number**

RTD/2022/OP/0004

**Title**

Development of Life Cycle Information

**Description**

The objective of this public procurement twofold. First, it is the development of a framework for the environmental footprint database including the definition of rules, roles and responsibilities of the different actors (lot 1). Secondly, it is to develop scientifically robust life-cycle data for sectors related to energy, transport, packaging, end-of-life, metals and minerals, chemicals, food and feed and bio-based materials (lot 2). The contractor is expected to develop aggregated, partially disaggregated and fully disaggregated life cycle datasets in full accordance with the Environmental Footprint (EF) compliant data guide and its future updates. The aggregated and partially disaggregated data will be publicly available for application by economic actors and policy makers, and underpin relevant policies at EU, national and regional level.
