Title

STUDY FOR THE DIGITAL DECADE – INDICATORS FOR EID TARGET

Please note that this is not a call for tenders but a publication announcing the Contracting authority's [intention to publish a future negotiated low or middle value procedure.](#)

Description

The aim of this study is to develop an EU-wide robust methodology to collect data on the usage, in the public and private sector, by citizens of eID means / European Digital Identity Wallets issued under the current eIDAS Regulation and its revisions. The methodology, which must be in consistency with the Digital Economy and Society Indicator (DESI) reporting framework, will be used to measure progress towards the Digital Decade target that, by 2030, 80% of citizens should use a digital ID solution.
