Time limit for receipt of tenders:

05/09/2022

Status:

Open

Tender reference number OC/EFSA/IDATA/2022/03

Title Monitoring and Surveillance Data for Future Chemical Risk Assessment Needs in EFSA:
Exploring New Opportunities

Description The aim of the project is to identify and prioritise EFSA's data needs for advancing HHRA, AHRA and ERA, identify, and map relevant data sources, and provide recommendations for data access and generation. This project is a first milestone to prepare the ground for other planned developments in HHRA, AHRA and ERA to allow EFSA to identify opportunities for reusing existing monitoring and surveillance data (i.e. either through connection or collection), and if not accessible or non-reusable, initiate projects for the generation of new data. The focus of the project is on monitoring and surveillance data that could indicate presence of chemicals.
