Title

Designing a Self-Assessment Framework and Process for CoVEs

Please note that this is not a call for tenders but a publication announcing the Contracting authority's [intention to publish a future negotiated low or middle value procedure](#).

Description

This assignment is concerned with: the overall design of the self-assessment process; the organisation and writing of the criteria and the evidence indicators; other evidence collection; and the reporting functionality. Operationalising this process in an information system will be carried out under a separate contract. The contractor that undertakes this TOR will work closely with the organisation that is separately contracted to design and develop the information system. In addition, the contractor for this ToR will be expected to participate and support the consultation process at all stages of the work and to coordinate the two pilots. ETF will take the lead in engaging stakeholders in the consultation, for example CoVEs, international VET Associations, vocational education development organisations, trade unions. In addition, ETF will take the lead in recruiting CoVEs to participate in the two pilots. Further, the contractor will coordinate its work with the separate contractor commissioned to develop a feasibility study for an award for Centres of Vocational Excellence (which is a separate work package).
