Title

Fostering Digitisation of Public Sector and Green Transition in Europe through the Use of an Innovative European GovTech Platform - CNECT/LUX/2021/OP/0053

Description

This pilot project aims to support public administrations in the adoption of cost-effective and flexible digital solutions by introducing the GovTech ecosystem to the European public sector. By following and scaling up the GovTech platform model, already used in different forms by GovTech Labs around Europe, public administrations across Europe can work together more easily to solve shared challenges and more cost-effectively to adapt existing projects to their individual needs. The use of the GovTech model across the EU will offer benefits of scale to both public administrations and providers of digital services. Such providers, in particular innovative European SMEs and start-ups, will gain recognition as trusted partners in the delivery of modern digital solutions for public services. The overall aim is to boost the European GovTech market and help public administrations access tailor-made digital solutions, thus fostering modernisation of Europe's public sector.
