Title

Review of existing frameworks to support evidence-informed decision-making in public health
Identify evidence-to-decision (EtD), evidence-to-recommendations (EtR), evidence-to-policy (EtP) frameworks, and practical examples of their current application. Extract and compare the qualitative and quantitative criteria used by the different frameworks to support priority-setting and decision-making. Identify and discuss limitations of the currently existing frameworks and their applicability, including known or potential enablers and barriers that may help or impede the implementation of the currently existing frameworks to support timely and transparent decision-making in infectious disease prevention and control. Estimated total amount: 60,000 EUR
