESI Act and consequently it happens that TANGEDCO has to meet such requirements of the said Act or Statutory provisions in the capacity of Principal Employer, TANGEDCO shall make good such requirements out of money due and payable to the said Contractor and further the performance of the said Contractor in this regard will be noted for all future Contracts of TANGEDCO
- (h) (i) The contractor who claims exemption under the ESI Act should produce the exemption order obtained from the Government/ESI organization.
  - (ii) The contractor who claims exemption for those areas that are not covered under the purview of the ESI Act, necessary evidences should be submitted by the contractor to ensure that the revenue village where the work is being carried out has not been covered under the implemented area of ESI
  - (iii) The category of employees (Technical Assistant II Grade) and above for whom the wages are fixed at the rate of Rs.700/- and above in the PWD Schedule rates (or) the monthly wages of Rs.21,000/-above. Such employees will not be covered under the ESI Act. In all such conditions, the Contractor has "to ensure the medical benefits for the Workers engaged by the Contractors for the works and has to take relevant group insurance policies with the applicability for giving compensation to the workers" under the Employee's Compensation Act.

#### 4.0 Statutory Compliance Clearance Certificate:

- (a) The Contractor executing the works contract in TANGEDCO should obtain the Statutory Compliance Clearance Certification from the Online Compliance Service Providers engaged by TANGEDCO, the required documents should be submitted by the contractors to the respective Online Compliance Service Providers
- (b) The charges for Statutory Compliance Clearance Certification will be at the rate of Rs.2.00/- per man day per month with minimum charges of Rs.400/- and maximum charges of Rs.3200/- and Rs.300/-for re-audit due to reasons attributable to the contractor. The charges should be paid by the respective contractors to the service provider through online
- **5.0** <u>The Building and Other construction Workers Act</u>:(other than the circle/station registered under the Factories Act)</u>

- (a) The contractor should obtain the Registration certificate under the Building and Other construction Workers (Regulation of Employment and Condition of Service) Act, 1996 from the Competent Authority (the Joint Director/Industrial Safety and Health (BOCW))
- (b) The contractor should comply all the provisions of the Building and Other construction Workers (Regulation of Employment and Condition of Service) Act, 1996

# 6.0 <u>The Contract Labour (Regulation & Abolition) Act 1970 & Rules</u> <u>1975 and Inter-State Migrant Workmen (Regulation of</u> <u>Employment and Conditions of Service) Act, 1979 & Rules 1983</u>

- (a) The Contractor who take up works contract for TANGEDCO should deploy sufficient number of workmen for the work and the contractor should deploy 20 or more workmen on a day of emergency (or) in necessity
- (b) The Contractors should comply with all the provisions of the Contract Labour (Regulation & Abolition) Act, 1970 and Tamilnadu Contract Labour (Regulation & Abolition) Rules 1975 as modified from time to time and shall also indemnify TANGEDCO from all and against any claims under the aforesaid Act and the Rules. The contractors should also submit the copy of the labour licence before executing the works.
- (c) The Contractors who desires to engage the migrant workmen (workmen from other states) for the works contracts of TANGEDCO is required to comply with all the provisions of the Inter-State Migrant Workmen (Regulation of Employment and Conditions of Service) Act, 1979 and Tamilnadu rules, 1983 as modified from time to time and shall also indemnify TANGEDCO from all and against any claims under the aforesaid Act and the Rules. The contractors should also submit the copy of the migrant labour licence before executing the works
- (d) The contractors should maintain the following records as per section 78 of Contract Labour(Regulation & Abolition) central rules 1971
  - (i) Muster Roll in Form XVI.
  - (ii) Register of Wages in Form XVII
  - (iii) Register of overtime in Form XVIII.

(iv) The contractor shall issue an photo identity card to his employees

# 7.0 Wages:

(a) The Wages prescribed for the contractor/ industry/ establishment as per rates of Minimum Wages notified by the Government of Tamilnadu under the Minimum Wages Act, 1948 or the current PWD rates of wages, whichever is higher is to be paid by the contractor to their employees.

(b) The contractor should pay the wages before the expiry of seventh day as per section 65 and shall issue wage slip in Form-XXVIII to the workmen as per section 78(b) of The Tamil Nadu Contract Labour Rules, 1973. The copies of the wage slip so issued to the workmen should be maintained by the contractor and produced as when called for.

#### 8.0 EPF Documents to be Produced for Claiming Bills:

- (a) The EPF contribution should be remitted separately (by separate Challan) for each and every work. The acceptance order/ formal order reference number should be entered in the remarks column of the ECR Challan (Electronic Challan Cum Return) and the same should be submitted
- (b) The payment confirmation receipt should be submitted (the payment confirmation date is mandatory)

(c) The combined Challan of Account No. 1,2,10,21 & 22 should be submitted

(d) All the documents should duly signed with seal by the contractor`

#### 9.0 ESI Documents for While Claiming Bills:

- (a) The Monthly Contribution Challan Form should be submitted (Transaction status field completed successfully is mandatory)
- (b) The contribution history of the respective months should be submitted

(c) The month wise statement should be submitted showing the details of the employees utilized by the contractors for the specific work and the contribution remitted as per the below format

SI.No. IP No IP name No of days wages IP contributions

IP.Nc

(d) All the documents should duly signed with seal by the contractor

# 10.0 <u>Tamil Nadu Rationlisation of Forms and Reports under Certain</u> <u>Labour Laws Rules, 2020:</u>

The contractor should comply/maintain the applicable new combined forms introduced vide the following Acts/Rules

- (a) The Tamil Nadu Contract Labour (Regulation and Abolition) Rules, 1975
- (b) The Inter-State Migrant Workmen (Regulation of Employment and Conditions of Service) (Tamil Nadu) Rules, 1983
- (c) The Tamil Nadu Building and Other Construction Workers (Regulation of

Employment and Conditions of Service) Rules, 2006

#### **New Forms:**

FORM I Certificate of Registration of Principal Employer/Employer (under 3 Rules)

- FORM II Application for Licence/ Renewal of Licence (under CLRA and ISMW Rules)
- FORM III Form of Certificate by Principal Employer (under CLRA and ISMW Rules)
- FORM IV Certificate of Initial and Periodical Test and Examination of Various Appliances (under BOCW Rules)
- FORM V Application for Adjustment of Security Deposit (under CLRA and ISMW Rules)

FORM VI Licence and Renewal (under CLRA and ISMW Rules)

- FORM VII Notice of commencement/ completion of work (under CLRA and BOCW Rules)
- FORM VIII Service Certificate (under 3 Rules)
- FORM IX Certificate of Medical Examination (under BOCW Rules)
- FORM X Report on recruitment and employment of migrant workmen and cessation of employment of migrant workmen (under ISMW Rules)
- FORM XI Report of Poisoning or Occupational Notifiable Diseases/ Accidents and Dangerous Occurrences (under BOCW Rules)
- FORM XII Application for Registration of Establishments Employing Contract Labour or Migrant Workmen or Building Workers (under 3 Rules)

# 11.0 <u>Agreement and Undertaking to be furnished by the contractors</u> <u>in respect of the Statutory Provisions:</u>

- (a) An undertaking as specified in Annexure-A should also be obtained from the contractors to ensure the remittance of EPF & ESI, Employee and Employer contribution for the respective works while claiming the bills
- (b) The TNEB (TANGEDCO/TANTRANSCO) registered contractor, who wants to execute the works in a circle shall be instructed to execute an agreement [Annexure-I] with respective Superintending Engineer's of the circle

#### 12.0 SAFETY CONDITION:

(i) All the relevant personal protective equipments like safety helmets, safety shoes, safety belt, goggles, nose mask, face mask, dust respirator,

asbestos sult, apron, leg guards, rubber gloves, face shield hand sleeves, ear plug, ear muff, fiber helmet, fall net etc., should be supplied by the contractors to their workmen and ensure for proper usage by their workers without fail.

- (ii) Proper welding machines with accessories, good and sound construction of hand tools, power tools such as grinding machines, cutting machines, chipping tools, scaffolding materials, etc., should be used. Proper earthing to be provided wherever necessary
- (iii) The contractor shall not allow his workmen to wear loose garments, like lingoes, dhotis, watches, loose jewels and bangles, etc., while at work and smoke cigarettes, beedies etc., inside the power house premises
- (iv) The contractor shall ensure that his workmen to wear tight full or half pant while at work inside the powerhouse premises
- v) Technically skilled and also safety oriented supervisor should supervise the work at all time.
  - (vi) If any accident occurs, it should be informed to the concerned officer of TANGEDCO in writing by the concerned contractor immediately.
  - (vii) For any safety violation and non-compliance of the statutory provisions and rules the contractor is sole responsible and the contractor is liable for any prosecution and imposition of penalty as per the rules in force.
  - (a) Every opening in floor of a building or in a working platform shall be provided with suitable means to prevent fall of persons or materials by providing suitable fencing or railing with a minimum height of 1 meter
  - (b) All practical steps shall be taken to prevent danger to persons employed, from risk or fire or explosion, or flooding. No floor, roof, or other part of a building shall be so overloaded with debris or materials as to render it unsafe

All necessary personal safety equipment as considered adequate by the ngineer in-Charge shall be available for use of persons employed on the Site ndmaintained in a condition suitable for immediate use; and the Contractor shall ke adequate steps to ensure proper use of equipment by those concerned

- (i) When workers are employed in sewers and manholes, which are in use the Contractor shall ensure that manhole covers are opened and manholes are ventilated at least for an hour before workers are allowed to get into them. Manholes so opened shall be cordoned off with suitable railing and provided with warning signals or boards to prevent accident to public.
- (a) No paint containing lead or lead products shall be used except in the form of paste or readymade paint

- (b) Suitable face masks shall be supplied for use by workers when paint is applied in the form of spray or a surface having lead paint dry rubbed and scrapped
- (ii) Use of hoisting machines and tackle including their attachments, anchorage and supports shall conform to the following:
- (a) These shall be of good mechanical construction, sound material and adequate strength and free from patent defects and shall be kept in good working order and properly maintained
- (b) Every rope used in hoisting or lowering materials or as a means of suspension shall be of durable quality and adequate strength, and free from patent defects
- (iii) The Contractor shall at his own expense arrange for the safety provisions as appended to these conditions or as required by the Engineer in-Charge, in respect of all labour directly employed for performance of the works and shall provide all facilities in connection therewith. In case the Contractor fails to make arrangements and provide necessary facilities as aforesaid, the Engineer in-Charge shall be entitled to do so and recover the cost thereof from the Contractor
- (iv) Failure to comply with Safety Code shall make the Contractor liable to pay to the Corporation as liquidated damages an amount not exceeding Rs. 50.00 for each default or materially incorrect statement. The decision of the Engineer in-Charge in such matters based on reports from the Inspecting Officers as defined in the Contract Labour Regulation as appended to these conditions shall be final and binding and deductions for recovery of such liquidated damages may be made from any amount payable to the Contractor
- (a) All scaffolds, ladders and other safety devices mentioned or described herein shall be maintained in a safe condition and no scaffold, ladder or equipment shall be altered or removed while it is in use. Adequate washing facilities shall be provided at or near places of work
- (b) These safety provisions shall be brought to the notice of all concerned by display on a notice board at a prominent place at the work spot. Persons responsible for ensuring compliance with the Safety Code shall be named therein by the Contractor
- (c) To ensure effective enforcement of the rules and regulations relating to safety precautions, arrangements made by the Contractor shall be open to inspection by the Engineer in-Charge or his representatives and the Inspecting Officers as defined in the Acts/Rules applicable
- (d) The Contractor is not exempted from the operation of any other Act or

Rule in force.

## Special conditions – II

- The contractor has to disburse the wages to their workers before 7<sup>th</sup> of every month through the individual's salary bank accounts
- The details of disbursement along with EPF deduction to be furnished to the TANGEDCO Engineer concerned on 10<sup>th</sup> of every month
- 3) The failure to comply the salary disbursement to the workers for the first time during the contract would be severely viewed and a 7 days notice will be issued to the erring contractor to explain the reason for non - payment of wages to their workers
- 4) The 2nd failure of payment of wages to the workers of contractor would result in breaching the contract between TANGEDCO and the contractor and TANGEDCO reserves the rights to cancel the agreement
- 5) The behaviour of contractor in non-complying the agreement will be considered to be black listed for the succeeding bid if any
- 6) The contractor workers fails to satisfy the TANGEDCO Engineer in his service (or) gives false information against the Engineer will also be liable for poor performance.
- 7) The performance of the contractor will be evaluated on the basis of his service to TANGEDCO, response to TANGEDCO clarification & explanation, coordination, com plying correct payment to the wages in correct time

All the pages in the specification shall be noted and signed by the tenderer for giving acceptance for the above terms and conditions and uploaded along with the offer.

#### TECHNICAL SPECIFICATION

# Name of the work : VGTPS / PH-II - 92.2MW - Periodical and breakdown maintenance of GTG & GBC, IA/PA & ACC, HRSG, STG, DM Plant, Fire and Safty, 60 TR Centralized AC Unit and its Auxiliaries, connected pipelines and associated valves for the period of One year from the date of commencement for the year 2022-2023.

Sl.No	Description	No. of operation	Unit Rate
		S	
1.00	GAS TURBINE		
1.01	Periodical Maintenance		
1.02	Gas Booster Compressors and its accessories: Charges for Periodical inspection of the Gas Booster Compressor gas, air, oil and water piping system for leaks and general checks for proper functioning of the system and attending the corrective action as per the direction of engineer in-charge, up keeping of the Twin oil Coolers, Duplex Filter housings, LP and HP compressor, gearbox, lube oil pumps, 6 Nos of Gas Cooler (ACHE) by thorough external cleaning and keeping the floor, platform of the houses clean and tidy. Checking the oil level and topping up of the lube oil using centrifuge as required and its connected pipe lines for any leakages, greasing of the suction, discharge and anti surge valves of the gas lines and attending any other minor unforeseen works related to the mechanical maintenance of the system as directed by the Engineer in-charge.	52	
1.03	Gas conditioning skid: Charges for Periodical inspection of the Gas conditioning skid, gas leaks and general checks for the proper functioning of the system and attending the minor corrective action as per the direction of Engineer-in-charge in the Gas conditioning skid and the Gas drain collection tank. Up keeping of the Gas conditioning skid and the Gas drain collection tank by thorough external cleaning and keeping the system clean and tidy. Draining of condensates from the scrubber, various locations in the conditioning skid and any other unforeseen minor works related to the mechanical maintenance as directed by the Engineer- in-charge.	52	

	Gas Turbine (58.5 MW), GT Accessories like Lube oil skid, Gas skid, Mist Eliminator & Exhaust system of Gas Turbine: Charges for Periodical inspection of Gas Turbine for any abnormal sound and temperature and visual inspection of gas, water, air and lube oil piping system for leaks, leaky gaskets, pump and valve packing leaks, vibration of piping and general checks and attending the corrective action required as per the direction of the Engineer in-charge. In GT Accessories Module (Lube oil skid and Gas skid) inspecting the Pumps system for piping connection for any loose hardware, accumulator system pipe line, hydraulic manifolds leakage checking and attending the leaks, Checking the lube oil tank level and topping up the lube oil with centrifuge. Also	52	
1.04	includes transporting the lube oil and up keeping the lube oil pump system, lube oil filters housing and lube oil heat exchanger housing and the hydraulic oil pumps and its system, thorough external cleaning, removing of dust and dirt oil and oil fumes etc in the lube oil and hydraulic oil filter external housing, inspecting mist eliminator fan for proper functioning, inspecting the GT Exhaust bellows for any damage, leakage, Inspecting the diverted / Guillotene damper gear box for grease leakage and cleaning, providing operation assistance during online water washing of GT, inspection of water wash pump for any abnormal sound during operation & taking remedial measures, topping up of DM water in the water storage tank, as and when required by the operation, to carryout Online water washing of GT Compressor and attending any other unforeseen minor works related to the mechanical maintenance as directed by the Engineer in - charge.		
1.05	Inlet Air filter house and Evaporative cooling system: Charges for Periodical inspection of Inlet Air Filter House system and Evaporative cooling system of GT inlet air for any abnormal sound, evaporative cooler pump strainer cleaning, replacing the filter cartridge on the air filter house as required as per the direction of Engineer in-charge. Checking & attending minor air leak in the filter house and attending any other minor unforeseen works related to the mechanical maintenance of the system as directed by the Engineer in-charge.	24	
1.06	Gas Turbine Ventilation fans, Blowers, Cooling and Sealing air fans: Charges for Periodical inspection of Gas Turbine	24	

	Ventilation fans, Blowers, Cooling and Sealing air fans		
	by thorough cleaning of the fan casings and the		
	dampers, greasing the damper's and check for free		
	operation of the standby dampers, Checking the		
	tightness of bed bolts of all the above fans, Inspecting		
	and up keeping of all cooling sealing air fans for proper		
	functioning as per the direction of Engineer in-charge		
	and any other unforeseen minor works related to the		
	mechanical maintenance as directed by the Engineer in-		
	charge.	2.1	
	Operational Assistance for routine change over of	24	
	equipments:		
	Charges for providing operation assistance during		
	change over of GT auxillaries such as Gas Turbine compartment cooling fans, Exhaust frame air blower,		
1.07	gas skid cooling fans, load compartment cooling fans,		
	DD seal air fan & GD seal air fan, checking of damper		
	operation, vibration checks and attending any other		
	unforeseen minor works related to the mechanical		
	maintenance as directed by the Engineer in - charge.		
1.08	Breakdown maintenance		
	Seal air fans of Diverter damper, Guillotine	4	
	damper,Enclosure Fans of GT Inlet/outlet and GT		
	Generator, Exhaust Fans of GT Gear Boxes, GT Gas		
	Skid, and GT Lube oil System:		
	Dismantling the outer cover and gasket. Disconnecting		
	the fan from motor shaft and cleaning of fan housing.		
	Dismantling the NRV, inspecting for any damage		
1.09	Reassembling the fan on motor shaft and closing the		
	cover with new gasket in place. Removal of bearings of NRV flap, inspecting them for healthiness and		
	replacing if necessary. (Bearings will be supplied by		
	the Board) Packing grease and reassembling the NRV		
	& normalizing, Coupling and decoupling Impeller from		
	motor Shaft, and attending any unforeseen mechanical		
	breakdown works as directed by the Engineer in-		
	charge.		
	GT Guillotine / Diverter damper inspection	6	
	work,GD DD Shut off valve Inspection Work:		
	This work involves GT Guillotine damper manhole		
1 10	door and Diverter damper manhole door open and		
1.10	visual inspection and manhole door closing work and		
	manual opening and closing of GD & DD, Inspecting		
	GD / DD Shut off valve for any seal failure, replacing wornout seal, as per the direction of Engineer – in -		
	charge.		
	GT Diverter Damper / Guillotene damper Manual	4	
1.11	operation during failure of Auto operation:		
1			

	Manual operation of Diverter Damper by enabling local mode & engaging the clutch lever & applying enormous man power to rotate the manual hand lever to facilitate open / close of Diverter Damper / Guillotene damper in case of failure of auto operation of Diverter Damper / Guillotene damper as per the direction of Engineer-in-charge		
1.12	Mist Eliminator: Break down maintenance of mist eliminator work comprises of dismantling of mist eliminator fan from motor shaft by using appropriate tools carefully, after the removal of fan cover and assessment of fan surfaces for any damage or loss of material, complete cleaning of blade surfaces with petrol, diesel reassembling the fan blade with motor shaft, commissioning the mist eliminator and normalizing as per the direction of Engineer-in-charge.	2	
1.13	<b>GBC Valves:</b> Break down maintenance of GBC suction valve / Discharge / Seal gas valve / Anti surge valve by dismantling the top casing, inspection of worm shaft, worm gear, gear wheel for any damages, attending minor rectification works, replacement of bearings if necessary grease packing, inspection of Diaphragam for any damages & replacement of diaphragam, if necessary, reassembling the gear wheel, worm gear, worm shaft and ensuring free operation of valve, attending gas leak in valve, if any as per the direction of Engineer-in-charge.	2	
1.14	Water wash skid: Attending Break down maintenance in GT water wash skid by attending water leak in water wash tank by welding, inspection of suction/discharge valves for proper function & replacement / reconditioning of valve if necessary (or) decoupling the water wash pump from motor after isolating the suction & discharge line & disassembly of the pump, checking the bearings & seals of the pump and replace the failed bearings & seals by new one, replace the parts if any as required which will be supplied by the board & reassembling the pump, Alignment checking & coupling with the motor all complete & normalizing as per the direction of Engineer-in-charge.	2	
1.15	Minor welding work: Charges for attending any minor weld defects in lube oil, air and water lines and support structures by welding, etc., as per the direction of Engineer in charge.	10	

[			
	GT & GBC Startup Assistance:	12	
	Charges for starup work in Gas Turbine, Gas Booster		
	Compressor and its axillaries, Maintenance assistance		
1.16	to attend water / oil / gas leak and Air vent releasing in		
	Lube Oil Line and Checking for any abnormalities in		
	the system during the startup as per the direction of		
	Engineer-in-charge.		
	Evaporator cooling system:	6	
	Opening the manual door of the evaporator cooling		
	system by unscrewing the lock bolts of the door,		
	remove bracket for media installation, and replace the		
1 17	media bracket complete. Check the distribution pads;		
1.17	drift eliminator assembly for scale formation if any. In		
	case new drift eliminators need to be installed,		
	materials will be supplied by board. Evaporator sump		
	complete cleaning and inspection as per the direction of		
	Engineer – in - charge.		
	Combustion Chamber Inspection work:	6	
	Gas turbine bottom side outer manhole door opening,	0	
	Combustion chamber internal doors 3 nos opening and		
	visual inspection of combustion chamber internals like		
	heat shields, burners and 1st stage rotor and stator		
	blades & vanes Visual inspection will be made by the		
1.18			
	board engineer. Aftercompleting the inspection,		
	closing the combustion chamber internal manhole		
	doors 3nos and outer cover door. The spare parts if any		
	as required which will be supplied by the board and		
	complete and normalizing as per the direction of		
	Engineer – in - charge.	4	
	Pneumatic Air Compressor:	4	
	Gas turbine blowoff valves working under the control		
	of pneumatic air compressor. Opening the outer cover,		
	draining the lube oil completly and dismandling the		
1.10	compressor internals such as air suction valve, filter		
1.19	coolant, filter seperator etc.,. After dismandling the		
	compressor unit from the motor Visual inspection will		
	be made by the board engineer. The spare parts if any		
	as required which will be supplied by the board and		
	complete normalizing as per the direction of Engineer		
	– in - charge.		
	Lube oil Heat Exchanger:	4	
	GT lube oil heat exchanger emergency break down		
	works comprise of removing the plates from the heat		
1.20	exchanger after isolating the standby heat exchanger.		
1.20	checking the Gasket condition and replace the failed		
	gaskets to new one. Complete cleaning of heat		
	exchanger plates both sides. Replace the parts if any as		
	required which will be supplied by the board and		
		1	

	minor defects as per the direction of Engineer - in -		
	charge.		
		24	
2.04	<b>Closed Circuit Cooling Water System (CCCW) :</b> Charges for Periodical inspection of Closed Cooling Water Pumps (CCCW) for any abnormal sound, temperature, any water leaks in the pipe lines, attending valve leak, vibration checking ,general checkings and CCCW PUMP & Motor Coupling fasteners inspection, Checking the expansion tank DM water level, cleaning and attending minor defects and visual inspection of Radiator Cooler (RC) Fan for any abnormal Sound, Vibration, belt visual inspection, Adjusting Belt Tension, Replacing worn out Belt by New belt, Replacing worn-out Motor Pulley, Fan Pulley Cleaning, Replacing worn-out Taper Bush, Belt	24	
	Coupling &Decoupling from Motor, Fan Bottom Round Guard fasteners Checking, Fins Visual inspection, Grease Packing of RC Fan shaft bearings as required. RC Fan leaf & Bottom supporting plates Cleaning as per the direction of Engineer -in-Charge.		
	Air Cooled Condenser (ACC) system:	24	
	Charges for Periodical inspection of Air-Cooled		
	Condenser system, including ACC Fans, ACC Gear		
	Boxes, ACC Heat Exchanger Bundles etc, observation		
2.05	for any abnormal sound, temperature, vibration, leaks		
	etc, in the above system, external cleaning of ACC		
	Gear Boxes etc., attending leaks and minor defects in		
	the above system, checking the oil level in all ACC gear boxes and topped up if necessary as per the		
	direction of Engineer in-charge.		
	Air Cooled Condenser Fin Tubes :	24	
	Charges for Periodical inspection & to carry out the		
	following preventive maintenance of ACC fin tube		
	bundles & fin cleaning as per the direction of Engineer-		
2.06	in-charge.		
	1. The tube radiator fins of ACC bundles must be kept		
	free of bugs, links and other debris.		
	2. Periodical cleaning of the ACC cooling bundles with		
2.07	service water using fin tube cleaning pump.		
2.07	Breakdown maintenance	А	
2.08	Inter Cooler / After Cooler (IA/PA) : Disassembly of IA/PA Compressor Inter cooler/After cooler and taking out tube nest from the shell, inspection, cleaning, leak checking by hydraulic testing, renewal of O rings, gaskets,(O rings, gasket etc., all be provided by the Board) reassembling and normalizing as per the direction of Engineer - in -	4	
	charge.		

1		1	
2.09	<b>Oil Replacement work (IA/PA) :</b> Draining of oil from the oil sump of IA / PA Compressor, inspection, cleaning of the sump and filter element, replacing of filter element if necessary	4	
	(oil filter will be provided by the Board) filling with lube oil and normalizing as per the direction of Engineer - in - charge.		
2.10	<b>IA/PA compressor Suction Air filter cleaning work :</b> Disassembly of suction air filter of IA/PA Compressor, disassembly of suction pipe line from LP cylinder, inspection, thorough cleaning of suction air filter and suction pipe line, replacement of suction filter (suction filter will be supplied by the Board) if necessary, reassembling and normalizing as per the direction of Engineer - in - charge.	12	
2.11	IA/PA Suction & Discharge valve work : Disassembly of suction side and discharge side valve covers, valve plates of LP and HP cylinder of IA/PA Compressor, inspection, cleaning, Renewal / Rectification of valve plates assembly, re-assembly and normalizing as per the direction of Engineer - in - charge.	2	
2.12	IA/PA Compressors Emergency Breakdown work : Emergency Breakdown maintenance of IA/PA Reciprocating compressors - 2 stage Horizontal KIRLOSKAR PNEUMATIC CO.LTD. Model: T- BTD-LM( 255mm&160mm, FAD 8.87 m3/min) comprising of disassembly of LP&HP internals such as cylinder suction & discharge valve plates assembly, piston rod, piston rings, wearing rings inspection, cleaning, rectification/replacement of spares if necessary (O rings, gaskets & spares will be supplied by the Board) and normalizing as per the direction of Engineer - in - charge.	2	
2.13	<b>Pump Breakdown works in IA/PA and ACC</b> <b>system :</b> Disassembly of cooling water pump for (Make : Mather Platt Pumps Ltd., $Q = 20 \text{ m3/hr}$ ) IA/PA Compressor system, inspection of internal parts, cleaning, rectification / renewal of parts, re-assembly (gaskets, spares will be supplied by the Board), Dismantling the ACC fin tube cleaning pump(Make:KSB Pumps Ltd., $Q = 6 \text{ m3/hr}$ ) into its parts. Cleaning of the parts, replace the failed Bearing, Mechanical Seals, Gland packing etc., If require reassembling alignment checking and coupling as per the direction of Engineer - in - charge.	6	

	IA/PA LP & HP side renewal of piston rings &	4	
	clearance checking work :		
	Disassembly of HP or LP cylinder outer cover and		
2.14	removal of piston and pressure packing rings cleaning		
	and renewal of pressure packing rings, assembling		
	piston, adjusting the piston clearances, assembling the		
	cylinder outer cover, normalizing as per the direction of		
	Engineer - in - charge.		
	IA/PA NRV servicing work :	4	
	Disassembly of 100NB NRV in the discharge air line of		
2.15	the compressor, Inspection, cleaning, lapping and blue		
	matching, reassembling and normalizing as per the		
	direction of Engineer - in - charge.		
	Air Dryer Unit (IA/PA) :	2	
	Disassembly of Inspection cover of Instrument Air		
	dryer unit desiccant tower, removal of desiccant,		
	cleaning of internals, refilling of new desiccant and		
2.16	closing of inspection cover, disassembly of prefilter		
2.10	and after filter, inspection, cleaning, assembly of filters		
	supplied by the Board, disassembly and cleaning of		
	purge control valve and change over valve and		
	normalizing the operation of Instrument Air dryer unit		
	as per the direction of Engineer - incharge.		
	Breakdown maintenance work of PSA system :	2	
	Disassembly of inspection cover for Process Air		
	Nitrogen gas unit Carbon molecular sieves tower,		
	removal of Carbon molecular sieves, cleaning of		
	internals, refilling of new Carbon molecular sieves and		
2.17	closing of inspection cover, disassembly of prefilter,		
	inspection, cleaning, assembly of filters supplied by the		
	Board, disassembly and cleaning of Pressure control		
	valve and change over valve and normalizing the		
	operation of Process Air Nitrogen gas unit as per the		
	direction of Engineer - incharge.		
	CCCW System Strainer / Various Valves / Bellow	4	
	Work/Motor Alignment work :		
	400 NB New Butterfly valve, 400 NB New Non Return		
	Valves Replacement work, Expansion rubber bellow		
	leak attending work ,CCCW Pump Suction Strainer		
2.18	cleaning, attending any other unforeseen minor defects		
	related to mechanical maintenance work (or) replacing		
	old 400 NB Expansion Rubber bellows (or) de-		
	coupling and coupling of motor in case of failure to co-		
	ordinate electrical maintenance work, Alignment		
	checking and coupling with the motor, completion and		
	normalizing as per the direction of Engineer in-charge.	10	
2.19	Minor welding works :	10	
	Charges for attending any minor weld defects in lube		

	oil, air and water lines and support structures by		
	welding as per the direction of Engineer in charge.		
	IA/PA LP &HP side water jacket cleaning.	4	
	Disassembly of LP and HP water jacket inspection		
2.20	covers of IA/PA Compressor, cleaning the water jacket,		
2.20	renewal of gasket packing, reassembling and		
	normalizing as per the direction of Engineer-in-charge	4	
	IA/PA Lube oil tank cleaning & Gear pump	4	
2 21	<b>inspection work:</b> Disassembly of lube oil gear pump,		
2.21	inspection cleaning, reneewal of spares if necessay		
	reassembling and normalizing as per the direction of		
	Engineer- in-charge.		
• • •			
3.00	STEAM TURBINE		
3.01	Periodical Maintenance		
	Charges for periodical inspection on STG Oil Pump	52	
	such as Emergency Oil Pumps, jack oil pumps,		
	OVEFS, centrifuge, arresting of oil leaks etc., and		
	carrying out regular maintenance works like external		
	cleaning, checking and topping up of oil level in		
3.02	pumps, MOT through centrifuge, cleaning of cooling		
	water line, cleaning of oil centrifuge, collection of oil		
	leakages if any and topping up through centrifuge,		
	arresting of gland leaks, easing the valve operation etc.,		
	wherever necessary, as per the direction of Engineer –		
	in- charge.		
	Charges for periodical inspection of LO cooler, LO	26	
	filters, Governing system, Emergency stop valves,		
	Control valves and carrying out regular maintenance		
	works like arresting of oil leaks in flanges and valve		
3.03	glands by tightening the glands and replacing of		
	gaskets if required, applying grease wherever		
	necessary, external cleaning of governing system and		
	turbine body and its accessories as per the direction of		
	Engineer – in- charge.		
	Charges for periodical inspection on surgetank, HP/LP	26	
	flash tank and STG flash tank, STG waste oil sump		
	pumps, cleaning and keeping the area clean and tidy,		
2.04	attending any defects like manhole leaks, flange leaks		
3.04	etc. by tightening the flanges or by changing the gasket,		
	applying grease to all hand operated valves and easing		
	the operation of the valves as per the direction of		
	Engineer – in- charge.		
	Charges for welding joints upto 50mm per joint in	30	
	steam & water lines and support structures by welding		
3.05	including removal of the insulation, refixing the		
5.05	insulation after testing the weld by using DPT kit as per		
	the direction of Engineer-in-charge.		
	the uncetton of Engliteer-in-charge.		

Charges for periodical inspection of the Steam Turbine and its auxilaries, HP/IP/LP Bypass station and observe for any gland/bonnet leaks in various valves and rectify the defect by removal of the old gland packing/gasket and replacing new one, lubricating of the valves and easing the valve operation as per the direction of Engineer – in- charge.	52	
Charges for start up work in Steam Tubine (ST) and its auxiliaries, maintenance assistance for valve operations and to attend water/ steam/ Oil leak during start up as per the direction of Engineer - in-charge.	24	
Charges for periodical inspection of Hot well drain pumps, Gland steam condenser and gland steam exhaust fans and carrying out regular maintenance works like external cleaning, cleaning and replacement of strainers, checking and topping up of oil for bearings, coupling check and attending valve gland leaks, flange leaks etc as per the direction of Engineer- in-charge.	24	
Cleaning and replacement of strainers and filters in STG lub oil system (Governing system filter, control oil filter and JOP filter) etc., as per the direction of Engineer-in-charge.	12	
Charges for welding joints upto 50mm diameter steam/water lines using High Pressure Welder including removal of the insulation, refixing the insulation after testing the weld by using DPT kit as per the direction of Engineer-in-Charge.	20	
Charges for periodical inspection of CEP's and carrying out regular maintenance work like external cleaning, arresting of gland leaks in the system valves, checking of oil level easying valve operation and replacement of gaskets if any etc., as per direction of Engineer-in-charge.	26	
Charges for periodical inspection of Vacuum pump's includes ACW pump cooling towers and connected line etc., and carrying out regular maintenance works like external of cooling water line arresting of gland leaks etc., wherever necessary per the direction of Engineer- in-charge.	26	
Breakdown maintenance of various pumps and fans in STG: Charges for decoupling, dismantling of the pump assembly, checking of mechanical seal, bearings and replacement if necessary, replacement of casing/impeller wear ring, shaft protection sleeve, impeller and oil labyrinth, cleaning of suction strainer,	24	
	Turbine and its auxilaries, HP/IP/LP Bypass station and observe for any gland/bonnet leaks in various valves and rectify the defect by removal of the old gland packing/gasket and replacing new one, lubricating of the valves and easing the valve operation as per the direction of Engineer – in- charge. Charges for start up work in Steam Tubine (ST) and its auxiliaries, maintenance assistance for valve operations and to attend water/ steam/ Oil leak during start up as per the direction of Engineer - in-charge. Charges for periodical inspection of Hot well drain pumps, Gland steam condenser and gland steam exhaust fans and carrying out regular maintenance works like external cleaning, cleaning and replacement of strainers, checking and topping up of oil for bearings, coupling check and attending valve gland leaks, flange leaks etc as per the direction of Engineer- in-charge. Cleaning and replacement of strainers and filters in STG lub oil system (Governing system filter, control oil filter and JOP filter) etc., as per the direction of Engineer-in-charge. Charges for welding joints upto 50mm diameter steam/water lines using High Pressure Welder including removal of the insulation, refixing the insulation after testing the weld by using DPT kit as per the direction of Engineer-in-Charge. Charges for periodical inspection of CEP's and carrying out regular maintenance work like external cleaning, arresting of gland leaks in the system valves, checking of oil level easying valve operation and replacement of gaskets if any etc., as per direction of Engineer-in-charge. Charges for periodical inspection of Vacuum pump's includes ACW pump cooling towers and connected line etc., and carrying out regular maintenance works like external of cooling water line arresting of gland leaks etc., wherever necessary per the direction of Engineer- in-charge. <b>Breakdown Maintenance</b> <b>Grarges</b> for decoupling, dismantling of the pump assembly, checking of mechanical seal, bearings and replacement if necessary, replacement of	Turbine and its auxilaries, HP/IP/LP Bypass station and observe for any gland/bonnet leaks in various valves and rectify the defect by removal of the old gland packing/gasket and replacing new one, lubricating of the valves and aesing the valve operation as per the direction of Engineer – in- charge.Charges for start up work in Steam Tubine (ST) and its auxiliaries, maintenance assistance for valve operations and to attend water/ steam/ Oil leak during start up as per the direction of Engineer - in-charge.24Charges for periodical inspection of Hot well drain pumps, Gland steam condenser and gland steam exhaust fans and carrying out regular maintenance works like external cleaning, cleaning and replacement of strainers, checking and topping up of oil for bearings, coupling check and attending valve gland leaks, flange leaks etc as per the direction of Engineer- in-charge.12Cleaning and replacement of strainers and filters in STG lub oil system (Governing system filter, control oil filter and JOP filter) etc., as per the direction of Engineer-in-charge.12Charges for velding joints upto 50mm diameter steam/water lines using High Pressure Welder including removal of the insulation, refixing the insulation after testing the weld by using DPT kit as per the direction of Engineer-in-Charge.26Charges for periodical inspection of CEP's and carrying out regular maintenance work like external cleaking of oil level easying valve operation and replacement of gaskets if any etc., as per direction of Engineer-in-charge.26Charges for periodical inspection of Vacuum pump's includes ACW pump cooling towers and connected line etc., and carrying out regular maintenance works like external of cooling water line arresting of gland leaks etc., wherev

<ul> <li>4.05 maintenance work like external cleaning, checking and topping up of oil for bearings, cleaning of mechanical seal cooler, suction strainers, arresting of flange leaks, gland leak in valves &amp; renewal of gland packings if required cleaning of cooling water line, applying grease</li> </ul>				
4.05 topping up of oil for bearings, cleaning of mechanical seal cooler, suction strainers, arresting of flange leaks, gland leak in valves & renewal of gland packings if required cleaning of cooling water line, applying grease				
seal cooler, suction strainers, arresting of flange leaks, gland leak in valves & renewal of gland packings if required cleaning of cooling water line, applying grease	1.05			
gland leak in valves & renewal of gland packings if required cleaning of cooling water line, applying grease	4.05			
required cleaning of cooling water line, applying grease				
in valve & easing the operation of valves wherever				
		in valve & easing the operation of valves wherever		

	necessary as per direction of Engineer -in-charge.		
	Charges for periodical inspection of Deaerator, Feed	24	
	Tank, Plate heat Exchanger and connected pipes and	2.	
	valves and carrying out regular maintenance work like		
	external cleaning, arresting of flange leaks, changing of		
4.06	gaskets, gland leak in valves & renewal of gland		
	packing if required, applying grease in valve & easing		
	the operation of valve wherever necessary asper the		
	direction of Engineer - in - charge.		
	Charges for periodical inspection of HRSG drain	36	
	system, flash tanks, IBD and CBD tanks, connected	50	
	pipelines and valves etc., observe for any water/steam		
	leaks and rectify the minor defects by tightening of		
4.07	gland/removal of gland packings and replacing by new		
	one, lubricating of valves, easying the valve operation		
	and renewal of gaskets as per the direction of Engineer-		
	in-charge.		
	Charges for welding joints upto (100 mm Dia) in	36	
	steam & water lines and support structures by welding		
4.08	including removal of the insulation, refixing of the		
	insulation after testing the weld by using DPT kit as per		
	the direction of Engineer-in-charge.		
	Charges for welding joints upto 100mm diameter steam	20	
	/ water lines using High Pressure Welder including		
4.09	removal of the insulation, refixing of the insulation		
	after testing the weld by using DPT kit as per the		
	direction of Engineer-in-Charge.		
	Charges for periodical inspection of hydrazine dosing	24	
	pumps and its auxiliary piping, flanges & tank agitator		
	for carrying out cleaning and rectification works like,		
4.10	attending flange leak & valve gland leaks in the dozing		
4.10	system, arresting of gland leaks in pumps, renewal of		
	gland packing, if neccessary, topping up of oil,		
	adjusting of sroke lenth, lubricating of bearings, etc., as		
	per direction of Engineer -in- charge.		
4.11	BREAKDOWN MAINTENANCE WORKS		
	Breakdown maintenance of various pumps in	30	
	HRSG:		
	Charges for decoupling, coupling hub removal,		
4.12	checking of bearing, oil labrinth and mechanical seals		
	and replacing if necessary, replacement of damaged		
	gasket and o ring etc., reinstallation, alignment and		
	coupling after the work was completed, etc., as per		
	direction of Engineer - in- charge.	22	
	Overhauling of MOV/Hand operated valves and NPVs of various sizes Charges for disassembling	22	
4.13	<b>NRVs of various sizes</b> Charges for disassembling		
	actuator if any, removal of insulation, disassembling		
	valve completely, overhauling of valves including		

		n	
	inspection, cleaning of all parts, rectification of minor		
	defects, lapping of valve seat, valve globe/gate and blue		
	matching, assembling of valve, renewal of gland		
	packing, assembling actuator if any, providing		
	insulation, checking of valve operation and completing		
	the work etc., as per the direction of Engineer-in-		
	charge.		
4.14	Thermal Insulation Removal for Single layer,	20	
4.14	lagging and cladding.		
4.1.5	Thermal Insulation Reinsulation for Single layer,	20	
4.15	lagging and cladding.		
	Internal Inspection of HRSG:	3	
	Charges to facilitate the internal inspection of HRSG	5	
4.16	by opening the manhole door assy. in all the elevations		
	whenever required and closing the manhole door assy		
	after inspection and renewal of sealing ropes etc., if		
	required as per the direction of Engineer - in - charge.		
	<b>Overhauling of Pneumatic Operated Flow</b>	6	
	Control/Temperature Control/HP Spray		
	Control/Drain Valves:		
	charges for disassembling actuator if any, removal of		
	insulation, disassembling valve completely,		
	overhauling of valves including inspection, cleaning of		
4.17	all parts, rectification of minor defects, lapping of valve		
	seat, valve globe/gate and blue matching, assembling of		
	valve, renewal of gland packing, assembling actuator if		
	any, providing insulation, checking of valve operation		
	and completing the work, including T&Ps and		
	consumables as per the direction of Engineer-in-charge.		
	Plate Heat Exchanger for Condensate system:	2	
	Charges for dismantling the plate heat exchanger		
	asssembly, for attending any water leakage, removal of		
	plateheat exchanger plates (143 nos) & cleaning the		
4.18	plates, inspection of rubber gaskets, replacing the new		
	gasket if required, again re assembling of plate heat		
	exchanger etc., as per the direction of Engineer -in -		
	charge.		
5.00	DM PLANT MAINTENANCE		
5.01	Periodical Maintenance		
	Charges for periodical inspection of all types of	24	
	Vertical / Horizontal pumps in DM Plant and other		
	sump pumps etc., observe for any gland leaks, rectify		
5.02	the same by gland tightening or changing of gland		
5.02			
	packing, lubricating of bearings, cleaning of strainer,		
	keeping the area neat and tidy etc., as per the direction		
	of Engineer -in-Charge.	-	
5.03	Charges for periodical inspection of Air Blowers in	24	

M plant area, external cleaning of the same, keeping nem neat and tidy and attending to minor repairs including decoupling of the Blowers, coupling of the ame after works, lubricating of bearings, topping up of il, Alignment works etc., as per the direction of		
	24	
lant, clarified water system, electronic dozing pumps, leaning and keeping the area clean and tidy, attending ny minor repairs in floculator agitator, flash mixer, lectronic dozing pumps etc., as per the direction of ngineer -in-Charge.	24	
harges for periodical inspection of De-gassing tower, ir blowers of De-gassing tower, caustic lye and HCL orage tank etc., for any defects, external cleaning of he same, keeping the area neat and tidy and carrying ut regular maintenance works including minor repair tc., as per the direction of Engineer -in-Charge.	12	
harges for periodical inspection and carrying out the egular maintenance of R.O Booster Pumps, R.O skids, and R.O lines in DM plant, including minor repairs ke attending to gland leaks in pumps, valves, flange bints leak, lubricating of pumps, bearings, valves etc and keeping the area neat & tidy., as per the direction of Engineer -in-charge.	24	
harges for periodical inspection of all types of hemical dosing pumps in DM plant area ,and carrying ut rectification of minor defects,cleaning the umps,arresting of leaks in suction discharge line oses,checking of dosing, keeping the area neat and	24	
harges for Routine maintenance and cleaning of Acid and Lye dilution / measuring tank for mixed bed, eeping the area neat & tidy and attending to any minor efects etc., as per the direction of Engineer-in- charge.	12	
harges for Regular maintenance of all types of valves a D.M. Plant including minor repairs like replacement f stud, stem, diaphragms, actuator bush including eplacement of new valves., as per the direction of ngineer-in-charge.	24	
harges for Regular maintenance of pipelines of all zes in DM plant area, such as attending flange leaks, ipelines leaks changing of gasket etc., as per the irection of Engineer-in-Charge.	24	
harges for Replacement of catridge filter, Removal of ld catridge filter and replacement of new one etc., as er the direction of Engineer-in-charge.	12	
	cluding decoupling of the Blowers, coupling of the me after works, lubricating of bearings, topping up of l, Alignment works etc., as per the direction of ngineer -in-Charge. arages for periodical inspection of the Pre treatment ant, clarified water system, electronic dozing pumps, eaning and keeping the area clean and tidy, attending y minor repairs in floculator agitator, flash mixer, ectronic dozing pumps etc., as per the direction of ngineer -in-Charge. arages for periodical inspection of De-gassing tower, r blowers of De-gassing tower, caustic lye and HCL orage tank etc., for any defects, external cleaning of e same, keeping the area neat and tidy and carrying tt regular maintenance works including minor repair c., as per the direction of Engineer -in-Charge. arages for periodical inspection and carrying out the gular maintenance of R.O Booster Pumps, R.O skids, d R.O lines in DM plant, including minor repairs te attending to gland leaks in pumps, valves, flange ints leak, lubricating of pumps, bearings, valves etc d keeping the area neat & tidy., as per the direction Engineer -in-charge. marges for periodical inspection of all types of emical dosing pumps in DM plant area, and carrying tt rectification of minor defects, cleaning the muss, arresting of leaks in suction discharge line ses, checking of dosing, keeping the area neat and ly etc., as per the direction of Engineer-in-charge. marges for Routine maintenance and cleaning of Acid d Lye dilution / measuring tank for mixed bed, eping the area neat & tidy and attending to any minor fects etc., as per the direction of Engineer-in- charge. marges for Regular maintenance of all types of valves D.M. Plant including minor repairs like replacement stud, stem, diaphragms, actuator bush including placement of new valves., as per the direction of ngineer-in-charge. marges for Regular maintenance of pipelines of all zes in DM plant area, such as attending flange leaks, pelines leaks changing of gasket etc., as per the rection of Engineer-in-Charge.	cluding decoupling of the Blowers, coupling of the me after works, lubricating of bearings, topping up of l, Alignment works etc., as per the direction of ngineer -in-Charge. 10 arges for periodical inspection of the Pre treatment ant, clarified water system, electronic dozing pumps, eaning and keeping the area clean and tidy, attending y minor repairs in floculator agitator, flash mixer, ectronic dozing pumps etc., as per the direction of ngineer -in-Charge. 12 arages for periodical inspection of De-gassing tower, to blowers of De-gassing tower, caustic lye and HCL orage tank etc., for any defects, external cleaning of e same, keeping the area neat and tidy and carrying tr tregular maintenance works including minor repairs c., as per the direction of Engineer -in-Charge. 13 arages for periodical inspection and carrying out the gular maintenance of R.O Booster Pumps, R.O skids, d R.O lines in DM plant, including minor repairs te attending to gland leaks in pumps, valves, flange ints leak, lubricating of pumps, bearings, valves etc d keeping the area neat & tidy., as per the direction Engineer -in-charge. 14 arges for periodical inspection of all types of emical dosing pumps in DM plant area, and carrying tr ectification of minor defects, cleaning the imps, arresting of leaks in suction discharge line ses, checking of dosing, keeping the area neat and ly etc., as per the direction of Engineer-in-charge. 15 arges for Routine maintenance and cleaning of Acid d Lye dilution / measuring tank for mixed bed, eping the area neat & tidy and attending to any minor fects etc., as per the direction of Engineer-in-charge. 16 arges for Regular maintenance of all types of valves D.M. Plant including minor repairs like replacement stud, stem, diaphragms, actuator bush including placement of new valves., as per the direction of gineer-in-charge. 17 arges for Regular maintenance of pipelines of all tes in DM plant area, such as attending flange leaks, pelines leaks changing of gaket etc., as per the rection of Engineer-in-Charge

<b>6.00</b> <b>6.01</b> 6.02	Fire Protection System: Periodical Maintenance Regular Maintenance of Fire Hydrant System and Fire water spray system : Charges for Periodical inspection of any	52

	system etc., and any other unforeseen works as directed		
	by the engineer $-$ in $-$ charge.		
	To carryout assisting and upkeeping the stores at	300	
	VGTPS / Ramnad by carring out the following works.		
	1. Receiving and collecting the supply materials as		
	per the supply / purchase order.		
6.06	2. Segregate the material and arranging.		
	3. Cleaning the materials and up keeping the		
	materials.		
	4. To help the stores officers for the periodical		
	inspection and verification and providing the necessary		

		[	
	assistance for any other un foreseen minor works		
	related to the store as directed by the store supervisor.		
	5. Preparing the inventory of the stores and		
	computerising the spares and materials.		
	Charges for Periodical inspection of Pumps and	12	
	blowers in STP and ETP area, observe for any gland		
6.07	leaks rectify the same by gland tightening or changing		
0.07	the gland packings lubricating of bearings, topping up		
	of oil, keeping the area neat and tidy etc., as directed by		
	the engineer $-$ in $-$ charge.		
6.08	BREAKDOWN MAINTENANCE:-		
	Trace out the actual puncture location in the hydrant	12	
	and spray lines, isolating the valves for water leak		
	arresting, fabrication and pipeline welding work in		
6.09	Hydrant and spray lines after attending the leak,		
	charging the line for leak testing work etc., and any		
	other unforeseen works as directed by the engineer $-$ in		
	- charge.		
	Dismantling the Hydrant line valves/Spray line	8	
	valves/Sprinkler System valves in Fire fighting system		
	for inspection, greasing/replace the defective valve by		
6.10	new one which will be supplied by TANGEDCO,		
	reassembling the valves and lines, normalize the system		
	etc., as per the direction of Engineer in-charge.		
	Labour charges for Replacement of defective N2 /	4	
	CO2 Cylinders, defective Valves in N2/CO2 Cylinders,		
	Hose lines, etc., in the CO2 flooding the system, and		
6.11	refilling of N2 and Co2 gas, leak testing, and		
0111	normalising the system, etc. (cylinders, valves, hoses,		
	N2, CO2 will be supplied by the TANGEDCO) as per		
	the direction of Engineer-in- Charge.		
	Vertical Pump:	4	
	Break down maintenance of all types of vertical pumps		
	in ETP and STP systems etc, like cleaning suction		
	strainers, decoupling of pump and motor, inspection of		
6.12	pump internals, replacing the impeller / casing wearing		
	/ Bearing / Oil seals etc and assembling the pump,		
	coupling the pump with motor as per the direction of		
	Engineer-in- Charge.		
	Break down maintenance of Blowers in AHU & STP	4	
	system:		
	Break down maintenance of Blowers in AHU & STP		
	system, removal of V Belts, dismantling of Air Blowers		
6.13	in STP, inspection of bearings, gears, impellers / lobes,		
0.10	seals etc, replacement of worn out parts, if required,		
	assembling of the blowers, alignment of the blower		
	with motor and refixing of V- Belts as per the direction		
	of Engineer-in- Charge.		
L	a zuginoor in chargo.		

	LIDDE line Lainta	20	·
	HDPE line Joints:	20	
	Labour Charges for removing the damaged HDPE		
6.14	pipeline in ETP and STP systems and renewal of		
	pipelines and fitting like stub end, flange and bend etc.,		
1	and welding HDPE joint by special technique upto 100		
i	mm size as per the direction of Engineer-in- Charge.		ļ
	Electronic Dosing Pumps:	2	
	Dismantling of the suction & discharge tubes of the		
	pump, checking the pump internals / replacement of		
6.15	worn out parts of the pumps and assembling of the		
1	same, checking of its stroke and connecting suction and		
1	discharge tubes of the pump after completion of the		
1	work in ETP and STP system etc., as per the direction		
<b>=</b> 00	of Engineer-in- Charge.		ļ

7.01	Periodical and Regular Maintenance:		ļ
	Charges for Periodical inspection of 60 TR centralized	52	
7.02	AC system for any abnormal noise, leak in 60TR		
	centralized AC units of MCR including attending		
	minor defects as per the direction of Engineer incharge.		[
	Charges for Periodical inspection of 60 TR centralized	10	
7.03	AC system for checking and cleaning of AC Plant		
	inlet/outlet ducts and checking of damper operation		
ļi	etc., as per the direction of Engineer-in-Charge.		
	Charges for Periodical inspection of AHU in 60 TR	12	
	centralized AC system for removing 2sets of evaporator		
7.04	Air intake filters for cleaning with air and water, re		
	fixing evaporator air intake places etc., as per the		
	direction of Engineer-in-Charge.		
	Charges for Periodical inspection of Air handling	12	
7.05	system in 60 TR centralized AC unit for cleaning		
,.05	evaporator coil fins with water & air as per the		
ļi	direction of Engineer-in-Charge.		
1	Charges for Periodical inspection of Condensing unit of	12	
	60TR capacity AC Compressor in Centralized AC		
7.06	system for inspection safety relief valve, internal		
	cleaning by using of HCL Acid / water, etc., as per the		
i	direction Engineer In charge.		
1	Charges for Periodical inspection of AHU blowers for	12	
7.07	replacement of worn out parts if any, assembling of the		
7.07	blowers, alignment of the blower with motor etc., as		
ļi	per the direction of Engineer-in-Charge.		
-	Charges for Periodical inspection of 60 TR centralized	6	
7.08	AC system, if any defects / leakages noticed in drain		
7.00	line to be attended and cleaned as per the direction of		
L I	Engineer-in-Charge.		
7.09	Charges for Periodical inspection of AHU of 60 TR	12	
7.09	centralized AC unit, for assessment of internals of gas		

r		ſ	[ ]
	expansion valve, rectification of fault/replacement by new gas expansion valve supplied by the TANGEDCO as per the direction of Engineer-in-Charge.		
	Charges for Periodical inspection of ACW cooling	24	
	water pumps in 60TR centralized AC system to		
7.10	observe any gland leaks, lubrication, top up of oil,		
	attending any minor defects etc., as per the direction of		
	Engineer-in-Charge.		
7.11	Charges for Periodical inspection of Cooling Tower in	18	
	ACW system, as per the direction Engineer In charge.	10	
	Charges for Periodical inspection of split AC / Tower	18	
7.12	AC units, for leak testing using N2 gas and refilling of R22 gas (N2 & R22 gasses will be supplied by the		
1.12	TANGEDCO) as per the direction of Engineer-in-		
	Charge.		
	Charges for Periodical inspection of split AC / Tower	12	
7 1 2	Ac units, for removal of air filters, inspection and		
7.13	cleaning of air filter elements as per the direction of		
	Engineer-in-Charge.		
	Charges for Periodical inspection of split AC / Tower	12	
	AC units, for opening of external covers of condenser		
7.14	and evaporator, inspection of condenser coils and		
	thorough cleaning etc., as per the direction of		
	Engineer-in-Charge.	20	
	Charges for Periodical inspection of Split AC / Tower AC units, for replacing defective sealed compressor by	20	
	new one, refilling of R22 gas, leak testing by N2 gas		
7.15	and refilling of R22 Gas as per the direction of		
	Engineer-in- Charge. (R22 & N2 Gas will be supplied		
	by the TANGEDCO).		
	Labour charges for welding joint of 100 NB & 80 NB	10	
7.16	MS / CS pipe lines in ACW system etc., as per the		
	direction of Engineer-in-charge.		
7 17	Labour charges for welding joint of 50 & 25 NB MS /	30	
7.17	CS pipe lines in ACW system etc., as per the direction		
	of Engineer-in-charge. Charges for Periodical inspection of cleaning of air	6	
	filters / fresh air supply grills in ventilation units of	0	
7.18	cable spreader room, etc., as per the direction of		
	Engineer-in-Charge.		
	Charges for Periodical inspection of ventilation blower	12	
	of cable spreader room for attending minor defects and		
	adjustment of belt tension / replacement of belts in the		
7.19	Blower, replacement of worn out parts, assembling of		
,,	the blowers alignment of the blower with motor,		
	greasing and normalizing etc, as per the direction of		
	Engineer-in-Charge.		

7.20	BREAKDOWN MAINTENANCE		
7.20	Charges for breakdown work in 60TR capacity AC Compressor unit including decoupling the motor by releasing the coupling, dismantling the external covers of compressor unit, inspection of compressor internals for any damages, replacement of suction / discharge reeds, if necessary, attending minor rectification works and refilling of R22 gas, motor to compressor alignment checking as per the direction of engineer in charge. (The required spares, lube oil, N2 and R22 gas	2	
7.22	will be supplied by TANGEDCO) Charges for 60TR capacity AC Compressor condensing unit Checking the complete unit with 1.25 times of the operating pressure with N2, attending any leak if leak is there as per the direction Engineer In charge.	2	
7.23	Breakdown maintenance of Various Pumps in ACW and ETP, STP System: Charges for disassembly of various size Horizontal pumps in ACW and ETP, STP System for ACW system Inspection of internal parts, cleaning, rectification / renewal of parts, re-assembly (gaskets, spares will be supplied by the TANGEDCO) normalizing as per the direction of Engineer - in - charge.	12	
7.24	Charges for overhauling of Cooling Tower in the ACW system Cleaning, inspection and changing the defective parts such as Fills, Floats, Blades, Fan etc., as per the direction Engineer In charge. (which will be supplied by the TANGEDCO).	4	
7.25	Charges for breakdown work in Air Handling unit of MCR including dismantling of external covers of AHU, removal of Air Filters, inspection/replacement of Gas Expansion Valve, visual inspection for any damages in evaporator coil, leak testing with N2 Gas, attending leak if any by brazing, thorough cleaning of evaporator coil with air & water, Refilling of R22 gas, testing and normalizing as per the direction of Engineer incharge. (N2 and R22 gas will be supplied by TANGEDCO)	2	
7.26	Charges for Disassembly of Tyre Coupling of 60 TR AC Compressor in centralized system Inspection of all parts, cleaning, rectification / renewal of parts, re- assembly (Coupling Tyre, spares will be supplied by the TANGEDCO) alignment checking with motor and normalizing as per the direction of Engineer - in - charge.	2	
7.27	Charges for overhauling the Ventilation Damper, checking the damper open / close position and its blades / replacing the wornout parts / blades, inspecting	2	

	the Ducts / replacing the corroded portion of the ducts for the Cable gallery Room, etc., as per the direction Engineer-in-charge. The required spares will be supplied by the TANGEDCO.		
7.28	Charges for breakdown work in Ventilation system Blowers by removing the belt, pulley & bearings for any damages, replacement of pulley/bearings, if necessary, cleaning the blower (or) decoupling & coupling of motor, alignment cheking, assembling & normalizing as per the direction of Engineer - in - charge	2
