10/06/2022

Status:
Open

Tender reference number	ESTAT/2022/MVP/0008-ExA
Title	Collection and processing of detailed trade data from non-EU countries and international organisations
	***Please note that this is not a call for tenders but a publication announcing the Contracting authority's** intention to publish a future negotiated low or middle valueprocedure.*
Description	The collection of detailed data on non-EU international trade in goods is based on various co-operation programmes and bilateral agreements. Partners of these data exchanges are either international organisations (United Nations, IMF etc.) or specific countries. Countries exchange information either through their participation in specific programmes (Medstat, Instrument for Pre-Accession Assistance (IPA), European Neighbourhood Partnership Instrument (ENPI), etc.) or through a bilateral agreement (e.g. China) with Eurostat. Data collected are integrated into Eurostat databases, in particular into the international trade in goods statistics database (Comext). The main users of the detailed statistics on international trade in goods are other Directorates-General of the European Commission such as DG TRADE, DG AGRI, DG REGIO, DG MARE. The main objective is to make detailed statistics on international trade in goods transmitted by non-EU countries or by international organisations, available through the Comext database. Prior to being loaded into Comext and disseminated, the quality of the data must be checked and this may trigger corrections, aggregations and transformations involving frequent contact with the different data providers
Contract type	Services
Procedure type	Planned negotiated procedure for middle/low value contracts
Status	Open
