**Title**

Electrical, electronic & mechanical components

*Please note that this is not a call for tenders but a publication announcing the Contracting authority's [intention to publish a future negotiated low or middle value procedure](#).*

**Description**

For its scientific research centre in Geel (Belgium), the European Commission wants to set up a framework contract for 4 years for purchasing: — electric and electronic components, cables, connectors, tools and instrumentation, — mechanical parts and tools. For upgrades and changes on our two accelerators it is needed to have a flexible ordering contract for electrical materials. It must be possible to order the items via an online webshop of the supplier. This webshop must give an overview on the items in stock. A general overview of materials are, cabling, automation components, sensors, level sensors, WAGO plc's, power supplies, fuses, cabinets, connectors, cable identification systems, cable ducts etc...
